HandiLand looks at young adult novels, fantasy series, graphic memoirs, and picture books of the last 25 years in which characters with disabilities take

center stage for the first time. These books take what others regard as weaknesses—for instance, Harry Potter's headaches or Hazel Lancaster's oxygen tank—and redefine them as part of the hero's journey. HandiLand places this movement from sidekick to hero in the political contexts of disability rights movements in the United States, the United Kingdom, and Ghana. Elizabeth A. Wheeler invokes the fantasy of

HandiLand, an ideal society ready for young people with disabilities before they get there, as a yardstick to measure how far we've come and how far we still need to go toward the goal of total inclusion. The book moves through the public spaces young people with disabilities have entered, including schools, nature, and online communities. As a disabled person and parent of children with disabilities, Wheeler offers an inside look into families who collude with their kids in shaping a better world. Moving, funny, and beautifully written, *HandiLand: The Crippest Place on Earth* is the definitive study of disability in contemporary literature for young readers.

In this comprehensive textbook, editors

Matthew J. Brown, Randy Duncan, and Matthew J. Smith offer students a deeper understanding of the artistic and cultural significance of comic books and graphic novels by introducing key theories and critical methods for analyzing comics.

Each chapter explains and then demonstrates a critical method or approach, which students can then apply to interrogate and critique the meanings and forms of comic books, graphic novels, and other sequential art.

Contributors introduce a wide range of critical perspectives on comics, including disability studies, parasocial relationships, scientific humanities, queer theory, linguistics, critical geography, philosophical aesthetics, historiography, and much more. As a companion to the acclaimed *Critical*

Approaches to Comics: Theories and Methods, this second volume features 19 fresh perspectives and serves as a stand-alone textbook in its own right. More Critical Approaches to Comics is a compelling classroom or research text for students and scholars interested in Comics Studies, Critical Theory, the Humanities, and beyond.

A Federal Reserve insider pulls back the curtain on the secretive institution that controls America's economy After correctly predicting the housing crash of 2008 and quitting her high-ranking Wall Street job, Danielle DiMartino Booth was surprised to find herself recruited as an analyst at the Federal Reserve Bank of Dallas, one of the regional centers of our

complicated and widely misunderstood Federal Reserve System. She was shocked to discover just how much tunnel vision, arrogance, liberal dogma, and abuse of power drove the core policies of the Fed. DiMartino Booth found a cabal of unelected academics who made decisions without the slightest understanding of the real world, just a slavish devotion to their theoretical models. Over the next nine years, she and her boss, Richard Fisher, tried to speak up about the dangers of Fed policies such as quantitative easing and deeply depressed interest rates. But as she puts it, "In a world rendered unsafe by banks that were too big to fail, we came to understand that the Fed was simply too big to fight." Now DiMartino Booth explains what really happened to

our economy after the fateful date of December 8, 2008, when the Federal Open Market Committee approved a grand and unprecedented experiment: lowering interest rates to zero and flooding America with easy money. As she feared, millions of individuals, small businesses, and major corporations made rational choices that didn't line up with the Fed's "wealth effect" models. The result: eight years and counting of a sluggish "recovery" that barely feels like a recovery at all. While easy money has kept Wall Street and the wealthy afloat and thriving, Main Street isn't doing so well. Nearly half of men eighteen to thirty-four live with their parents, the highest level since the end of the Great Depression. Incomes are barely increasing for anyone not in the top ten

percent of earners. And for those approaching or already in retirement, extremely low interest rates have caused their savings to stagnate. Millions have been left vulnerable and afraid. Perhaps worst of all, when the next financial crisis arrives, the Fed will have no tools left for managing the panic that ensues. And then what? DiMartino Booth pulls no punches in this exposé of the officials who run the Fed and the toxic culture they created. She blends her firsthand experiences with what she's learned from dozens of high-powered market players, reams of financial data, and Fed documents such as transcripts of FOMC meetings. Whether you've been suspicious of the Fed for decades or barely know anything about it, as DiMartino Booth writes, "Every American

must understand this extraordinarily powerful institution and how it affects his or her everyday life, and fight back.”

A film-centric portrait of the extraordinarily gifted movie director whose decades-long influence on American popular culture is unprecedented Everything about me is in my films, Steven Spielberg has said. Taking this as a key to understanding the hugely successful moviemaker, Molly Haskell explores the full range of Spielberg s works for the light they shine upon the man himself. Through such powerhouse hits as Close Encounters of the Third Kind, E.T., Jurassic Park, and Indiana Jones, to lesser-known masterworks like A.I. and Empire of the

Sun, to the haunting Schindler s List, Haskell shows how Spielberg s uniquely evocative filmmaking and story-telling reveal the many ways in which his life, work, and times are entwined.

Organizing chapters around specific films, the distinguished critic discusses how Spielberg s childhood in non-Jewish suburbs, his parents traumatic divorce, his return to Judaism upon his son s birth, and other events echo in his work. She offers a brilliant portrait of the extraordinary director a fearful boy living through his imagination who grew into a man whose openness, generosity of spirit, and creativity have enchanted audiences for more than 40 years.

Why has the zombie become such a pervasive figure in twenty-first-century popular culture? John Vervaeke, Christopher Mastropietro and Filip Miscevic seek to answer this question by arguing that particular aspects of the zombie, common to a variety of media forms, reflect a crisis in modern Western culture. The authors examine the essential features of the zombie, including mindlessness, ugliness and homelessness, and argue that these reflect the outlook of the contemporary

West and its attendant zeitgeists of anxiety, alienation, disconnection and disenfranchisement. They trace the relationship between zombies and the theme of secular apocalypse, demonstrating that the zombie draws its power from being a perversion of the Christian mythos of death and resurrection. Symbolic of a lost Christian worldview, the zombie represents a world that can no longer explain itself, nor provide us with instructions for how to live within it. The concept of 'domicide' or the destruction of home is developed to describe the modern crisis of meaning that the zombie both represents and reflects. This is illustrated using case studies including the relocation of the Anishinaabe of the Grassy Narrows First Nation, and the

upheaval of population displacement in the Hellenistic period. Finally, the authors invoke and reformulate symbols of the four horsemen of the apocalypse as rhetorical analogues to frame those aspects of contemporary collapse that elucidate the horror of the zombie. *Zombies in Western Culture: A Twenty-First Century Crisis* is required reading for anyone interested in the phenomenon of zombies in contemporary culture. It will also be of interest to an interdisciplinary audience including students and scholars of culture studies, semiotics, philosophy, religious studies, eschatology, anthropology, Jungian studies, and sociology.

'If I'm going to tell the story of a life, my life, then I need to tell it warts and all. If the tale is too saccharine sweet then what can the reader take away from it? What do they learn about you? I've written everything down. The shit, the death, fun, naughtiness, addiction, laughter, laughter, laughter, some tears and lots of love and happiness. That to me is a better reflection of a human's life.' Nick's family life was difficult, blighted by alcoholism, illness and sudden misfortune meaning they lost everything overnight. He left school early and drifted from job to job dogged by his own personal demons. It's something of a miracle that Nick

survived and even more that he would achieve such success with his writing, acting and comedy. In *Truths, Half Truths and Little White Lies* Nick paints a brilliantly funny, moving and brutally candid portrait of childhood, adolescence and eventual success.

This book investigates how graphic medicine enables sufferers of mental illness to visualise the intricacies of their internal mindscape through visual metaphors and reclaim their voice amidst stereotyped and prejudiced assumptions of mental illness as a disease of deviance and violence. In this context, by using Lakoff and Johnson's

conceptual metaphor theory (CMT), this study uncovers the broad spectrum of the mentally ill's experiences, a relatively undertheorised area in medical humanities. The aim is to demonstrate that mentally ill people are often represented as either grotesquely exaggerated or overly romanticised across diverse media and biomedical discourses. Further, they have been disparaged as emotionally drained and unreasonable individuals, incapable of active social engagements and against the healthy/sane society. The study also aims to unsettle the sanity/insanity binary and its related patterns of fixed categories of normal/abnormal, which depersonalise the mentally ill by critically analysing seven graphic narratives on mental illness.

Introduces key ideas and offers a sense of the new frontiers and questions in the emerging field of disability media studies. Disability Media Studies articulates the formation of a new field of study, based in the rich traditions of media, cultural, and disability studies. Necessarily interdisciplinary and diverse, this collection weaves together work from scholars from a variety of disciplinary homes, into a broader conversation about exploring media artifacts in relation to disability. The book provides a comprehensive overview for anyone interested in the study of disability and media today. Case studies include familiar contemporary examples—such as Iron Man 3, Lady Gaga, and Oscar

Pistorius—as well as historical media, independent disability media, reality television, and media technologies. The contributors consider disability representation, the role of media in forming cultural assumptions about ability, the construction of disability via media technologies, and how disabled audiences respond to particular media artifacts. The volume concludes with afterwords from two different perspectives on the field—one by disability scholar Rachel Adams, the other by media scholars Mara Mills and Jonathan Sterne—that reflect upon the collection, the ongoing conversations, and the future of disability media studies. Disability Media Studies is a crucial text for those interested in this flourishing field, and will pave the way

for a greater understanding of disability media studies and its critical concepts and conversations.

Investigating insecurity as the predominant logic of life in the present moment Challenging several key concepts of the twenty-first century, including precarity, securitization, and resilience, this collection explores the concept of insecurity as a predominant logic governing recent cultural, economic, political, and social life in the West. The essays illuminate how attempts to make human and nonhuman systems secure and resilient end up having the opposite effect, making insecurity the default state of life today. Unique in its wide disciplinary breadth and variety of topics and methodological

approaches—from intellectual history and cultural critique to case studies, qualitative ethnography, and personal narrative—Insecurity is written predominantly from the viewpoint of the United States. The contributors' analyses include the securitization of nongovernmental aid to Palestine, Bangladeshi climate refugees, and the privatization of U.S. military forces; the history of the concept of insecurity and the securitization of finance; racialized urban development in Augusta, Georgia; Amazon's Mechanical Turk and the consequences of the Marie Kondo method; and the intricate politics of sexual harassment in the U.S. academy. ### **LONG WAY DOWN**

Little, Brown  
President Donald J. Trump lays out his professional and personal worldview in this classic work—a firsthand account of the rise of America’s foremost deal-maker. “I like thinking big. I always have. To me it’s very simple: If you’re going to be thinking anyway, you might as well think big.”—Donald J. Trump Here is Trump in action—how he runs his

organization and how he runs his life—as he meets the people he needs to meet, chats with family and friends, clashes with enemies, and challenges conventional thinking. But even a maverick plays by rules, and Trump has formulated time-tested guidelines for success. He isolates the common elements in his greatest accomplishments; he shatters myths; he names names, spells out the zeros, and fully reveals the deal-maker’s art. And throughout, Trump talks—really talks—about how he does it. Trump: The Art of the Deal is an unguarded look at the mind of a brilliant entrepreneur—the ultimate read for anyone interested in the man behind the spotlight. Praise for Trump: The Art of the Deal “Trump makes one believe for a moment in the

American dream again.”—The New York Times “Donald Trump is a deal maker. He is a deal maker the way lions are carnivores and water is wet.”—Chicago Tribune “Fascinating . . . wholly absorbing . . . conveys Trump’s larger-than-life demeanor so vibrantly that the reader’s attention is instantly and fully claimed.”—Boston Herald “A chatty, generous, chutzpa-filled autobiography.”—New York Post

Culturally powerful ideas of normalcy and deviation, individual responsibility, and what is medically feasible shape the ways in which we live with illness and disability. The essays in this volume

show how illness narratives expressed in a variety of forms—biographical essays, fictional texts, cartoons, graphic novels, and comics—reflect on and grapple with the fact that these human experiences are socially embedded and culturally shaped. Works of fiction addressing the impact of an illness or disability; autobiographies and memoirs exploring an experience of medical treatment; and comics that portray illness or disability from the perspective of patient, family member, or caregiver: all of these narratives forge a specific aesthetic in order to communicate their understanding of the human condition. This collection demonstrates what can emerge when scholars and artists interested in fiction, life-writing, and comics collaborate to explore how

various media portray illness, medical treatment, and disability. Rather than stopping at the limits of genre or medium, the essays talk across fields, exploring together how works in these different forms craft narratives and aesthetics to negotiate contention and build community around those experiences and to discover how the knowledge and experiences of illness and disability circulate within the realms of medicine, art, the personal, and the cultural. Ultimately, they demonstrate a common purpose: to examine the ways comics and literary texts build an audience and galvanize not just empathy but also action. In addition to the editors, the contributors to this volume include Einat Avrahami, Maureen Burdock, Elizabeth J. Donaldson, Ariela Freedman,

Rieke Jordan, stef lenk, Leah Misemer, Tahneer Oksman, Nina Schmidt, and Helen Spandler. Chapter 7, “Crafting Psychiatric Contention Through Single-Panel Cartoons,” by Helen Spandler, is available as Open Access courtesy of a grant from the Wellcome Trust. "Across more than fifty essays, *Keywords for Comics Studies* provides a rich, interdisciplinary vocabulary for comics and sequential art, and identifies new avenues of research into one of the most popular and diverse visual media of the twentieth and twenty-first century. In an original twist on the NYU *Keywords* mission, the terms in this volume combine attention to the unique aesthetic practices of a distinct medium, comics, with some of the most fundamental concepts of the humanities broadly. Readers will see how scholars, cultural critics, and comics artists from a range of fields—including media and film studies, queer and feminist theory, and

critical race and transgender studies among others—take up sequential art as both an object of analysis and a medium for developing new theories about embodiment, identity, literacy, audience reception, genre, cultural politics and more. To do so, *Keywords for Comics Studies* presents an array of original and inventive analyses of terms central to the study of comics and sequential art, but traditionally siloed in distinct lexicons: these include creative or aesthetic terms like Ink, Creator, Border, and Panel; conceptual terms like trans\*, disability, universe, and fantasy; genre terms, like Zine, Pornography, Superhero, and Manga; and canonical terms like X-Men, Archie, Watchmen and Love and Rockets. Written as much for students and lay readers as professors

and experts in the field, *Keywords for Comics Studies* revivifies the fantasy and magic of reading comics in its kaleidoscopic view of the field's most compelling and imaginative ideas"--

Here is an update from hell, a brilliant work from novelist Sam Lipsyte, whom Jeffrey Eugenides calls "original, devious, and very funny" and of whose first novel Chuck Palahniuk wrote, "I laughed out loud---and I never laugh out loud." The Eastern Valley High School Alumni newsletter, Catamount Notes, is bursting with tales of success: former students include a bankable politician and a famous baseball star, not to mention a major-label recording artist.
