Digital Governance of Education Prabhat Prakashan China is widely viewed as a global powerhouse that has achieved a remarkable economic transformation with little political change. Less well known is that China's leaders have also implemented far-reaching governance reforms designed to promote government transparency and increase public participation in official policymaking. What are the motivations behind these reforms and, more importantly, what impact are they having? This puzzle lies at the heart of Chinese politics and could dictate China's political trajectory for years to come. This extensive collaborative study not only documents the origins and scope of these reforms across China, but offers the first systematic assessment by quantitatively and qualitatively analyzing the impact of participation and transparency on important governance outcomes. Comparing across provinces and over time, the authors argue that the reforms are resulting in lower corruption and enhanced legal compliance, but these outcomes also depend on a broader societal ecosystem that includes an active media and robust civil society.

BETWEEN PROMISE AND PERIL

Walnut Publication "Diversity and excellence in Higher Education seem to be conflicting concepts. Nevertheless, they are dynamic and closely intertwined -- indeed they may even require each other. The book brings together insights from ten different countries to analyse these multi-faceted phenomena and discuss how they may be reconciled within higher education. To set the overall context, it critically addresses markets and managerialism, whilst foregrounding the dangers of certain behavior that European countries are currently, though often unwisely, copying from the U.S. In a mass Higher Education system, the social basis of the student body diversifies - a fact that creates new challenges for planners and managers. The authors' study of diversity concentrates particularly upon issues of equity and justice for students, addressing their life cycle transitions from school to higher education, degree completion, postgraduate education and employability. It also considers challenges posed by diversification at the institutional level, encompassing changes in management, leadership, governance and performance assessment. It addresses attempts to achieve excellence by selectivity, thereby contributing to the stratification of university systems; and it explores attempts to achieve excellence by merging smaller institutions to form larger entities. The book's overall conclusion is that diversity and excellence are not necessarily enemies but relatives who cannot escape the bond between them."

Global Perspectives, Theories, and Practices UN-HABITAT Governing multi-level education systems requires governance models that balance responsiveness to local diversity with the ability to ensure national objectives.

OECD PUBLIC GOVERNANCE REVIEWS OECD INTEGRITY REVIEW OF NUEVO LEÓN, MEXICO SUSTAINING INTEGRITY REFORMS

Taylor & Francis Offers valuable insights into the governance process in higher

education. Building on the resources offered in the first volume of this series, this second volume offers governance members, leaders, and other academics valuable insights into the governance process in higher education. In a chapter drawn from his keynote address at the March 2015 SUNY Voices conference, Steven Bahls, president of Augustana College, provides a critical study of institutions of higher education. Nine additional chapters offer a thorough analysis of academic processes that are usually hidden from view, including development of a sexual assault policy, faculty review of administrators, and successful use of task forces. Contributors describe subtle considerations and compromises, which effective governance leaders can incorporate into collaborations leading to effective outcomes. Readers of this volume will better understand how to avoid pitfalls of their own, as contributors illustrate hard-earned wisdom and lessons learned. Practical insights and guidelines on leadership development, budget development involving governance leaders, and mentoring are provided. This volume will provide readers—faculty, staff, students, and administrators—with the pragmatic resources they need to recognize and resolve governance challenges on their own campuses.

China's Governance Puzzle Bloomsbury Publishing This review analyses the integrity system of Nuevo León, Mexico, as well as its efforts to build a culture of integrity in the public administration. It looks at mechanisms for providing timely advice and guidance to public officials when they are confronted with integrity-related questions and ...

RTI Press Administration in a democratic nation stands on the strong foundation of Good Governance. The need for establishing an effective government on the pillars of transparency and openness is undoubtedly one of the most pressing and profound issue confronting the contemporary society. Keeping in mind this crucial task, this book closely examines the role of media in promoting good governance. The limitations and the hindrances in the way of media and good governance in India, in general, and in Bihar, in particular, is also reviewed and highlighted. This book ends with analyzing the empirical findings, proposing suggestions for improvement and with providing a solid base for further course of more in-depth analysis in the subject.

Higher Education Governance in the Arab World Penerbit USM 'Higher Education Management - Leading with Ethics and Transparency' focuses on developing transparent and ethical management system within the higher education institutions. The book aims to sensitize higher education leaders and managers about the different ethical issues in managing higher education both at strategic as well as operational level.

POWER AND POLICY NETWORKS IN THE NEOLIBERAL STATE

IAP Digital Governance of Education explores the multiple ways in which digital technologies are changing the experience of education. With much of the contemporary education practice either taking place or being documented digitally, a huge amount of data is constantly being collected and analysed to give sophisticated and up-to-date accounts of education practice in contemporary societies. Such 'datafication' of education,

mediated through technology, gives rise to what the author defines as 'digital governance' of education - a transnational assemblage of people, technologies and policies that increasingly affects how national education systems are organized and managed. Paolo Landri argues that the emergence of digital governance is closely related to the new wave of standardization in education, exemplified by the shift towards what is measurable (for example focus on 'learning outcomes') and towards transparency in education practice - a shift that is both facilitated and augmented by digital technologies. The author places the digital governance of education within the framework of Europeanization of education, exploring how it contributes to the creation and regulation of European education arena through consolidation of digital space and tools introduced in this process (such as guidelines, country reports and online dashboards). Adopting a sociomaterial approach to education policy and drawing on actor-network theory, Paolo Landri uses empirical data to investigate how the digitization of education policy and practice is occurring in Italy, and to what extent it contributes to the growth of the digital governance of education. Pointing out the variety of risks and opportunities, he indicates future directions of critical research and the wider international implications of this global trend.

TECHNOLOGY, STANDARDS AND EUROPEANIZATION OF EDUCATION

SAGE Publishing India Democratic institutions and laws are essential, but they cannot bring about democracy on their own. They will only function if they build on a culture of democracy, and our societies will not be able to develop and sustain such a culture unless education plays an essential role. Student engagement is crucial: democracy cannot be taught unless it is practised within institutions, among students and in relations between higher education and society in general. This 20th volume of the Council of Europe Higher Education Series demonstrates the importance of student engagement for the development and maintenance of the democratic culture that enables democratic institutions and laws to function in practice. This volume covers three aspects of student engagement that are seldom explored: its role in society through political participation and civic involvement; its place in higher education policy processes and policy-making structures; and how student unions represent the most institutionalised form of student engagement. The authors are accomplished scholars, policy makers, students and student leaders.

Routledge This proceedings volume contains selected papers presented at the 2014 International Conference on Education Management and Management Science (ICEMMS 2014), held August 7-8, 2014, in Tianjin, China. The objective of ICEMMS2014 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world. **Higher Education in the Arab World** Cambridge University Press Coping with the challenges of global economic governance is a topical issue of the current international agenda, and the object of a vivid debate among scholars and policy-makers. The international financial and economic crisis that erupted in 2007 reveals the fallibility of the neoliberal paradigm that has dominated the world economic landscape for the last quarter of a century; regulatory and supervisory institutions have disclosed

their weaknesses, and markets have shown their limits in dealing with the rational allocation of risks, and their lack of resilience to shocks. This book offers a comprehensive view of this matter, examining the dialectic and fluid relations between State sovereignty, supranational rules and the role of markets. The opportunity to deal with economic and regulatory challenges through the lens of legitimacy and effectiveness is the fil rouge of the co-authors' original contributions and the inner-sense of the book. This critical perspective results particularly in investigating gaps and ambiguities of the institutional framework currently underpinning the major international economic organisations (IMF, WTO, G20, EMU), in re-discussing the State's regulatory role in coping with the challenges of the global economy, and in studying the contradictory interactions between financial paradigms and sustainability with regards to economic development policies.

European Higher Education Area: The Impact of Past and Future Policies EOLSS Publications

In a world characterized by globalization, governments increasingly find themselves unable to govern. Corruption is everywhere, natural resources are being exploited, the environment damaged, markets distorted, and the fight against poverty is often ineffective. Certain challenges cannot be addressed by governments alone. Increasingly, collective governance "beyond governments" is seen as part of the solution, with state and non-state actors working together. This book sets out a framework for those wishing to implement collective governance, involving civil society, companies and governments as key actors. Based on over eight years of running the most advanced example of collective governance at international level,

the Head and Deputy Head of the Extractive Industries Transparency Initiative (EITI) outline the practicalities and pitfalls, and draw out the experience of the EITI as a case example. Beyond Governments tells a positive story of how this type of innovative governance can make real achievements, but also cautions against those who see collective governance as a silver bullet to solve development challenges. It provides practical guidance from a practitioner's perspective and is essential reading for those in government, business and academia.

In attaining economic prosperity, efficient human capital and thus higher education, has increasingly ranked among the top of priorities in the Southeast Asian countries. It is to this end that Malaysia, in particular, has been working towards a reform in its higher education system. Reform measures have greatly centred on the issues of university autonomy. This book details the careful findings of the project entitled Governance Reforms in Malaysia Higher Education with Focus on Institutional Autonomy and Its Effects of University Governance and Management. As such, readers can look forward to gaining a thorough understanding of the reform measures taken in higher education governance and the extent of their impact. Four areas of autonomy are extensively covered: institutional, financial, academic and human resource autonomy. The challenges faced in the individual areas are painstakingly dissected and presented, leading up to projections and recommendations on the way forward in Malaysian higher education governance.

TOOLS TO SUPPORT TRANSPARENCY IN LOCAL GOVERNANCE

Routledge

This volume explores new directions of governance and public policy arising both from interpretive political science and those who engage with interpretive ideas. It conceives governance as the various policies and outcomes emerging from the increasing salience of neoclassical and institutional economics or, neoliberalism and new institutionalisms. In doing so, it suggests that that the British state consists of a vast array of meaningful actions that may coalesce into contingent, shifting, and contestable practices. Based on original fieldwork, it examines the myriad ways in which local actors – civil servants, mid-level public managers, and street level bureaucrats – have interpreted elite policy narratives and thus forged practices of governance on the ground. This book will be of key interest to scholars, students and practitioners of governance and public policy.

Government and Governance Springer

This book documents experimentation with various policy and governance approaches that produce structural differences in the composition and organisation of Asia's higher education systems. In view of the wide variation in the public and private provision of higher education, it showcases how issues of access, equity and modes of participation are addressed, how institutional and programme quality are managed and how academic labour is treated and developed. The book both maps these differences and analyses the country-level dynamics, policy approaches and

the problems faced by a variety of states in Asia in the race to develop competitive higher education systems. Focusing on the intersection of governance and higher education policy, it addresses the challenges facing higher education in Asia and the national responses of governments in terms of the organisation of the sector.
