In *A Bigger Picture*, the bestselling political memoir of 2020, Malcolm Turnbull, Australia's 29th prime minister, tells the remarkable story of his life. Now in paperback, this edition is updated with an all-new foreword by the author that sheds light on the huge political and cultural changes happening today. When Malcolm Turnbull took over the nation's top job there was a sense of excitement in Australia. Sky-high opinion polls followed as the political outsider with a successful business, legal and media career took charge. The infighting that had dogged politics for the best part of a decade looked to be over. But a right-wing insurgency brutally cut down Turnbull's time in office after three years, leaving many Australians asking, 'Why?' Exceptionally candid and compelling, *A Bigger Picture* is the definitive narrative of Malcolm Turnbull's prime ministership. He describes how he legalised same-sex marriage, established Snowy Hydro 2.0, stood up to Donald Trump, and many more achievements - remarkable in their pace and significance, and delivered in the teeth of so

much opposition. But it's far more than just politics. Turnbull's life has been filled with colourful characters and controversies, success and failure. From his early years in Sydney, growing up with a single father, to defending 'Spycatcher' Peter Wright against the UK government; the years representing Kerry Packer, leading the Republican Movement and making millions in business; and finally toppling Tony Abbott to become prime minister of Australia. For the first time he tells it all - in his own words. With revelatory insights on the workings of Canberra and the contentious events of Turnbull's life, *A Bigger Picture* explores the strengths and vulnerabilities of one of Australia's best-known and most dynamic business and political leaders. Lyrically written in highly readable and entertaining prose, this is a genuine page-turner that's not just for political junkies.

Media Design and Technology for Live Entertainment is a guide to understanding the concepts and equipment used in projection and video design for live performances. After an introduction in the principles of design elements as well as information on content, this book focuses on how content is used and

transmitted by describing the essential components of systems, providing definitions used in communicating video concepts, and including basic system troubleshooting tips and tricks. A brief history of projected imagery is included, as well as information on analog systems, as outdated technology continues to be used either by choice of the designer or by necessity due to budget. By providing the information to understand the tools and how to use them, the reader should be able to create their own systems to meet his or her design ideas.

A look at Hanoi and Saigon as they are today describes the effects of the Vietnam War on the two cities and their inhabitants *With new foreword* Hardie Grant Publishing
Judy Nunn's exciting new novel, a no.1 bestseller, is inspired by a true wartime story that has remained a well-kept secret for over seventy years. It seems to have happened overnight, Val thought . How extraordinary. We've become a khaki town. It's March 1942. Singapore has fallen. Darwin has been bombed. Australia is on the brink of being invaded by the Imperial Japanese Forces. And Val Callahan, publican of The Brown's Bar in Townsville, could not be happier as she contemplates the fortune she's making from lonely, thirsty soldiers. Overnight the small Queensland city is transformed into the transport hub for 70,000 American and Australian soldiers destined for combat in the South Pacific. Barbed wire and gun emplacements cover the

beaches. Historic buildings are commandeered. And the dance halls are in full swing with jazz, jitterbug and jive. The Australian troops begrudge the confident, well-fed 'Yanks' who have taken over their town and their women. There's growing conflict, too, within the American ranks, because black GIs are enjoying the absence of segregation. And the white GIs don't like it. As racial violence explodes through the ranks of the military, a young United States Congressman, Lyndon Baines Johnson, is sent to Townsville by his president to investigate. 'Keep a goddamned lid on it, Lyndon,' he is told, 'lest it explode in our faces ...'

Hacking into Heaven explains how many stories and images from the Bible are encrypted references to the mushroom, *Amanita muscaria* - the real God of the Bible. Pem Das demonstrates how

Biblical scribes used ironic schemes to convey a dual message; a literal message taken at face value by the slave class, and a deeper message implied in the story understood by the elite class; and how this linguistic model replaced the chains of slavery with written words. According to Dangwillo the Tree of Knowledge of Good and Evil, the original Ten Commandments, Noah's Ark, and Jesus are representations of the mushroom; and the ecstasy it provides. "Written language is a technology, and I wanted to show how it's used to control human behavior. When I started this book it was about linguistics and rhetoric, but now that I am finished it's about biology and neurology. Psilocybin mushrooms have been proven to stimulate neurogenesis in the hippocampus, that's the creation of new neurons in the place in your brain responsible for language, location, and memory," said Das. "And the same thing happens when a child is born through natural child birth. Kind of gives new meaning to being a Born Again Christian. This is science. This is an idea whose time has come." *Hacking into Heaven* is a short book that covers the Old Testament, Gnostic texts, and the New Testament. Included are chapters covering Mycology, or the biology of mushrooms; a short essay Language, Religion, and Slavery, which offers a model of how written language is used to subjugate the human mind; *Spelunking into Plato's Cave*, offers an explanation of Plato's allegory of the cave; and, *A Neuro-linguistic Model for Amanita Ecstasy*; offers an explanation of how mushroom ecstasy affects linguistic patterns in the brain.
