A companion series to our "Competitive Mathematics for Gifted Students," the series "Math Challenges for Gifted Students" offers additional material in practice test form. The workbooks are useful for assessment and for development of testing skills. In full color and with fully detailed solutions, the workbooks may be used as a fun introduction to competitive problem solving. However, the problems are a bit more difficult than actual Kangaroo problems, exploring a large number of known 'tips and tricks.' One could say it is much more concentrated in that, unlike actual exams, it has less 'filler' - almost every problem is 'tricky' and embodies a specific strategy. The material is excellent for training purposes and has been used by the authors in seminars with hundreds of the most gifted students in the Bay Area. The workbook contains six 24-question tests. After each test there is an answer

key. The tests are followed by detailed solutions. The recommended time limit for each test is of 75 minutes. Students who have not been exposed to competitive problem solving will find this book extremely difficult and will need help from an adult. Without preparation, students who get 'A' in school generally score about 50 points out of 96 possible on Kangaroo level 1-2.

Doris Herrmann was born deaf in 1933 near Basel, Switzerland, and later became blind. As a child, she was fascinated by kangaroos, a fascination that has lasted throughout her life. As soon as she could, she travelled to Australia repeatedly, eventually becoming a respected researcher on the behaviour of her beloved marsupials. Along with this pursuit, she has also been active as a creative artist, producing numerous sculptures, water-colour paintings and works for textile prints.

Kangaroo isn't your typical spy. Sure, he has extensive agency training, access to bleeding-edge technology, and a ready supply of clever (to him) quips and retorts. But what sets him apart is "the pocket." It's a portal that opens into an empty, seemingly infinite, parallel

universe, and Kangaroo is the only person in the world who can use it. But he's pretty sure the agency only keeps him around to exploit his superpower. After he bungles yet another mission, Kangaroo gets sent away on a mandatory "vacation:" an interplanetary cruise to Mars. While he tries to make the most of his exile, two passengers are found dead, and Kangaroo has to risk blowing his cover. It turns out he isn't the only spy on the ship—and he's just starting to unravel a massive conspiracy which threatens the entire Solar System. Now, Kangaroo has to stop a disaster which would shatter the delicate peace that's existed between Earth and Mars ever since the brutal Martian Independence War. A new interplanetary conflict would be devastating for both sides. Millions of lives are at stake. Weren't vacations supposed to be relaxing? With Waypoint Kangaroo, Chen makes his debut with this outer space thriller. Chen has an extensive network of connections to prominent science fiction authors, and has studied under John Scalzi, James Patrick Kelly, and Ursula K. LeGuin.

This book provides an authoritative source of information on kangaroos and their relatives. Topics include: species characteristics and biology, adaptations and function, and conservation. The book also discusses culling and the commercial kangaroo harvest, as well as national attitudes to kangaroos and their value for tourism. There are 71 recognised species of kangaroo found in Australasia. Of these, 46 are endemic to Australia, 21 are endemic to the island of New Guinea, and four species are found in both regions. The various species have a number of common names,

including bettong, kangaroo, pademelon, potoroo, quokka, rat kangaroo, rock wallaby, tree kangaroo, wallaby and wallaroo. Illustrated in full colour, Australia's Amazing Kangaroos will give readers insight into the world of this intriguing marsupial - an animal that has pride of place on the Australian Coat of Arms.

From the medical sheets in maternity wards to our death certificates, paper charts the course of our lives. Paradoxically, it spreads ideas and learning as well as thousands of tons of junk mail, yet our dependence on this material is damaging our planet and creating mountains of unnecessary waste. Mandy Haggith explores our society's obsession with paper, from its invention in China 2000 years ago to the millions of tonnes we now use every year. Following the paper trail around the world, Mandy discovers the human stories of those affected by the industry, from a Russian ecologist, a Finnish logger and Indonesian tribal leaders, to a Canadian publisher and a Vietnamese paper technologist. In the process, she uncovers the paper industry's dirtiest secrets and sets out simple, practical steps we can take to minimise our own personal use of 20 tonnes of paper over our lifetime.

Like the Sydney Opera House or Uluru, the kangaroo is a unique symbol of Australia. This is the remarkable story of our most famous marsupial, from its ancient origins and prehistoric significance to current-day management

and conservation. Marsupial specialists Stephen Jackson and Karl Vernes examine our sustained fascination with kangaroos-spanning 40,000 years-that allows these engaging marsupials to be instantly recognised by people the world over. The amazing diversity of this group of animals is revealed, ranging from tiny forest dwellers and tree kangaroos to large majestic animals living on the open plains of central Australia and the giant kangaroos that once roamed the Pleistocene landscape. The authors also investigate the natural history of kangaroos - their unique reproduction methods, intriguing behaviour, varied diet and trademark hopping ability - all of which make them such fascinating animals.

Sirens: Collected Papers 2009-2011 combines written versions of presentations from three years of Sirens, a conference on women in fantasy literature. During those years, presenters were encouraged to analyze women warriors, fairies, and monsters. Presentations for Sirens were chosen by vetting boards made up of scholars, professionals, and readers. Following each year's conference, presenters were invited to submit text versions of their presentations for the Sirens compendium; twenty-five of the nearly ninety presentations from 2009-2011 are represented in these collected papers.
