The Fourth Industrial Revolution
Cambridge University Press
Education in Tanzania in the Era of
Globalisation Challenges and
Opportunities is a product of papers
presented at a National Education
Conference held in Dodoma, Tanzania in
November 2016 and organised by the
Aga Khan University-Institute for
Educational Development, East Africa
(AKU-IED-EA). At present, Tanzania's
development direction is guided by
Vision 2025, which aims to achieve a
high quality livelihood for its people. The
attainment of Vision 2025 will depend
largely on rapid socio-economic
development based on several social
and economic pillars including, most
importantly, education. Clearly, for
Tanzania, the scope and quality of
education remains the single most
important prerequisite to the attainment
of Vision 2025 and the 17 Sustainable
Development Goals (SDGs). The
individual chapters in this publication,
and their collective thrust, discuss the

challenges in the education system in
good faith and in the spirit of
cooperation and collaboration guided by
the belief that it is not the responsibility
of the Government alone to see how
these can be addressed. AKU IED EA has
identified this as the responsibility of all
well-meaning corporate bodies and
citizens, and initiated that conference of
its type as its contribution to that
conference, as well as the publication,
has to be seen as a model of good
practice for universities in terms of
sharing knowledge, experience, and
practice with other stakeholders who are
not in the academy, and more so, with
politicians as well as government policy
planners. The various authors of
Education in Tanzania in the Era of
Globalisation Challenges and
Opportunities discuss issues within the
context of the Tanzanian political
economy against the effects of globalization
and seek to initiate a new kind of debate
that is long overdue; a debate aimed at
charting out appropriate strategies
whose objective is to improve the quality
of education in Tanzania so that it
becomes a useful vehicle in enhancing
processes of social change,
transformation and development.
Globalization of Technology Springer
This collection re-examines and re-

assesses the role of the semi-periphery in world politics and argues that the processes of globalization have led us to widen our understanding of the semi-periphery, through a range of case studies as well as theoretical chapters.

Societal Change and Transforming Fields
Routledge

Analyzing the critical juncture of family-centered policy and practice, this book places the universal institution of the family in a global context. By including a conceptual framework as well as practice components, the authors offer an original multimodal approach toward understanding family-centered policy practice from an international perspective. It provides grassroots strategies for activists and practical guides for both students and practitioners and includes cutting-edge interpretations of the impact of globalization on families, social workers, and other helping professionals and advocates.

Global Transformations Transforming
Globalization Challenges and
Opportunities in the Post 9/11 Era

This collection focuses on the social consequences of neoliberal crises in Latin America. It includes a critical yet sympathetic analysis of ruling leftist governments in the region and discusses the larger constraints facing organized attempts to politically transform the Americas.

**GLOBALIZATION AND STATE
TRANSFORMATION IN CHINA**

Routledge

The issues native peoples face intensify with globalization. Through case studies from around the world, Hall and Fenelon demonstrate how indigenous peoples' movements can only be understood by linking highly localized processes with

larger global and historical forces. The authors show that indigenous peoples have been resisting and adapting to encounters with states for millennia. Unlike other antiglobalization activists, indigenous peoples primarily seek autonomy and the right to determine their own processes of adaptation and change, especially in relationship to their origin lands and community. The authors link their analyses to current understandings of the evolution of globalization.

Forests and Globalization Routledge

Written in a lively and accessible style, "Globalization: The Making of World Society" shows how globalization affects everyday experience, creates new institutions, and presents new challenges. With many examples, Lechner describes how the process unfolds in a wide range of fields, from sports and media to law and religion. While sketching the outlines of a world society in the making, the book also demonstrates that globalization is inherently diverse and contentious. In this concise analysis of a complex subject, Lechner presents some of the best work in the social sciences in clear and readable fashion. "Globalization: The Making of World Society" will serve as a stimulating, state-of-the-art text for any student of globalization, beginner or advanced.

Era Studies in Critical Social Science

Protesting Culture and Economics in

Western Europe Routledge

A Companion to World History presents over 30 essays from an international group of historians that both identify continuing areas of contention, disagreement, and divergence in world and global history, and point to directions for further debate. Features a diverse cast of contributors that include established world historians and emerging scholars Explores a wide range of topics and themes, including and the practice of world history, key ideas of world historians, the teaching of world history and how it has drawn upon and challenged "traditional" teaching approaches, and global approaches to writing world history Places an emphasis on non-Anglophone approaches to the topic Considers issues of both scholarship and pedagogy on a transnational, interregional, and world/global scale

Challenges and Opportunities

Routledge

As China develops its economy, the author argues it will be held back by its refusal to import democratic values.

Challenges and Opportunities

National Academies Press

Since the 1980s, globalization and neoliberalism have brought about a comprehensive restructuring of everyone's lives. People are being 'disciplined' by neoliberal economic agendas, 'transformed' by communication and information technology changes, global commodity chains and networks, and in the Global South in particular, destroyed livelihoods, debilitating impoverishment, disease pandemics, among other disastrous disruptions, are also globalization's legacy. This collection of geographical treatments of such a complex set of processes unearths the

contradictions in the impacts of globalization on peoples' lives. Globalizations Contradictions firstly introduces globalization in all its intricacy and contrariness, followed on by substantive coverage of globalization's dimensions. Other areas that are covered in depth are: globalization's macro-economic faces globalization's unruly spaces globalization's geo-political faces ecological globalization globalization's cultural challenges globalization from below fair globalization. Globalizations Contradictions is a critical examination of the continuing role of international and supra-national institutions and their involvement in the political economic management and determination of global restructuring. Deliberately, this collection raises questions, even as it offers geographical insights and thoughtful assessments of globalization's multifaceted 'faces and spaces.'

Changing Supply, Demand and Mismatches John Wiley & Sons

This report discusses six key global trends on skills supply and demand in Asia. These are (i) the doubling of the labor pool, (ii) expansion of education access, (iii) economic and industrial transformation, (iv) technological advancement, (v) globalization and regional integration, and (vi) demographic shifts. The report highlights the need for Asia's education systems to transform. It proposes four pillars on policies to address skills mismatch including (i) developing comprehensive national strategies and planning, (ii) reorienting and rebalancing education systems, (iii) prioritizing reforms in technical vocational education and training relevance and quality, and (iv) advancing international cooperation.

PUBLIC SOCIOLOGY

BRILL

This volume examines the emergence of the movement of resistance that has arisen to challenge neoliberal forms of globalization. The co-authors of this book describe how workers, environmentalists, human rights activists, and a wide variety of other groups have joined together to protest against institutions such as the WTO, the IMF, and the World Bank. Ongoing challenges facing the movement are objectively reviewed. Authors also highlight the continuing vitality of the movement in the post 9/11 period. By providing a collection of social scientific analyses, this volume significantly advances our understanding of what is probably the most important progressive movement of our time.

Interpreting Human Rights Routledge
In recent decades, human rights have come to occupy an apparently unshakable position as a key and pervasive feature of contemporary global public culture. At the same time, human rights have become a central focus of research in the social sciences, embracing distinctive analytical and empirical agendas for the study of rights. This volume gathers together original social-scientific research on human rights, and in doing so situates them in an open intellectual terrain, thereby responding to the complexity and scope of meanings, practices, and institutions associated with such rights. Chapters in the book examine diverse theoretical perspectives and examine such issues as the right to health, indigenous peoples' rights, cultural politics, the role of the United Nations, women and violence, the role of corporations and labour law. Written by leading scholars in the field

and from a range of disciplines across the social sciences, this volume combines new empirical research with both established and innovative social theory.

The Challenges of Transforming Globalization U of Minnesota Press

In the past two decades, several millions of IT-enabled services jobs have been relocated or 'offshored' from the US and Europe to, in particular, low cost economies around the world. Most of these jobs so far have landed in South and South-East Asia, with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour, and has had correspondingly wide social and economic effects. This book examines how this 'next wave in globalization' affects people and places in South and South-East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand, and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this 'second global shift', investigates service-sector driven economic development from a historical perspective, and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries. It argues that service-led development in developing countries is not easy for all the workers involved, or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services

have been located. Based on cutting edge empirical research and original data, the volume offers a state-of-the-art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio-economic development and contemporary transformations in South and South-East Asia.

Women, Work, and Globalization

Springer

In this far-reaching work, Swen Hutter demonstrates the usefulness of studying both electoral politics and protest politics to better understand the impacts of globalization. Hutter integrates research on cleavage politics and populist parties in Western Europe with research on social movements. He shows how major new cleavages restructured protest politics over a thirty-year period, from the 1970s through the 1990s. This major study brings back the concept of cleavages to social movement studies and connects the field with contemporary research on populism, electoral behavior, and party politics. Hutter's work extends the landmark 1995 *New Social Movements in Western Europe*, the book that spurred the recognition that a broad empirical frame is valuable for understanding powerful social movements. This new book shows that it is also beneficial to include the study of political parties and protest politics. While making extensive use of public opinion, protest event, and election campaigning data, Hutter skillfully employs contemporary data from six West European societies—Austria, Britain, France, Germany, the Netherlands, and Switzerland—to account for responses to protest events and political issues across countries. *Protesting Culture and*

Economics in Western Europe makes productive empirical, methodological, and theoretical contributions to the study of social movements and comparative politics. Empirically, it employs a new approach, along with new data, to explain changes in European politics over several decades. Methodologically, it makes rigorous yet creative use of diverse datasets in innovative ways, particularly across national borders. And theoretically, it makes a strong claim for considering the distinctive politics of protest across various issue domains as it investigates the asymmetrical politics of protest from left and right.

Challenges and Opportunities for Sustainable Development

Currency In today's shifting global economy and the emergence of technology and service-oriented knowledge organization, requiring enhanced levels of organizational flexibility and innovation, how do we maximize the human capital potential of workers to enhance their ability to perform and add value in a hyper-intensive competitive global marketplace? What are the methods and strategies for effectively motivating employees and increasing the job satisfaction of workers? What are the important drivers of worker satisfaction? What are the important individual, organizational, and social outcomes of various job satisfaction levels? What are the individual, organizational, and societal differences in job satisfaction levels and its determinants? These are just some of the pressing questions facing the organizations of today which this volume discusses.

Transforming Curriculum for Quality Education and Globalization Challenges
Routledge

There is increasing academic interest in how Pierre Bourdieu's sociology can be applied to management and organization studies (MOS). In a context of increasing complexity faced by organizations and those who work in them due to globalization, neoliberalism, austerity, financial crisis, ecological issues, populism and developing technologies, there is untapped potential to use Bourdieu's theoretical inventions to arrive at greater understandings of how change, transition and crisis shape work, organizational life as well as relations between different organizational and sectorial fields. This book aims to take a specific focus on the relational nature of Bourdieu's work and its relevance for contemporary organizations. It provides empirically-grounded examples that showcase the explanatory strength of Bourdieu's intellectual concepts, such as field, habitus, capital, hexis, hysteresis, symbolic power, symbolic violence, doxa, illusio as applied to the current challenges within MOS. Such challenges include issues resulting from globalization, neoliberalism, financial crisis, ecological crisis, populism and developing technologies, to name but a few; and added to those, a global pandemic. The twelve chapters presented in this book study a great variety and range of organizational phenomena that are organized into three thematic sections: 'Neoliberalism, fields and hysteresis', 'Global and national movements as sites for competition and symbolic domination' and the 'The emergence and transformation of professional fields'. The chapters show a concern with the challenges and opportunities such developments offer to MOS scholars and to managers and employees in public and private sector

organizations. It will be of interest to researchers, academics and students in the fields of organizational studies, critical management studies, human resource management and sociology. Challenges and Opportunities Routledge Globalization--the interconnection of the world culturally, socially, politically, and economically--has generated intense theoretical and practical concerns. Is globalization inevitable? What are the effects of globalization on social structures and individual perceptions? What is the effect of globalization on societal level inequality? America Transformed: Globalization, Inequality, and Power examines these questions by analyzing the links among global processes and shifting patterns of stratification, inequality, and social mobility in the United States. While many texts separate discussions of macro- and micro-level processes when examining globalization, this book skillfully integrates general macro-level processes with specific reference to the micro-level effects of globalization in the U.S. Exploring the critical dimensions of inequality--class, gender, and immigration--America Transformed situates the U.S. experience within the broader global context, and fleshes out the mechanism through which global processes affect social stratification. By examining the social construction of globalization, the authors identify the key policy challenges of globalization, and some of the innovative community-based responses to social inequality. America Transformed provides powerful insights into the contested dialectical relationship between global and local forces: how globalization shapes stratification and inequality in the U.S., and how local communities attempt to mediate those changes.

Risks and Opportunities Edward Elgar Publishing

In this volume, contributors from academia, industry, and policy explore the inter-connections among economic development, socio-political democracy and defense and security in the context of a profound transformation, spurred by globalization and supported by the rapid development of information and communication technologies (ICT). This powerful combination of forces is changing the way we live and redefining the way companies conduct business and national governments pursue strategies of innovation, economic growth and diplomacy. Integrating theoretical frameworks, empirical research and case studies, the editors and contributors have organized the chapters into three major sections, focusing on cyber-development, cyber-democracy and cyber-defense. The authors define cyber-development as a set of tools, methodologies and practices that leverage ICT to catalyze and accelerate social, political and economic development, with an emphasis on

making the transition to knowledge-based economies. One underlying understanding here is that knowledge, knowledge creation, knowledge production and knowledge application (innovation) behave as crucial drivers for enhancing democracy, society, and the economy. By promoting dissemination and sharing of knowledge, cyber-democracy allows a knowledge conversion of the local into the global (gloCal) and vice versa, resulting in a gloCal platform for communication and knowledge interaction and knowledge enhancement. Meanwhile, technology-enabled interconnectivity increases the need to adopt new methods and actions for protection against existing threats and possible challenges to emerge in the future. The final section contemplates themes of cyber-defense and security, as well as emerging theories and values, legal aspects and trans-continental links (NATO, international organizations and bilateral relations between states). Collectively, the authors present a unique collection of insights and perspectives on the challenges and opportunities inspired by connectivity.
