This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning,

and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations. Our beliefs and our dominant thoughts create our reality. What we have thought about in the past has attracted our world of today and that which we believe and think about today will determine our future reality. This ancient law of attraction is constantly at work in our creative universe as cause and effect. Our lives are a continuous series of daily choices and the consequences of our choices should be intentional. Life is about Choices details the issues involved in making the important decisions in life. Author Ed Scott examines the relationship of human consciousness, synchronicity, and the law of attraction. A national resurgence of spirituality asks that we examine our core beliefs and values in order to awaken to a new reality. Life is
