just wanted to ask you if you know the difference between B and ??, our stats professor gave us a multiple regression results table which is reported in apa, and it looks like this: Variable B SE ? Var 1 .090 .015 .11* Var 2 .129 .017 .35** Var 3 .080 .023 .12** Var 4 -.012 .007 -.06

Reporting Multiple Regressions in APA format - Part Two ...APA Style tables have the following basic components:

number: The table number (e.g., Table 1) appears above the table title and body in bold font. Number tables in the order in which they are mentioned in your paper.

title: The table title appears one double-spaced line below the table number. Give each table a brief but descriptive title, and capitalize the table title in italic title case.

Table Setup - APA Style APA style dictates reporting the exact p value within the text of a manuscript (unless the p value is less than .001). Finally, this resource does not address how to report effect sizes, but appropriate effect sizes (e.g., Cohen's d) should be reported with results. Please pay attention to issues of italics and spacing.

Reporting Statistics in APA Style Learn how to interpret the tables created in SPSS Output when you run a linear regression & write the results in APA Style.

Interpret Linear Regression from SPSS & Write Up Results ...The first table is an example of a four-step hierarchical regression, which involves the interaction between two continuous scores. In this example, structural (or demographic) variables are entered at Step 1 (Model 1), age (centered) is added at Step 2 (Model 2), depression (centered) is added at Step 3 (Model 3), and the interaction between the centered age and centered depression scores is added at Step 4 (Model 4).

R r nd the standardized β . Additional measures of strength ...APA doesn't say much about how to report regression results in the

text, but if you would like to report the regression in the text of your Results section, you should at least present the standardized slope (beta) along with the t-test and the corresponding significance level.

Writing up your results - APA Style guidelines

Summary: APA (American Psychological Association) style is most commonly used to cite sources within the social sciences. This resource, revised according to the 6th edition, second printing of the APA manual, offers examples for the general format of APA research papers, in-text citations, endnotes/footnotes, and the reference page. For more information, please consult the Publication Manual ...APA Tables and Figures 1 // Purdue Writing Lab

Regression Values to report: R^2 , F value (F), degrees of freedom (numerator, denominator; in parentheses separated by a comma next to F), and significance level (p), β .

How can I report regression analysis results ...Regression Table Symbols Used in an APA-Style Regression Table

There are five symbols that easily confuse students in a regression table: the unstandardized beta (B), the standard error for the unstandardized beta (SE B), the standardized beta (β), the t test statistic (t), and the probability value (p).
