From the author of the New York Times bestselling Plant Paradox series comes this revolutionary take on the keto diet that debunks common myths and shows readers how to reap the rewards of keto with less restriction Like many doctors

and nutrition experts, bestselling author Dr. Steven Gundry has long endorsed the ketogenic diet—a style of eating that heavily restricts carbohydrate intake to make the body burn fat for fuel. Because ketosis offers a variety of health benefits, including weight loss, reduced risk of illness, and enhanced energy, Dr. Gundry believed his patients' efforts to adhere to the challenging regimen was worthwhile. That is, until his research uncovered a shocking truth: We've gotten keto all wrong. In *Unlocking the Keto Code*, Dr. Gundry reveals the biological mechanism that makes keto diets so successful: a cellular process known as "mitochondrial uncoupling." As it turns out, ketones are not the magical fuel source they've been made out to be; in fact, the body cannot run on ketones and fats alone. Over the long term, a very low carb-diet can lead to muscle wasting and poor cognitive health. Luckily, you don't have to restrict all carbs to reap the benefits of ketosis; you simply have to have enough ketones and other plant compounds called polyphenols present in your body to "unlock" the process of mitochondrial uncoupling. In this insightful, empowering, eminently practical book, Dr. Gundry explains the many ways readers can ignite this process, from feasting on plant-based foods (carbs that are typically off-limits on a keto diet!) to enjoying ketone generating foods such as goat and sheep milk products, to implementing a timed eating schedule. You will even discover the real reason how superfoods, even apple cider vinegar, work their magic; and its not what they you think! Grounded in cutting-edge science, this is the book for all the people who have tried and failed on a keto diet; for vegetarians and vegans who want to go keto; and for

anyone who wants to lose weight and enjoy better health while eating a wide variety of foods. With food lists, hacks, and all-new recipes, *Unlocking the Keto Code* makes going keto easy and enjoyable for the first time.

With *The Firm*, financial journalist Duff McDonald pulled back the curtain on consulting giant McKinsey & Company. In *The Golden Passport*, he reveals the inner works of a singular nexus of power, ambition, and influence: Harvard Business School. Harvard University still occupies a unique place in the public's imagination, but the Harvard Business School eclipsed its parent in terms of influence on modern society long ago. A Harvard degree guarantees respect. But a Harvard MBA near-guarantees entrance into Western capitalism's most powerful realm—the corner office. And because the School shapes the way its powerful graduates think, its influence extends well beyond their own lives. It affects the organizations they command, the economy they dominate, and society itself. Decisions and priorities at HBS touch every single one of us. Most people have a vague knowledge of the power of the HBS network, but few understand the dynamics that have

made HBS an indestructible and dominant force for almost a century. Graduates of HBS share more than just an alma mater. They also share a way of thinking about how the world should work, and they have successfully molded the world to that vision—that is what truly binds them together. In addition to teasing out the essence of this exclusive, if not necessarily “secret” club, McDonald explores two important questions: Has the school failed at reaching the goal it set for itself—“the multiplication of men who will handle their current business problems in socially constructive ways?” Is HBS complicit in the moral failings of Western capitalism? At a time of soaring economic inequality and growing political unrest, this hard-hitting yet fair portrait offers a much-needed look at an institution that has had a profound influence not just in the world of business but on the shape of our society—and on all our lives.

Against Labor Springer

Against Labor highlights the tenacious efforts by employers to organize themselves as a class to contest labor. Ranging across a spectrum of understudied issues, essayists explore employer anti-labor strategies and offer incisive portraits of people and organizations that aggressively opposed unions. Other contributors examine the anti-labor movement against a backdrop of larger forces, such as the intersection of race and ethnicity with anti-labor activity, and anti-unionism in the context of neoliberalism. Timely and revealing, *Against Labor* deepens our understanding of management history and employer activism and their metamorphic effects on workplace and society. Contributors: Michael Dennis, Elizabeth Esch, Rosemary Feurer, Dolores E. Janiewski, Thomas A. Klug, Chad Pearson, Peter Rachleff, David Roediger, Howard Stanger, and Robert Woodrum.

Culture Clash 2 Penguin

Few are prepared for managing across cultures, and the costs of cultural blind spots can spin out of control—from lawsuits to lost opportunities. Forged in

the fire of clashing cultures and living on four continents, Dr. Zweifel developed a fool-proof methodology for managing successfully across borders. And post-9/11, the Arab Spring and the BRICS emerging markets, e-commerce and social networks have made this updated and expanded edition of Culture Clash indispensable. Culture Clash 2 is not another Kiss, Bow or Shake Hands. Such protocol-laden works on whether to bring wine to a dinner in Singapore or how many times to kiss in France might have their uses, but non-compliance with local etiquette has rarely been a deal-breaker. What has derailed international business is the inability of managers to see the world from their counterpart's point of view, read between the lines, and decode the mind-set of the other side.

Book Thirteen of The Wheel of Time
University of Illinois Press
Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1:

Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

This new Guide has been developed by AICPA staff and the Equity Securities Task Force and is the first in a series of 3 NEW AICPA Accounting Valuation Guides to be released. This long anticipated release reflects best practices developed over the previous decade. Since the issuance of FASB ASC 718 and 505-50 in 2004, valuing stock-based compensation ("cheap stock") has been a significant challenge for private companies. This New Guide has been designed to mitigate those challenges. It brings you practical guidance and illustrations related to accounting, disclosures and valuation of privately held company equity securities issued as compensation. This guide includes:

- Evaluating private and secondary market transactions — What should companies do when transaction activity doesn't match their estimates of value?
- Adjustments for control and marketability — How should companies think about the value of the enterprise for the purpose of valuing minority securities? When is it appropriate to apply a discount for lack of marketability, and how should the estimated discount be supported?
- Highly leveraged entities — How should companies incorporate the fair value of debt in the valuation of equity securities? What is the impact of leverage on the expected volatility of various securities? The relevance of ASC 820 (SFAS 157) to cheap stock issues

Updated guidance and illustrations regarding the valuation of, and disclosures related to, privately held company equity securities issued as compensation This Guide also provides expanded and more robust valuation material to reflect advances in the theory and practice of valuation since

2004. This edition includes guidance from FASB ASC 718, 505-50, 820-10 and SSVS 1 which were all issued since the last AICPA guidance dedicated to this issue.

Music and dyslexia is of particular interest for two reasons. Firstly, research suggests that music education can benefit young dyslexics as it helps them focus on auditory and motor timing skills and highlights the rhythms of language. Secondly, dyslexic musicians at a more advanced level face particular challenges such as sight-reading, written requirements of music examinations and

extreme performance nerves. This is a sequel to the highly successful *Music and Dyslexia: Opening New Doors*, published in 2001. The field of dyslexia has developed rapidly, particularly in the area of neuropsychology. Therefore this book focuses on these research advances, and draws out the aspects of music education that benefit young dyslexics. The contributors also discuss the problems that dyslexic musicians face, and several chapters are devoted to sight-reading and specific strategies that dyslexics can use to help them sight-read. The book offers practical techniques and strategies, to teachers and parents to help them work with young dyslexics and dyslexic musicians.
