What are the most fundamental differences among the political economies of the developed world? How do national institutional differences condition economic performance, public policy, and social well-being? Will they survive the pressures for convergence generated by globalization and technological change? These have long been central questions in comparative political economy. This book provides a new and coherent set of answers to them. Building on the new economics of organization, the authors develop an important new theory

about which differences among national political economies are most significant for economic policy and performance. Drawing on a distinction between 'liberal' and 'coordinated' market economies, they argue that there is more than one path to economic success. Nations need not converge to a single Anglo-American model. They develop a new theory of 'comparative institutional advantage' that transforms our understanding of international trade, offers new explanations for the response of firms and nations to the challenges of globalization, and provides a new theory of national interest to explain the conduct of nations in international

relations. The analysis brings the firm back into the centre of comparative political economy. It provides new perspectives on economic and social policy-making that illuminate the role of business in the development of the welfare state and the dilemmas facing those who make economic policy in the contemporary world. Emphasizing the 'institutional complementarities' that link labour relations, corporate finance, and national legal systems, the authors bring interdisciplinary perspectives to bear on issues of strategic management, economic performance, and institutional change. This pathbreaking work sets

new agendas in the study of comparative political economy. As such, it will be of value to academics and graduate students in economics, business, and political science, as well as to many others with interests in international relations, social policy-making, and the law.

### **ENGLISH GRAMMAR PRACTICE**

Allyn & Bacon  
This e-book is Volume 4 of the 101 C2-Proficiency Key Word Transformation quizzes series written to help you improve paraphrasing skills. It contains 101 sentence

transformations in total, many of which are based closely on some of the most common test items in past exam papers. For those preparing for the C2 Cambridge English Proficiency examination (previously known as the CPE), the book provides you with further practice for Part 4 of the Reading & Use of English paper. Prior to using this book, you should acquaint yourself with basic knowledge of some sophisticated grammar forms in English, which appear to be commonly tested in this part of the paper. These include inversion or inverted sentences, subjunctives, cleft sentences, emphatic structures, conditionals, comparatives and

superlatives, relative clauses, nominal clauses, phrasal verbs and phrasal nouns, prepositional combinations, etc. A firm grasp of collocations and idiomatic expressions is also essential in helping you make full use of this book. Before checking out the other volumes of the series, it would be advisable for you to attempt Volume 1 and Volume 2 as they are aimed at helping you revise the key language features mentioned above as well as lay the foundation for more complex quizzes in the later volumes.
