Herpes simplex virus 1 and 2 (HSV-1 and HSV-2), also known by their taxonomical names Human alphaherpesvirus 1 and Human alphaherpesvirus 2, are two members of the human Herpesviridae family, a set of viruses that produce viral infections in the majority of humans. Both HSV-1 (which produces most cold sores) and HSV-2 (which produces most genital herpes) are common and contagious. They can be spread when an infected person begins shedding the virus. About 67% of the world population under the age of 50 has HSV-1. In the United States more than one-in-six people have HSV-2. Although it can be transmitted through any intimate contact, it is one of the most common sexually transmitted infections. Many of those who are infected never develop symptoms. Symptoms, when they occur, may include watery blisters in the skin or mucous membranes of the mouth, lips, nose, or genitals. Lesions heal with a scab characteristic of herpetic disease. Sometimes, the viruses cause mild or atypical symptoms during outbreaks. However, they can also cause more troublesome forms of herpes simplex. As neurotropic and neuroinvasive viruses, HSV-1 and -2 persist in the body by hiding from the immune system in the cell bodies of neurons. After the initial or primary infection, some infected people experience sporadic episodes of viral reactivation or outbreaks. In an outbreak, the virus in a nerve cell becomes active and is

transported via the neuron's axon to the skin, where virus replication and shedding occur and cause new sores.

DR SEBI CURE FOR GENITAL HERPES Dr. Sebi was a Honduran man with a very humble beginning and was known and addressed as an herbalist, pathologist or a naturalist in different regions of the world; he left the biosphere in 2016. Indeed, it is true that he is no longer in our midst today, but his

self-invented and established effective traditional therapy for diabetes, hypertension and organ cleansing is still helping millions of people with these conditions around the world. Dr. Sebi said that there were six fundamental food groups: live, raw, dead, hybrid, genetically modified, and drugs, but his diet basically cut out all the food groups except live and raw food, thereby encouraging dieters to eat as closely to a raw vegan diet as possible. These foods include foods like naturally grown fruits and vegetables, along with whole grains. He has believed that raw and live foods were "electric," which fought the acidic food waste in the body. So, with his approach to eating, Dr. Sebi established a list of foods that he deliberated to be the best for his diet. Sticking to Dr. Sebi's Diet and Food List to cure these diseases can be challenging if you eat out a lot. Consequently, you need to get used to making lots of meals at home. This comprehensive account of the human herpesviruses provides an encyclopedic overview of their basic virology and clinical manifestations. This group of viruses includes human simplex type 1 and 2, Epstein-Barr virus, Kaposi's Sarcoma-associated herpesvirus, cytomegalovirus, HHV6A, 6B and 7, and varicella-zoster virus. The viral diseases and cancers they cause are significant and often recurrent. Another important area covered within this volume concerns antiviral therapy and the development of vaccines. All these aspects are covered in depth, both scientifically and in terms of clinical guidelines for patient care. The text is illustrated generously throughout and is fully referenced to the latest research and developments.

Making Peace with Herpes is the most thought-provoking and original book ever written on the subject of herpes. Christopher Scipio started off as a victim of the virus and transformed himself into one of the most experienced holistic practitioners who treats herpes in North America. He is an outspoken advocate of treatment without drug therapy." While it is a subject that many people would rather avoid, Scipio points out that 60% of the sexually active population in North America has either herpes simplex 1 or 2. "70% of the people who have it either don't know they have it, won't admit they have it or are not treating it," Scipio explains "For some people having herpes can make

you feel like a leper. There are no public fundraisers or celebrity spokespersons championing the cause of herpes. In fact you would be hard-pressed to get anyone to admit in public that they have 'the gift.' " "The good news and the ironic news is that herpes is one of the easiest diseases to manage naturally. There is absolutely no need for drug-therapy for herpes. This book isn't just about how to have fewer outbreaks or how to stop having outbreaks; just doing that isn't enough to be healthy. This book is about holistically healing your herpes and living a healthy, happy and balanced life. Holistic health is about much more than making symptoms go away." Making Peace with Herpes is a must read for everyone. Whether you have herpes, are in a relationship with someone with herpes or you just want to educate yourself on the worlds fastest growing pandemic; it's a self-empowerment guide of the first order.
