Verlag  
In Powerful Learning,  
Linda Darling-Hammond  
and an impressive list of  
co-authors offer a clear,  
comprehensive,

and engaging exploration of the most effective classroom practices. They review, in practical terms, teaching strategies that generate meaningful K-2 student understanding, and occur both within the classroom walls and beyond. The book includes rich stories, as well as online videos of innovative classrooms and schools, that show how students who are taught well are able to think critically, employ flexible problem-solving, and apply learned skills and knowledge to new

situations.

**Affirming Culture in Early Childhood Programs**

Routledge  
Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses objective criteria to help two parties reach an agreement

**Stop What You're Doing And Read This!**

Verlag Herder GmbH  
A revised edition of a popular resource builds on the authors' findings that key problems in teaching methods are causing

America to lag behind international academic standards, outlining a program for administrators, instructors, and parents that incorporates solutions based on current research. Reprint.

**Social Work** John Wiley & Sons

The long-anticipated new version of the internationally recognized Early Childhood Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged

children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional Items assessing developmentally appropriate literacy and math activities. Designed for preschool, kindergarten, and child care classrooms serving

children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the

Environment Rating Scales Institute (ERSI) website ([www.ersi.info](http://www.ersi.info)). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability

and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure

### **TACKLING MEN'S VIOLENCE IN FAMILIES**

Algonquin Books  
Ist die Kita von der Betreuungseinrichtung zu einem Dienstleistungsunternehmen mit Kundenorientierung geworden? Wie ein

Dienstleistungsunternehmen zeichnet sich eine Kita aus durch die Merkmale wie: Kundenorientierung (Kinder und Eltern), Qualität, Leistungssteuerung und -messung (Evaluation), Effektivität und Effizienz, Partizipation, Kooperation und Vernetzung. Wie dieses weite Feld gemanagt werden kann macht der neue Leitfaden anschaulich. Er bietet neuen Führungskräfte eine Fülle von Anregungen zur Bewältigung ihrer anspruchsvollen Arbeit und unterstützt die

bereits langjährig arbeitende Leitungskraft dabei, ihre Arbeit zu überprüfen und vielleicht unter einem erweiterten Blickwinkel zu betrachten.

### **BEST IDEAS FROM THE WORLD'S TEACHERS FOR IMPROVING EDUCATION IN THE CLASSROOM**

Basic Books  
In the light of recent theoretical and methodological advances Linking Data describes the ways in which substantive problems and research

issues can be tackled effectively through the inter-relationship of quantitative and qualitative data. They also include a discussion of multi-method research which is critical of the naive assumption that using several different methods necessarily ensures the validity of research findings.

Nordic Issues and Dilemmas Council of Europe

This book provides a basic introduction to social work. It discusses the ambiguities of social work,

looking at its historical and social developments and facing the challenges of the 21st century. The authors examine and discuss the thematic and methodological field of social work within the concept of Reflexive Modernism and thus give fresh impetus to the discipline.

**Roots and Wings, Revised Edition** MIT Press

International specialists review research in the field of career burnout in this 2009 volume.

Policy Press

For many of us, thinking about the future conjures up images of Cormac McCarthy's *The Road*: a post-apocalyptic dystopia stripped of nature.

Richard Louv, author of the landmark bestseller *Last Child in the Woods*, urges us to change our vision of the future, suggesting that if we reconceive environmentalism and sustainability, they will evolve into a larger movement that will touch every part of society. This New Nature Movement

taps into the restorative powers of the natural world to boost mental acuity and creativity; promote health and wellness; build smarter and more sustainable businesses, communities, and economies; and ultimately strengthen human bonds. Supported by groundbreaking research, anecdotal evidence, and compelling personal stories, Louv offers renewed optimism while challenging us to rethink the way we live. *Compassito* Cambridge University Press

Public policy responses to child sexual abuse are dominated by interventions designed to take effect only after offenders have already begun offending, and after children have already been sexually abused. Comparatively little attention has been given to alternative prevention strategies – particularly to those aimed at preventing sexual abuse before it might otherwise occur. Considerable knowledge has been accumulated on the characteristics, modus

operandi and persistence of offenders, the characteristics, circumstances and outcomes for victims, and the physical and social settings in which sexual abuse occurs, but little work has been done to systematically apply this knowledge to prevention. This book aims to fulfill this objective through integrating clinical and criminological concepts and knowledge to inform a more comprehensive and effective public policy approach to preventing child sexual abuse.

Empirical and theoretical knowledge concerning child sexual abuse is integrated with broader developments in evidence-based crime and child maltreatment prevention, leading to new ideas about understanding and preventing child sexual abuse. This book will be essential reading for anybody with interests in this field.

### **FORGOTTEN CONNECTIONS**

Routledge  
Research Paper

(postgraduate) from the year 2014 in the subject Pedagogy - Common Didactics, Educational Objectives, Methods, grade: 1, Humboldt State University (School of Education), language: English, abstract: This thesis compares the educational methods and writings of Ellen Gould White and Maria Montessori. It shows that there are a number of significant similarities in between both methods. The large number of resemblances suggests that Maria Montessori

copied from Ellen White's works or at least read them. I could not find any evidence that she did although it is possible that she read some of Ellen White's writings, since her son married an American wife and Maria Montessori also visited the USA at least two times. Yet this remains a possibility which I was not able to prove. I suggest that since both authors were interested in the very best education and development up to the highest standards possible for each and

every child and both women were deeply religious and believed in the importance of religious education, teaching each child thankfulness to his creator and finding his or her purpose of life on this earth that it is this similar attitude towards children, God and life that lead both independently to the same results. I compared the methods and “theories” of both educators with what modern science is teaching and found that neither Maria Montessori

nor Ellen White can be contradicted in any way by what modern educational and psychological science research say. Getting to Yes London : Oxford University Press This presentation uses anatomically precise, computer-generated reconstructed images of the human body for three-dimensional presentation of acupuncture points and channels. The CD component is fully interactive and allows the user to see through tissue layers, remove tissue

layers, and rotate structures so that specific acupuncture points can be v  
*Context based learning of science* Houghton Mifflin Harcourt  
Mika's heart is broken, until he sees Leah. A smart, beautiful, and brave girl, Leah has been deaf since birth. When Mika meets her for the first time, he feels something electric. They cannot communicate much, so Mika decides to take a sign language course. His family and friends are skeptical, and

Mika soon grows weary, too. The world of deaf people is so much different than his own. Can their two worlds intersect? There is also Sandra, Mika's ex-girlfriend, who he cannot seem to get over, but Mika cannot shake that Leah has captured his heart. Author Kathrin Schrocke tells the story of two teens and their tender, quirky, and extraordinary love. [Perspectives On Special Education](#) Cambridge University Press  
In any 24 hours there

might be sleeping, eating, kids, parents, friends, lovers, work, school, travel, deadlines, emails, phone calls, Facebook, Twitter, the news, the TV, Playstation, music, movies, sport, responsibilities, passions, desires, dreams. Why should you stop what you're doing and read a book? People have always needed stories. We need literature - novels, poetry - because we need to make sense of our lives, test our depths, understand our joys and discover what humans are

capable of. Great books can provide companionship when we are lonely or peacefulness in the midst of an overcrowded daily life. Reading provides a unique kind of pleasure and no-one should live without it. In the ten essays in this book some of our finest authors and passionate advocates from the worlds of science, publishing, technology and social enterprise tell us about the experience of reading, why access to books should never be taken

for granted, how reading transforms our brains, and how literature can save lives. In any 24 hours there are so many demands on your time and attention - make books one of them.

## **A GUIDE TO THE USE OF THE INTERNATIONAL**

### **PHONETIC ALPHABET**

Teachers College Press  
 A leading expert in childhood development makes the case for why self-directed learning -- "unschooling" -- is the best way to get kids to learn. In *Free to Learn*, developmental psychologist Peter Gray argues that in order to foster children who will thrive in today's constantly changing world, we must entrust them to steer their own learning and development. Drawing on

evidence from anthropology, psychology, and history, he demonstrates that free play is the primary means by which children learn to control their lives, solve problems, get along with peers, and become emotionally resilient. A brave, counterintuitive proposal for freeing our children from the shackles of the curiosity-killing institution we call school, *Free to Learn* suggests that it's time to stop asking what's wrong with our children, and start asking what's wrong with

the system. It shows how we can act -- both as parents and as members of society -- to improve children's lives and to promote their happiness and learning.

How teachers might best be prepared to work in schools with an increasingly diverse pupil population is of concern to educational academics, professionals and governments around the world. Changes that have taken place in legislation and practice often fail to

taken into account how practitioners can ensure that all children and young people are able to achieve. The focus of this international text is on innovative practices for preparing teachers to work in inclusive classrooms and schools. Drawing on both pre and in-service training methods, the expert contributors to this book follow three major themes: social and political challenges regarding teacher education – providing an historical perspective on

the training of teachers, tensions in preparing teachers for inclusion, cultural issues, the relationship between educational funding and practices and collaborative measures to support a whole school approach innovative approaches in pre-service teacher preparation – discussing a range of innovative models and approaches used in pre-service teacher education courses engaging professional development for inservice teachers – reviewing a range of

approaches employed to engage working teachers and help them establish curricula and pedagogy that meets the needs of all students in their classes. Each chapter will include a list of proposed learning outcomes, a theoretical or conceptual framework to help readers develop the proposed innovation, an overview of recent research, discussion of the research data available and a discussion of the international implications and challenges, summarising in

suggestions for a positive way forward. *Teacher Education for Inclusion: Changing Paradigms and Innovative Approaches* is essential reading for practising teacher educators, school leaders, university lecturers in education and post graduate students. *Understanding and Preventing Teacher Burnout* Walter de Gruyter "Roots and Wings will open doors to beginners in cultural diversity education, and will enrich the more experienced readers. It is a grand tool

for assisting early childhood educators to address the many-faceted and complex issues of cultural diversity and racial prejudice. . . . I recommend this book to any teacher, caregiver, or parent who wants to begin learning what it means to foster young children's respect for themselves and others."—Louise Derman-Sparks, author, *AntiBias Curriculum* More than a decade ago, *Roots and Wings* was published as the first practical resource for early childhood

teachers on the then new topic of multicultural education. This invaluable guide is now completely updated to respond to present day anti-bias issues in educating young children. *Roots and Wings* provides a thorough, clear, and practical introduction to working with diverse children and families in early childhood settings. With more than 100 new and revised activities, practical examples, and staff

training recommendations, the revised edition includes new chapters on bilingual education, culturally responsive teaching, and children and prejudice. Seamlessly blending theory and practice, *Roots and Wings* is an ideal resource for preschool teachers, early childhood programs at colleges and universities, and training workshops. Stacey York is an instructor in the Child

Development Department at Minneapolis Community and Technical College, Minneapolis, Minnesota. She conducts multicultural workshops around the country and is also the author of *Big As Life: The Everyday Inclusive Curriculum*.
