The dynamic environment of investment banks, hedge funds, and private equity firms comes to life in David Stowell's introduction to the ways they challenge and sustain each other. Capturing their reshaped business plans in the wake of the 2007-2009

global meltdown, his book reveals their key functions, compensation systems, unique roles in wealth creation and risk management, and epic battles for investor funds and corporate influence. Its combination of perspectives—drawn from his industry and academic backgrounds—delivers insights that illuminate the post-2009 reinvention and acclimation processes. Through a broad view of the ways these financial institutions affect corporations, governments, and individuals, Professor Stowell shows us how and why they will continue to project their power and influence. Emphasizes the needs for capital, sources of capital, and

the process of getting capital to those who need it. Integrates into the chapters ten cases about recent transactions, along with case notes and questions Accompanies cases with spreadsheets for readers to create their own analytical frameworks and consider choices and opportunities.

This kaleidoscopic collection reflects on the multifaceted world of classical music as it advances through the twenty-first century. With insights drawn from leading composers, performers, academics, journalists, and arts administrators, special focus is placed on

classical music's defining traditions, challenges and contemporary scope. Innovative in structure and approach, the volume comprises two parts. The first provides detailed analyses of issues central to classical music in the present day, including diversity, governance, the identity and perception of classical music, and the challenges facing the achievement of financial stability in non-profit arts organizations. The second part offers case studies, from Miami to Seoul, of the innovative ways in which some arts organizations have responded to the challenges analyzed in the first part. Introductory material, as well as several of

the essays, provide some preliminary thoughts about the impact of the crisis year 2020 on the world of classical music.

Classical Music: Contemporary Perspectives and Challenges will be a valuable and engaging resource for all readers interested in the development of the arts and classical music, especially academics, arts administrators and organizers, and classical music practitioners and audiences.

Taking a rights-based approach, this comprehensive study develops a conceptual framework and a definitive set of holistic indicators for monitoring the well-being of children in South Africa. Taking cues from the child-rights focus of the

South African constitution, it is made clear that it is not just the state of the children that is important to measure, but also the contexts within which the children grow and develop. Providing practical tools for policy makers to assess the effectiveness of child-based policies and interventions, this practical work addresses a wide range of domains—child poverty, HIV and AIDS, education, mental health and disability, abuse and neglect, the justice system, and children affected by the worst forms of labor.

Infant/child Mental Health, Early Intervention, and

Relationship-based Therapies Routledge Communications and personal information that are posted online are usually accessible to a vast number of people. Yet when personal data exist online, they may be searched, reproduced and mined by advertisers, merchants, service providers or even stalkers. Many users know what may happen to their information, while at the same time they act as though their data are private or intimate. They expect their privacy will not be infringed while they willingly share personal information with the world via social network sites, blogs, and in online communities. The chapters collected by

Trepte and Reinecke address questions arising from this disparity that has often been referred to as the privacy paradox. Works by renowned researchers from various disciplines including psychology, communication, sociology, and information science, offer new theoretical models on the functioning of online intimacy and public accessibility, and propose novel ideas on the how and why of online privacy. The contributing authors offer intriguing solutions for some of the most pressing issues and problems in the field of online privacy. They investigate how users abandon privacy to enhance social capital and to generate

different kinds of benefits. They argue that trust and authenticity characterize the uses of social network sites. They explore how privacy needs affect users' virtual identities. Ethical issues of privacy online are discussed as well as its gratifications and users' concerns. The contributors of this volume focus on the privacy needs and behaviors of a variety of different groups of social media users such as young adults, older users, and genders. They also examine privacy in the context of particular online services such as social network sites, mobile internet access, online journalism, blogs, and micro-blogs. In sum, this book offers researchers and

students working on issues related to internet communication not only a thorough and up-to-date treatment of online privacy and the social web. It also presents a glimpse of the future by exploring emergent issues concerning new technological applications and by suggesting theory-based research agendas that can guide inquiry beyond the current forms of social technologies.

Completely revised for its Second Edition, this text is geared to residents and fellows training in child and adolescent psychiatry and those preparing for board examinations in both general and child psychiatry. The book covers common

neurologic disorders seen in the pediatric population, their presentation, including psychiatric symptoms, and their workup, diagnosis, and treatment. Coverage includes psychiatric comorbidities in pediatric neurologic disorders and psychiatric side effects of medications used to treat pediatric neurologic disorders. Case presentations demonstrate the diagnostic approach to patients in pediatric neurology and on the interface of pediatric neurology and psychiatry. Practice questions offer excellent review for board certification and recertification examinations. A glossary is also included.

Roscoe Pound, former
dean of Harvard Law
School, delivered a
series of lectures at the
University of Calcutta
in 1948. In these
lectures, he criticized
virtually every modern
mode of interpreting
the law because he
believed the
administration of
justice had lost its
grounding and
recourse to enduring
ideals. Now published
in the U.S. for the first
time, Pound's lectures
are collected in Liberty
Fund's *The Ideal
Element in Law*,
Pound's most
important contribution

to the relationship
between law and
liberty. *The Ideal
Element in Law* was a
radical book for its
time and is just as
meaningful today as
when Pound's lectures
were first delivered.
Pound's view of the
welfare state as a
means of expanding
government power
over the individual
speaks to the front-
page issues of the new
millennium as clearly
as it did to America in
the mid-twentieth
century. Pound argues
that the theme of
justice grounded in
enduring ideals is
critical for America. He
views American courts
as relying on
sociological theories,
political ends, or other
objectives, and in so
doing, divorcing the
practice of law from
the rule of law and the

rule of law from the enduring ideal of law itself. Roscoe Pound is universally recognized as one of the most important legal minds of the early twentieth century. Considered by many to be the dean of American jurisprudence, Pound

was a former Justice of the Supreme Court of Nebraska and served as dean of Harvard Law School from 1916 to 1936. Please note: This title is available as an ebook for purchase on Amazon, Barnes and Noble, and iTunes.
