This poetry book is Prosaic.

Sustainable Horticulture CRC Press

This book presents the latest
developments in medicine and biology.
Chapters include research on trends in the

birth prevalence of boys with isolated
hypospadias and undescended testis in
Hungary during the last 50 years;
alleviating premenstrual syndrome (PMS)
symptoms using a natural factor;
neutralization-enhancing RF antibodies;
advances in the diagnosis, assessment,
management and outcome of Takayasu's
arteritis; macronutrients and premenstrual
syndrome; pressurized intraperitoneal
aerosol chemotherapy (PIPAC); the control
of MAO expression; and what we know
about IMAO.

Starting a business successfully requires
numerous skills and resources. The
alarming rate of failures associated with
new ventures suggests that potential
entrepreneurs would welcome expert
advice at the most vital stage in the life of
any business. The expert author team
focus on those resources, skills,
capabilities and learning required by any
entrepreneur in the process of starting a

new business. Specifically, this text aims to: Introduce and explain those resources (including finance) that are essential to successful business creation Identify the key skills and capabilities that are required by entrepreneurs Highlight the ways in which new resources are combined with the entrepreneur's existing resource base to develop the business effectively Explore the way entrepreneurs learn in the process of developing their business Drawing on the most up-to-date and most relevant research, this concise textbook provides students and academics of entrepreneurship with a practical guide to acquiring the appropriate resources in order to start a new firm.

Biomethane through resource circularity: Research, Technology and Practices is an invaluable resource for researchers, policy makers, implementers and PhD and Masters level students in universities analyzing the present status, waste biomass including agro wastes, success in

experimentation & commercial production, future needs and other relevant areas. While huge biomass is wasted by open burning, there is potential of energy generation that can be extracted from the biomass preventing GHG emission and creating business opportunities.

Abundance and renewable bioenergy can contribute to a more secure, sustainable, and economically sound future through biomethanation process by selecting followings: Supply chain sustainability of clean energy sources Appropriate Anaerobic Digestion technology with different feedstock Processes Parameter Optimization and best fit conditions, Productivity, Purification of biogas and end use Economic feasibility as business case, Commercialization, generating employment and Revitalizing rural economies This book addresses most of the above issues in lucid manner by experts in the field from different countries which are helpful for the related stakeholders edited by experts in the field.

CEASEFIRE CITY

Elsevier

This book sets out to critical review and

evaluate developments that have taken place in higher agricultural education in India in the last four decades (1970-2010) in the context of its role and importance in country's performance in the agricultural sector. The book summarizes historical developments, discusses the rise and fall of the higher education system, and suggests future directions to meet the challenges of the 21st century in the globalized world.

The National Seminar on Alternative Extension Approaches in Technology Transfer held at Mitraniketan KVK on 21-22, February 2004 was one of the most successful scientific deliberations in the recent past. Most of the successful alternative extension approaches in technology transfer were presented and highlighted. There was a tremendous response from various R & D institutions to present their approaches for sharing at a common platform without any prejudice. The business of technology transfer is the secret of success to every R & D institutions, but this was a platform envisaged to share experiences. We take

the opportunity to thank the entire authors for the contribution of their articles to this book.

JOURNEY TOWARDS EXCELLENCE

Psychology Press

Louise Haselton offers glimpses of the curious inner lives of everyday and overlooked things. From the domestic to the exotic, the natural to the 'made', she distinctively intuits connections between seemingly disparate material vernaculars. Haselton believes in the invisible forces that bind and repel the world around us. With a witty reverence for the objects and materials she engages with, Haselton explores the communicative possibilities of weight, balance and form within her predominantly sculptural works. Her practice is unexpected, unconventional, and exemplary of an artist especially attuned to the matters which surround us. Louise Haselton: Act natural is a compendium of Haselton's works to date including illustrated essays chronicling the inspirations, influences and ideas behind her extraordinary practice of the last twenty-five years.

Bees provide a critical link in the maintenance of ecosystems, pollination. They play a major role in maintaining biodiversity, ensuring the survival of many plants, enhancing forest regeneration, providing sustainability and adaptation to climate change and improving the quality and quantity of agricultural production systems. In fact, close to 75 percent of the world's crops that produce fruits and seeds for human consumption depend, at least in part, on pollinators for sustained production, yield and quality. Beekeeping, also called apiculture, refers to all activities concerned with the practical management of social bee species. These guidelines aim to provide useful information and suggestions for a sustainable management of bees around the world, which can then be applied to project development and implementation. *Political Developments in Afghanistan* Discovery Publishing House

Proceedings of the First International Conference on Recent Advances in Bioenergy Research Wakefield Press

This contributed volume aims to provide latest updates in the area of bioenergy including biodiesel, bioethanol, biomethanation, biomass gasification, and biomass cook-stove. The proceedings of ICRA BR 2015 include cutting edge research vital to R&D organizations, academics, and the industry to promote and document the recent developments in the area of bioenergy for all types of stakeholders. The volume highlights the needs of biofuels and their market, the barriers and challenges faced by biofuels and bioenergy and future strategies required to foster new ideas for research, collaboration and commercialization of bioenergy. The major themes of this contributed volume are: Biomass and Energy Management ;Thermochemical Conversion Processes; Biochemical Conversion Processes; Catalytic Conversion Processes; Electrochemical Processes; Waste Treatment to Harvest Energy; and Integrated Processes. The contents of the volume will appeal to students, researchers, professionals, and policymakers in the field of biofuels and bioenergy.

Economics and Sustainability Springer

What counts as 'indigenous religion' in today's world? Who claims this category? What are the processes through which local entities become recognisable as 'religious' and 'indigenous'? How is all of this connected to struggles for power, rights and sovereignty? This book sheds light on the contemporary lives of indigenous religion(s), through case studies from Sápmi, Nagaland, Talamanca, Hawai`i, and Gujarat, and through a shared focus on translations, performances, mediation and sovereignty. It builds on long term case-studies and on the collaborative comparison of a long-term project, including shared fieldwork. At the center of its concerns are translations between a globalising discourse (indigenous religion in the singular) and distinct local traditions (indigenous religions in the plural). With contributions from leading scholars in the field, this book is a must read for students and researchers in indigenous religions, including those in related fields such as religious studies and social anthropology. *The National Union Catalogs, 1963-* IGI Global
Hill Agriculture: Economics and

Sustainability for creating more awareness regarding hill agriculture in India. This book contains articles contributed by different authors from all over India including North Eastern Hill Region. The book tries to cover all aspects of hill agriculture related to economics of different enterprises, marketing and sustainability. The broad theme of book is divided into following sub-themes: Performance of Hill Agriculture in India/Public/Private Support for hill Agriculture/Organic farming in Hills: Status, Scope and Economics/Horticulture in Hills: Status, Scope and Economics/Agricultural Marketing in hills: Status, Marketed Surplus, Producers' share, Interventions etc./Status of Land Reforms and Agricultural holdings/Agricultural Credit and Insurance/Using ICT in Hill Agriculture/Facing the Challenges of WTO in Hill Agriculture/Sustainability Issues in Hill Agriculture

Social psychology and politics are intricately related, and understanding how humans manage power and govern themselves is one of the key issues in

psychology. This volume surveys the latest theoretical and empirical work on the social psychology of politics, featuring cutting-edge research from a stellar group of international researchers. It is organized into four main sections that deal with political attitudes and values; political communication and perceptions; social cognitive processes in political decisions; and the politics of intergroup behavior and social identity. The contributions address such exciting questions as how do political attitudes and values develop and change? What role do emotions and moral values play in political behavior? How do political messages and the media influence political perceptions? What are the psychological requirements of effective democratic decision making, and why do democracies sometimes fail? How can intergroup harmony be developed, and what is the role of social identity in political processes? As such, this volume integrates the role of cognitive, affective, social and cultural influences on political perception and behavior, offering an overview of the psychological mechanisms underlying political processes. It provides essential reading for teachers, students,

researchers and practitioners in areas related to power, social influence and political behavior.

A Patterned Life Food & Agriculture Org. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. David Bebbington--one of the most influential historians working today--is widely acknowledged as a world authority on religious history. He is also recognized for having devised the Bebbington Quadrilateral as the standard definition of evangelicalism, one of the most important global religious movements of the twenty-first century. In this lively study, Eileen Bebbington--who first met her husband as an undergraduate at the University of Cambridge over forty years ago--paints a vivid portrait of the life and thought of this leading scholar. Many who know Professor

Bebbington's most celebrated books, such as *Evangelicalism in Modern Britain*, *Patterns in History*, *The Mind of Gladstone*, and *Victorian Religious Revivals*, will be delighted to learn that his first such effort was actually *A History of the Ancient World with Which Is Incorporated Classical Mythology*, a duly footnoted, four-volume work written at the age of nine! *A Patterned Life* is much more than an account of the intellectual development of a preeminent historian; it is a study of a life lived as a disciple of Jesus Christ--a human and often humorous account of eccentricities, an honest acknowledgment of trials, and an inspiring witness to one person's efforts to integrate a deep, earnest Christian faith with the best of modern thought.

Automotive Mechatronics Louise HaseltonAct natural
For a city in India's northeast that has been embroiled in the everyday militarization and violence of Asia's longest-running separatist conflict, Dimapur remains 'off the map'. With no 'glorious' past or arenas where events of consequence to mainstream India have taken place, Dimapur's essence is

experienced in oral histories of events, visual archives of the everyday life, lived reality of military occupation, and anxieties produced in making urban space out of tribal space. Ceasefire City aims to capture the dynamics of Dimapur by bringing together the fragmented sensibilities granted and contested in

particular spaces in the city and the embodied experiences of the city by its residents. The first part of the book talks about military presence, capitalist growth, and urban expansion in Dimapur through an analysis of its spatial politics, and the second part, through collaborative

ethnographic exercises, focuses on the relationship between the lived realities and the meanings that are forged around the city.
