The Long Way Bernard Moitessier OMB No. 6872039241156 edited by

YULIANA CULLEN

A World of My Own Harper Collins
After their 43-foot schooner was stove in by a pod of killer whales, the Robertson family spent 37 days adrift in the Pacific. With no maps, compass, or navigational instruments, and rations for only three days, they used every survival technique they could as they battled 20-foot waves, marauding sharks, thirst, starvation, and exhaustion.
Stress-Free Sailing Boxtree
Published to coincide with the Golden Globe Race's 50th Anniversary It lay like a gauntlet thrown down; to sail around the world alone and non-stop. No one had ever done it, no one knew if it could be done. In 1968, nine men - six Englishmen, two Frenchmen and an Italian - set out to try, a race born of coincidence of their timing. One didn't even know how to sail. They had more in common with Captain Cook or Ferdinand Magellan than with the high-tech, extreme sailors of today, a mere forty years later. It was not the sea or the weather that determined the nature of their voyages but the men they were, and they were as different from one another as Scott from Amundsen. Only one of the nine crossed the finishing line after ten months at sea. The rest encountered despair, sublimity, madness

and even death.

A SEA VAGABOND'S WORLD

The Long Way

The vast majority of sailing yacht scenarios comprise a couple sailing the boat together, and needing to carry out all manoeuvres and activities themselves with no help from a back-up crew. Their boat handling, navigation, sail handling, anchoring and mooring skills all have to be carried out both efficiently and effectively, preferably with the minimum of physical effort (to conserve energy). But most sailing technique books assume a crew of 3 or 4, all willing to lend a hand. This book is therefore a first, addressing the most common sailing scenarios that anyone cruising will have to deal with, and providing clever, original, highly effective (and most importantly successfully tried and tested by the author) techniques and solutions for dealing with the huge variety of essential operations on a boat - from sail setting and reefing, to picking up mooring buoys in a variety of wind and tide situations, anchoring, berthing and leaving a pontoon shorthanded, picking up a man overboard, sailing in fog and heavy weather - and even going up the mast. This book will be a godsend to anyone sailing single or shorthanded - including couples with young children who need to be supervised by one parent whilst the other runs the boat.

Organised into techniques for different cruising scenarios, the book features step by step sequential photos showing exactly how to approach each situation and carry out the task in hand.

Once Is Enough Crown

Sailing Ten Years and 20,000 Miles In Search of Surf and Self

An Inexplicable Attraction Chicago Review Press

"Technologically outmoded and once nearly swept from the seas, tall ships have experienced a fifty-year renaissance as sail training and passenger vessels, and we are the richer for it. After all, what sight has more power to stir the soul than a tall ship under sail with its acres of canvas and miles of rigging? But that resurgence has had a tragic side, and professional mariner and maritime scholar Dan Parrott explores it in *Tall Ships Down*, a groundbreaking reconstruction of the losses of the 316-foot barque Pamir in 1957; the 117-foot brigantine Albatross in 1961; the 117-foot barque Marques in 1984; the 137-foot Pride of Baltimore in 1986; and the 125-foot brig Maria Asumpta in 1995. Together, these disasters claimed 112 lives." "The stories of these majestic ships have been subject to mystery and distortion. In some instances even the survivors could not explain what went wrong, and in others the official inquiries failed to articulate the most critical lessons hidden in the sudden, terrible catastrophes - until now." "Parrott traces the history of each ship from its building and early career through subsequent owners' modifications. His vivid recreations of each final voyage dissect the circumstances of loss from forensic evidence, expert testimony, survivors' memories, and his own considerable experience. Carefully examined, the

evidence shows that, contrary to some official findings, ignorance of and disregard for age-old practices of seamanship were at least as responsible for the tragedies as "acts of God." In some instances the seeds of a ship's ultimate undoing were planted years before, as ill-considered structural changes, rig modifications, and "mission creep" eroded its stability and seaworthiness. Cargo loose in holds, hatches unsecured at sea, freeing ports timbered shut, failure to preserve proper sea room - these and other factors emerge from Parrott's analysis as contributing factors." --Book Jacket.

Voyage Vintage Canada

The Long Way is Bernard Moitessier's own incredible story of his participation in the first Golden Globe Race, a solo, non-stop circumnavigation rounding the three great Capes of Good Hope, Leeuwin, and the Horn. For seven months, the veteran seafarer battled storms, doldrums, gear-failures, knock-downs, as well as overwhelming fatigue and loneliness. Then, nearing the finish, Moitessier pulled out of the race and sailed on for another three months before ending his 37,455-mile journey in Tahiti. Not once had he touched land.

North to the Night A&C Black

In the tradition of *Into Thin Air* and *The Perfect Storm*, an intensely gripping account of the round-the-world single-handed yacht race that claimed the life of Canadian sailor Gerry Roufs in a make-or-break dash through 12,000 miles of terror in the Southern Ocean.

The Water in Between Sheridan House, Inc.

This timeless classic is an exciting true story of survival against all odds.

BOX WINE SAILORS

William Morrow & Company
Completely revised and updated to address changes in technology, this new edition is the definitive guide to the art and science of sailing. Since the publication of the widely hailed first edition in 1983, *The Annapolis Book of Seamanship* has set the standard by which other books on sailing are measured. Used throughout America as a textbook in sailing schools and Power Squadrons, *The Annapolis Book of Seamanship* thoroughly and clearly covers the fundamental and advanced skills of modern sailing. This edition of *Annapolis* is a major overhaul. Over half the book has been revised; old topics and features have been updated, and many new ones have been introduced. The design has been modernized, and many color illustrations have been added. As big and detailed as *Annapolis* is, the wealth of technical information (including dozens of step-by-step instructions) is presented here in a way that is uniquely readable; it's both useful and easy to use. This is because John Rousmaniere and artist Mark Smith bring to *Annapolis* decades of experience both as sailors and as professional communicators. *Annapolis* emphasizes

the standard skills and proven methods that eliminate error and confusion, ensure security in emergencies, and allow every sailor more time for enjoyment on the water. Much has changed on the water since 1983 when this book was originally published. Black buoys are now green, the Global Positioning Satellite navigation system (GPS) is almost universally used, new types of anchors and sails have appeared, safety skills and gear are vastly improved, many more women are commanding boats, and catamarans and trimarans are common where only monohulls used to sail. But for all these modern developments, the basic skills and spirit of sailing have not changed at all. Sail trimming, keeping up steerageway, maintaining the dead reckoning plot, heaving-to -- these fundamentals are as important now as ever and receive much attention here. Among the innovations in this edition are: * Basic skills in early chapters: Fundamental sailing and boat-handling skills and gear, which are introduced in chapters 1, 2, and 3. * "Hands On" segments: Three dozen special sections, each devoted to a particular seamanship problem and an expert solution. * More how-to tips: Additional rules of thumb that guide a crew quickly and successfully through seamanship problems. * New coverage of multihulls: Advice on evaluating, anchoring, and handling catamarans and trimarans under sail (including in storms). * More on emergencies: New material on emergencies, safety, and heavy-weather sailing, including a section on preparing a docked boat for a hurricane. * Equipment updates: Expanded coverage of the use and care of modern gear and hardware, including radar, GPS, rescue devices, and asymmetrical spinnakers. *

Terminology: Full definition and illustration of major terms when they're first introduced, with alternative language provided in parentheses. * Gender: The use of feminine personal pronouns, which reflect the fact that more women are captaining and sailing boats than ever before. From navigation and seamanship to boat and gear maintenance, from pleasure cruising to heavy-weather sailing, here is the definitive, state-of-the-art guide that provides systematic step-by-step techniques to see you through every situation on deck and in the cockpit. How Not To Sail Simon and Schuster Bernard Moitessier is a writer and one of France's most famous sailors.

GODFORSAKEN SEA

Patagonia
The adventures of Bernard Moitessier-- French sailor, explorer and writer, in his own words. This memoir encompasses his childhood in Southeast Asia, his war experience fighting the Viet Minh, and his numerous sea exploits.

THE ANNAPOLIS BOOK OF SEAMANSHIP

Da Capo Press
Sir Robin Knox-Johnston's views on seamanship and some of his seafaring experiences over the last 50 years.

CHAPMAN PILOTING & SEAMANSHIP 69TH EDITION

Simon and Schuster
Before *The Perfect Storm*, before *In the Heart of the Sea*, Steven Callahan's dramatic tale of survival at sea was on the New York Times bestseller list for more than thirty-six weeks. In some ways the model for the new wave of adventure books, *Adrift* is an undeniable seafaring classic, a riveting firsthand

account by the only man known to have survived more than a month alone at sea, fighting for his life in an inflatable raft after his small sloop capsized only six days out. "Utterly absorbing" (*Newsweek*), *Adrift* is a must-have for any adventure library.

Imperiled Ocean Sheridan House, Inc. On Friday 14 June 1968 Suhaili, a tiny ketch, slipped almost unnoticed out of Falmouth harbour steered by the solitary figure at her helm, Robin Knox-Johnston. Ten and a half months later Suhaili, paintwork peeling and rust streaked, her once white sails weathered and brown, her self-steering gone, her tiller arm jury rigged to the rudder head, came romping joyously back to Falmouth to a fantastic reception for Robin, who had become the first man to sail round the world non-stop single-handed. By every standard it was an incredible adventure, perhaps the last great uncomputerised journey left to man. Every hazard, every temptation to abandon the astounding voyage came Robin's way, from polluted water tanks, smashed cabin top and collapsed boom to lost self-steering gear and sheered off tiller, and all before the tiny ketch had fought her way to Cape Horn, the point of no return, the fearsome test of any seaman's nerve and determination. *A World of My Own* is Robin's gripping, uninhibited, moving account of one of the greatest sea adventures of our time. An instant bestseller, it is now reissued for a new generation of readers to be enthralled and inspired.

THE ILLUSTRATED SAILING ALONE AROUND THE WORLD

Sheridan House, Inc.
Cataloging the sights, smells, sounds, and features common to the many peoples who share the Mediterranean,

this fascinating portrait of a place and its civilizations is sure to appeal to active and armchair travelers alike. 58 illustrations.

Adrift Bloomsbury Publishing

"I know you'll want to read more after you finish *Sailing a Serious Ocean*. And be warned, you'll very likely want to sail with John, perhaps across an ocean." -- DALLAS MURPHY, AUTHOR OF *ROUNDING THE HORN* After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages. Now you can take a seat next to John--at a lesser cost--and get the knowledge you need to fulfill your own dream of blue-water adventure. In *Sailing a Serious Ocean*, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route, navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and enjoying them. Before you set off across

the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you.

SHIP ABLAZE

McGraw Hill Professional

On a life raft in the Mediterranean, a teenager from Ghana wonders whether he will reach Europe alive. A young chef disappears from a cruise ship, leaving a mystery for his friends and family to solve. A water-squatting community battles eviction from a harbor in a Pacific Northwest town, raising the question of who owns the water. *Imperiled Ocean* is a deeply reported work of narrative journalism that follows people as they head out to sea. What they discover holds inspiring and dire implications for the life of the ocean, and for all of us back on land. As *Imperiled Ocean* unfolds, battles are fought, fortunes made, and lives are lost. Behind this human drama, the ocean is growing ever more unstable, threatening to upend life on land. We meet a biologist tracking sturgeon who is unable to stop the development and pollution destroying the fish's habitat, he races to learn about the fish before it disappears. Sturgeon has survived more than 300 million years on earth and could hold important truths about how humanity might make itself amenable to a changing ocean. As a fisher and scientist, his ability to listen to the water becomes a parable for today. By eavesdropping on an imperiled world, he shows a way we can move forward to save the oceans we all share.

SWELL

Yacht Fiona

In early 1968, desperate entrepreneur Donald Crowhurst was trying to sell a nautical navigation device he had

developed when he saw that the Sunday Times would be sponsoring the Golden Globe Race, the first ever solo, round-the-world sailing competition. An avid amateur sailor, Crowhurst sensed a marketing opportunity and shocked the world by entering the competition using an untested trimaran of his own design. Shock soon turned to amazement when he quickly took the lead, checking in by radio message from locations far ahead of his seasoned competitors. But on July 10, 1969, roughly eight months after he had sailed from England--and less than two weeks from his expected triumphant return--his wife was informed that his boat, the Teignmouth Electron, had been discovered drifting quietly, abandoned in the middle of the Atlantic Ocean. Crowhurst was missing, assumed drowned. How did he come to such an end when his race had begun with such incredible promise? In this masterpiece of investigative journalism, Nicholas Tomalin and Ron Hall reconstruct one of the greatest modern stories of one man's descent into self-delusion, public deception, and madness. Based on in-depth interviews with Crowhurst's family and friends, combined with gripping excerpts from his logbooks that revealed (among other things) he had been falsifying his locations all along, Tomalin and Hall paint an unforgettable, haunting portrait of a complex, deeply troubled man and his final fateful journey.

THE LONG WAY

Rowman & Littlefield

From time immemorial, few narrative

genres have had the power to so stir the emotions or captivate the imagination as the true account of a lone adventurer's triumph over the titanic forces of nature. Among the handful of such tales to emerge in the twentieth century, one of the most enduring surely must be Sir Francis Chichester's account of his solitary, nine-month journey around the world in his 53-foot ketch Gipsy Moth IV. The story of how the sixty-five-year-old navigator singlehandedly circumnavigated the globe, the whole way battling hostile seas as well as his boat's numerous design flaws, is a tale of superhuman tenacity and endurance to be read and reread by sailors and armchair adventurers alike. First published in 1967, just months after the completion of Chichester's historic journey, Gipsy Moth Circles the World was an instant international best-seller. It inspired the first solo around-the-world race and remains a timeless testament to the spirit of adventure. Francis Chichester's 1967 singlehanded circumnavigation set a blazing record for speed. He completed the voyage with just one stop and 226 days at sea. It was an amazing performance; that he was sixty-five years old made it the more so. Chichester then sat down to write one of the great narratives of modern voyaging. "A remarkable feat, a moving story of conquest by the unquenchable human spirit, a determined old man's gesture of defiance at the modern world. Such was the voyage; his book is a fine account of it with nothing left out."--Alan Villiers, Saturday Review
