At the beginning of

World War II, the
United States and
Mexico launched the
bracero program, a
series of labor
agreements that
brought Mexican men
to work temporarily in
U.S. agricultural fields.
In Braceros, Deborah
Cohen asks why these
migrants provoked so
much concern and
anxiety in the United
States and what the
Mexican government
expected to gain in
participating in the
program. Cohen
creatively links the
often-unconnected
themes of exploitation,
development, the rise
of consumer cultures,
and gendered class
and race formation to
show why those with

connections beyond the nation have historically provoked suspicion, anxiety, and retaliatory political policies.

Colonial Migrants at the Heart of Empire is the first in-depth look at the experiences of Puerto Rican migrant workers in continental U.S. agriculture in the twentieth century. The Farm Labor Program, established by the government of Puerto Rico in 1947, placed hundreds of thousands of migrant workers on U.S. farms and fostered the emergence of many stateside Puerto Rican communities. Ismael García-Colón investigates the origins and development of

this program and uncovers the unique challenges faced by its participants. A labor history and an ethnography, Colonial Migrants evokes the violence, fieldwork, food, lodging, surveillance, and coercion that these workers experienced on farms and conveys their hopes and struggles to overcome poverty. Island farmworkers encountered a unique form of prejudice and racism arising from their dual status as both U.S. citizens and as “foreign others,” and their experiences were further shaped by evolving immigration policies. Despite these challenges, many Puerto Rican farmworkers ultimately chose to settle in rural U.S. communities,

contributing to the production of food and the Latinization of the U.S. farm labor force.

How a small family company in the Finger Lakes became one of the most important wine producers in the United States, only to be taken down by corporate greed and mismanagement. In 1880, Walter Stephen Taylor, a cooper's son, started a commercial grape juice company in New York's Finger Lakes region. Two years later, wine production was added, and by the 1920s, the Taylor Wine Company was firmly established.

Walter Taylor's three sons carefully guided the company through Prohibition and beyond, making it the most important winery in the Northeast and profoundly affecting the people and community of Hammondsport, where the company was headquartered. In the 1960s, the Taylor family took the company public. Ranked sixth in domestic wine production and ripe for corporate takeover, the company was sold to Coca-Cola in 1977. Three more changes of corporate ownership followed until, in 1995, this once-dynamic and important wine producer was obliterated, tearing apart the local economy and changing a way of life that had

lasted for nearly a century. Drawing on archival research as well as interviews with many of the principal players, Thomas Pellechia skillfully traces the economic dynamism of the Finger Lakes wine region, the passion and ingenuity of the Taylor family, and the shortsighted corporate takeover scenario that took down a once-proud American family company. In addition to providing important lessons for business innovators, *Over a Barrel* is a cautionary tale for a wine region that is repeating its formative history. "Over a Barrel offers various cautionary lessons that can be applied to all too many businesses. The Taylor paterfamilias began making wine from

grapes in the Finger Lakes region, and his three sons improved it. But when the world of wine consumption changed, the Taylors didn't, and they eventually sold out. Subsequent corporate owners gradually destroyed the wine and the farmers who grew the grapes. Only the black sheep grandson stayed true to the family code, ranting from his perch on Bully Hill." — Mark Pendergrast, author of *For God, Country, and Coca-Cola: The Definitive History of the Great American Soft Drink and the Company That Makes It*, Third Edition, Revised and Expanded Over a Barrel UNC Press Books

In 1975 there were 125 wineries in eastern North America. By

2013 there were more than 2,400. How and why the eastern United States and Canada became a major wine region of the world is the subject of this history. Unlike winemakers in California with its Mediterranean climate, the pioneers who founded the industry after Prohibition—1933 in the United States and 1927 in Ontario—had to overcome natural obstacles such as subzero cold in winter and high humidity in the summer that favored diseases devastating to grapevines. Enologists and viticulturists at Eastern research stations began to find grapevine varieties that could survive in the East and make world-class wines.

These pioneers were followed by an increasing number of dedicated growers and winemakers who fought in each of their states to get laws dating back to Prohibition changed so that an industry could begin. Hudson Cattell, a leading authority on the wines of the East, in this book presents a comprehensive history of the growth of the industry from Prohibition to today. He draws on extensive archival research and his more than thirty-five years as a wine journalist specializing in the grape and wine industry of the wines of eastern North America. The second section of the book adds detail to the history in the form of multiple appendixes that can be referred to time and again.

Included here is information on the origin of grapes used for wine in the East, the crosses used in developing the French hybrids and other varieties, how the grapes were named, and the types of wines made in the East and when. Cattell also provides a state-by-state history of the earliest wineries that led the way.
