This book brings together thought leadership from academia and leading figures in asset management in key global jurisdictions, to pool together insights regarding the transformative

visions and challenges for modern investment management, as well as best practices that realise the policy objectives in regulation and soft law. The world of investment management is being challenged by new legal, regulatory and soft law developments to demonstrate that their practices cohere with the long-term needs of the saving population as well as public interest needs in financing global sustainability

and social development. The chapters in this book uniquely bring together the views of academia and practice on the key developments that can transform the law and practice of investment management, including the EU's new sustainable finance reform package, the UK Stewardship Code 2020, and developments in the US regarding the fit between fiduciary law for investment management and modern sustainability concerns. The book brings together the best of both worlds—critical thoughtful perspectives from academia and qualitative insight from the investment management industry. It will be of interest to researchers in law, investment management, business and management, practitioners in the investment management industry and

their legal advisers, and policy-makers in the EU, UK and beyond who are grappling with the appropriate governance paradigms for bringing about more sustainable outcomes globally.

In the ten years since its coming into force, the Alternative Investment Fund

Managers Directive (AIFMD), with almost EUR 7 trillion assets under management in its remit, has become an important piece of European regulation complementing the Undertakings for Collective Investment in Transferable Securities (UCITS) and the Markets in Financial Instruments (MiFI) frameworks. This third edition of the most comprehensive and in-depth analysis of the AIFMD and its related European investment fund legislation (including the European Venture Capital Fund Regulation, the European Social Entrepreneurship Fund Regulation, the European Long-Term Investment Fund Regulation and the European Money Market Fund Regulation among others) brings together fund industry experts, fund supervisors, consultants, lawyers

and academics to discuss the content and system of the directive from every angle, including its relation not only to the UCITS and MiFI frameworks but also to pension funds, the Sustainable Finance Disclosure Regulation, the Securitization Regulation and the Cross Border Funds Distribution Directive and Regulation, as well as related pieces of tax regulation at the European level. Further, the third edition emphasizes the function of such factors in the financial services value chain as the following: the AIFMD's approach to robo-advisors; digital asset funds; infrastructure investments in the context of real estate and sustainable investments; risk management; transparency; and impact on alternative investment strategies. Five country reports, focusing on the

European Union's five most important financial centres for alternative investment funds, deal with the potential interactions among the AIFMD and the relevant laws and regulations of France, Germany, Luxembourg, Ireland and The Netherlands. This thoroughly updated edition elaborates on potential difficulties encountered when applying the directive and provides potential solutions to the problems it raises. The book is sure to be warmly welcomed by fund lawyers and consultants, investors and their counsels, fund managers, depositaries, asset managers and administrators, as well as regulators and academics in the field.

This book provides an overview of international investment policy and

policy-making, drawing upon perspectives from law, economics, international business, and political science. International investment is a complex phenomenon with significant effects worldwide. Developing effective policies and strategies to attract investment in sufficient quantities and marshal it to contribute to sustainable development is a critical challenge for governments at all levels. This book's interdisciplinary approach provides fresh insights into the mix of policy options available to governments seeking investment to support their country's (or region's) development. As well as identifying ways to effectively design, implement, and assess policies to attract foreign investment, it explores how to manage foreign investment's effects.

Various dimensions of international investment policy are discussed, including benefits and costs (economic, environmental, social, and political) of foreign investment, the significance of global value chains, state-owned enterprises and sovereign wealth funds, and the role of tax policy, investment promotion, and policy advocacy, location branding, investment treaties, and national security considerations. Through its contributions to a new interdisciplinary understanding of international investment policy-making, this book will benefit students and scholars working in areas such as international business, international economic law, international economics, development economics, international development, and international political

economy as well as being a valuable resource for policy-makers.

SILVER WINNER for the 2022 Taste Canada Award for Single-Subject Cookbooks *SHORTLISTED for the 2021 Gourmand World Cookbook Award* A sustainable lifestyle starts in the kitchen with these use-what-you-have, spend-less-money recipes and tips, from the friendly voice behind @ZeroWasteChef. In her decade of living with as little plastic, food waste, and stuff as possible, Anne-Marie Bonneau, who blogs under the moniker Zero-Waste Chef, has preached that "zero-waste" is above all an intention, not a hard-and-fast rule. Because, sure, one person eliminating all their waste is great, but thousands of people doing 20 percent better will have

a much bigger impact. And you likely already have all the tools you need to begin. In her debut book, Bonneau gives readers the facts to motivate them to do better, the simple (and usually free) fixes to ease them into wasting less, and finally, the recipes and strategies to turn them into self-reliant, money-saving cooks and makers. Rescue a hunk of bread from being sent to the landfill by making Mexican Hot Chocolate Bread Pudding, or revive some sad greens to make a pesto. Save 10 dollars (and the plastic tub) at the supermarket with Yes Whey, You Can Make Ricotta Cheese, then use the cheese in a galette and the leftover whey to make sourdough tortillas. With 75 vegan and vegetarian recipes for cooking with scraps, creating fermented staples, and using up all your

groceries before they go bad--including end-of-recipe notes on what to do with

your ingredients next--Bonneau lays out an attainable vision for a zero-waste kitchen.
