congruent to 1. 2. Name all angles
congruent to 2. 3. Name three pairs of
angles with sums of 180° . Possible
answer: 1 8, 2 The acute angles are all
congruent. 7, 3 60 6, or 4 5 4 6 8 LESSON
Practice A Parallel and Perpendicular
Lines 2 3-5 Practice (continued) Form G
Parallel Lines and Triangles Sample: The
sum of the interior angles of a triangle is
180, so $m\angle 2 + m\angle 3 + m\angle 5 = 180$. Because $\ell 1$
and $\ell 2$, $\ell 3$ and $\ell 4$, $\ell 5$ and $\ell 6$ are linear
pairs, the sum of the measures of each

pair is 180. So, $m\angle 1 + m\angle 2 + m\angle 3 + m\angle 4 + m\angle 5 + m\angle 6 = 540$. Using the Substitution
Property of Equality, $m\angle 1 + \dots$ Parallel

Practice C 7-2 Parallel and Perpendicular Lines LESSON In the figure, line a is parallel to line b . 1. Name all angles congruent to $\angle 1$. 2. Name all angles congruent to $\angle 2$. 3. Name three pairs of supplementary angles. Possible answer: $\angle 1, \angle 8$; $\angle 2, \angle 7$; $\angle 3, \angle 6$; or $\angle 4, \angle 5$; $\angle 4, \angle 6$; $\angle 5, \angle 7$; $\angle 7, \angle 2$; $\angle 8, \angle 3$; $\angle 4, \angle 6$; a, c ; b, d .

LESSON Practice B 7-2 Parallel and Perpendicular Lines

Use your knowledge about the slopes of parallel and perpendicular lines to solve some problems. For example, what's the equation of the line perpendicular to $y = 3x - 3$ and passes through the point $(-8, -2)$.

2 3-5 Practice (continued) Form G Parallel Lines and Triangles Sample: The sum of the interior angles of a triangle is 180° , so $m\angle 2 + m\angle 3 + m\angle 5 = 180^\circ$. Because l_1 and l_2 , l_3 and l_4 , l_5 and l_6 are linear pairs, the sum of the measures of each pair is 180° . So, $m\angle 1 + m\angle 2 = 180^\circ$; $m\angle 3 + m\angle 4 = 180^\circ$; $m\angle 5 + m\angle 6 = 180^\circ$. Using the Substitution Property of Equality, $m\angle 1 + m\angle 3 + m\angle 5 = 180^\circ + 180^\circ + 180^\circ = 540^\circ$. Using the Substitution Property of Equality, $m\angle 1 + m\angle 3 + m\angle 5 = 540^\circ$.
