**The Jungle Book Illustrated** Harriman House Limited  
Wall Street Journal bestseller "A welcome revelation." --The Financial Times Award-

winning Wharton Professor and Choiceology podcast host Katy Milkman has devoted her career to the study of behavior change. In this ground-breaking book, Milkman reveals a proven path that can take you from where you are to where you want to be, with a foreword from psychologist Angela Duckworth, the best-selling author of Grit. Change comes most readily when you understand what's standing between you and success and tailor your solution to that roadblock. If you want to work out more but find exercise difficult and boring, downloading a goal-setting app probably won't help. But what if, instead, you transformed your workouts so they became a source of pleasure instead of a chore? Turning an uphill battle into a downhill one is the key to success. Drawing on Milkman's original research and the work of her world-

renowned scientific collaborators, How to Change shares strategic methods for identifying and overcoming common barriers to change, such as impulsivity, procrastination, and forgetfulness. Through case studies and engaging stories, you'll learn: • Why timing can be everything when it comes to making a change • How to turn temptation and inertia into assets • That giving advice, even if it's about something you're struggling with, can help you achieve more Whether you're a manager, coach, or teacher aiming to help others change for the better or are struggling to kick-start change yourself, How to Change offers an invaluable, science-based blueprint for achieving your goals, once and for all. *Modern Manners for Moms & Dads* EduGorilla Community Pvt. Wouldn't it be great if your child could exercise, have fun, and build concentration skills all at the same time? In 2006, the Little Flower Yoga program was developed by teacher and certified yoga instructor Jennifer Cohen Harper, when her successful use of yoga in her kindergarten classroom led to requests by other students, teachers, and administrators for yoga programs of their own. Harper slowly began to teach more and more yoga classes, and eventually recruited other yoga teachers with education backgrounds to continue growing what had become a flourishing program. Little Flower Yoga for Kids offers this fun and unique program combining yoga and mindfulness in an easy-to-read format. Written specifically for parents and kids, the book aims at teaching children to pay attention, increase focus, and balance their emotions—all while building physical strength and flexibility. Based on a growing body of evidence that yoga and mindfulness practices can help children develop focus and concentration, the simple yoga exercises in this book can easily be integrated into their child's daily routine, ultimately improving health, behavior, and even school achievement.

The book details the five main components of the program: connect, breath, move, focus, and relax. Drawing on these components, Harper shares practical activities that parents can use with their children both on a daily basis and as applied to particularly challenging issues. And while this book is targeted to parents, teachers may also find it extremely useful in helping students achieve better attention and focus. For more information about this innovative program, visit [www.littlefloweryoga.com](http://www.littlefloweryoga.com).

### SHADES OF LIFE

Octagon Press Ltd

From one of the freshest new voices in clean and wholesome romantic fiction, *The Holiday Plan* is the perfect escape for fans of Debbie Macomber, Annie Rains, and Debbie Mason. Native New Yorker and author Verona Scott is battling heartbreak, both personally and professionally. Coming off a disastrous split with her ex, she's struggling for inspiration to write her next book. And she's lost without her favorite Aunt Theoni's wisdom and guidance. Hoping for a fresh start and to avoid the holiday completely, she's planned a Valentine's detox: a luxurious trip alone to the historic Courtington Castle hotel, near the adorably quaint town of Camelot Creek, tucked into a picturesque valley in the Adirondacks. But escaping the heart-shaped balloons and red roses isn't as easy as she thought. This won't be the restful retreat she'd imagined. Instead, she's just walked into one of the biggest matchmaking events of the year. Not to mention, the incredibly attractive single dad and dating coach Troy Turner is heading the whole thing up, and he's on a mission to include Verona in the festivities. Troy is in the midst of a professional crisis of his own. After a bit of unfounded bad press, the very last thing he needs is a guest to cast doubt in the minds of his attendees. Will Troy change Verona's mind about the most romantic

day of the year? Just when sparks begin to fly, an unexpected visitor checks into the castle, stirring up the past. No matter what, for Verona, Valentine's Day is the day where everything changes. A heartwarming, sweet romance that will whisk you away to a magical winter wonderland, and have you reaching for the hot cocoa and box of chocolates long after the holidays.

On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture

on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

The field of political science has not given sufficient attention to pedagogy. This book outlines why this is a problem and promotes a more reflective and self-critical form of political science pedagogy. To this end, the author examines innovative work on radical pedagogy such as critical race theory and feminist theory as well as more traditional perspectives on political science pedagogy. Bridging the divide between this research and scholarship on both teaching and learning opens the prospect of a critical, radical and utopian form of political science pedagogy. With chapters on Socrates, Frantz Fanon, Paulo Freire, Leo Strauss, Sheldon S. Wolin, e-learning, and a prison field trip, this book outlines a new path for political science pedagogy.
