This review was prepared in response to Croatia's 2015 request to adhere to the Declaration on International Investment and Multinational Enterprises. It assesses the climate for domestic and foreign investment in Croatia, its ability to comply with the principles of openness, transparency and non-discrimination and its policy convergence with the OECD Declaration, including responsible business conduct practices, and discusses the challenges and opportunities faced by the government of Croatia in its reform efforts.

Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning

economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration. Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if

transformations result in exclusion - thus challenging who regeneration is for. This book will be valuable reading for students and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.

Croatia's Foreign Policy After Independence. The Various Impacts of Tourism on the Country
SAGE Publications

This book deals broadly with tourism planning and development from the perspective of Croatia, a major Adriatic tourism destination which is fast becoming one of the most popular vacation spots in the European Union. With the recent accession of Croatia to the EU, Croatia is undergoing a rapid political and economic transition and generating scholarly interest in the country's primary, secondary, and tertiary industries. This book examines the country's long history and thriving success in the tourism industry through issues of destination image and identity, management

challenges, economic impact, and how to attract tourists in the midst of extreme political changes. The book explores the implications of policy decisions on product development and takes a theoretically sound approach to destination planning and problem-solving in Croatia. Its timely view of Croatian national tourism policy and the broader Adriatic/Mediterranean region makes this book of interest to all scholars, students, and practitioners engaged in various aspects of destination development planning and management.

Tourism Planning and Development in Eastern Europe OECD Publishing

Three decades ago, the hypermobility of tourists from the days before the global pandemic was truly unthinkable in Eastern Europe. The borders were closed and the region isolated from the rest of the world. Despite an extraordinary transformation of tourism in the area since, Eastern Europe remains under-explored in tourism

studies. This book fills the gap by outlining contemporary strategies for tourism development in post-socialist countries, considering the opportunities and challenges as well as the initiatives and approaches to sustainability.

Illuminating the various economic, socio-cultural and environmental impacts that tourism has created, this book is a valuable reference for researchers and students of tourism and related disciplines, as well as anyone interested in the development of Eastern Europe.

Channel View Publications On January 1, 2023, Croatia became the 20th member of the eurozone.

The country posted another strong growth year in 2022, among the highest in the eurozone.

But the momentum started to slow in H2, while inflation rose to a multi-decade high, reflecting indirect impacts from Russia's war in Ukraine. Staff expects growth to moderate to 2.4

percent in 2023 and recover to its potential over the medium term. Inflation is projected to average 7 1/2 percent in 2023 and gradually fall towards the 2 percent target. The outlook is subject to considerable uncertainty. Risks to growth are broadly balanced and risks to inflation are tilted to the upside.

Tourism and the Environment in European Countries WIT Press

Croatia has navigated well the COVID-19 crisis and the price shocks following Russia's war of aggression on Ukraine. It has achieved robust output growth, rising employment and improving well-being, although inflation has surged. Integration into the euro- and Schengen areas at the start of 2023 are testament to progress, and are providing a further fillip to the economy.

Seminar paper from the year 2019 in the subject Tourism, grade: 1,3, University of Passau, language: English, abstract: The object of

this paper is to give the reader a general understanding of tourism on a global scale, continued by a broader overview on the history and development of Croatian tourism from its ancient times over the early 19th century to the perspectives and challenges the country is facing today.

Complemented by current statistical data, a comparative report with other travel destinations is further provided. In the main focus of this paper these tendencies are being followed by a broader theoretical framework of the general impacts of tourism on a travel destination with the focus on economic developments.

Consequently, the findings will be then put in disposition, what implications the tourism industry has to Croatia and what measures could help the country for staying competitive in the coming years. The combined topics of this paper lead us to the following research question: "What effects and challenges has the tourism industry in the case of Croatia and what steps could be implemented in the country in order to

maintain a long-lasting positive development for the next decades?" Moreover, as an outlook for upcoming discussions, various factors will be briefly taken into consideration, in particular, whether the official Tourism Development Strategy until 2020 has born fruits in the last years and if the large financial contribution of tourism to the country's economy can be seen on a long term as a blessing or a curse for this young EU member.

HOSPITALITY AND TOURISM IN TRANSITION IN CENTRAL AND EASTERN EUROPE

OECD Tourism Trends and Policies 2022

This book presents a comprehensive overview of the tourism market development in Central and Eastern European countries. It is divided into 13 chapters, including a chapter dedicated to Belarus, all richly illustrated with colorful maps and illustrations. The book presents the output of international conferences organized every two years by the

Department of Regional Geography and Tourism of the University of Wroclaw which have served as inspiration for this book. Chapter 1 provides the characteristics of 20 post-communist countries of the region on the international tourism market and it sets the background and context for the following chapters. Chapters 2 to 13 present the condition of research on tourism, tourist attractions, tourist infrastructure, tourism movement, main types of tourism as well as tourist regionalization in 12 Central and Eastern European countries. All chapters have been updated with reference to the statistics. This book is a revised and updated version of "The Geography of Tourism of Central and Eastern Europe Countries" published by the Department of Regional Geography and Tourism of Wroclaw University in 2012. It has been developed by a group of specialists through their exchange of research experience in the scope of international tourism in Central and Eastern Europe.

As the event management field expands, there is a growth in demand for advanced texts, particularly with a multidisciplinary research and theoretical orientation. Event Studies is the first text to embrace this new direction in the field of event management providing: students and practitioners with an explanation of why planned events are important from a social/cultural, economic and environmental perspective. readers with an understanding of how various disciplines and other professional fields view planned events, and the contributions they make to understanding events. research students with a detailed evaluation of research issues and challenges, and of methodologies and theories applicable to event studies. The bibliography is extensive and numerous research examples are provided. professionals with a tool

to expand their knowledge well beyond the art and science of producing events to include the philosophical and scientific foundations of event studies. For the event management student, and for professionals, *Event Studies* provides the necessary body of knowledge and theoretical /methodological underpinnings on the subject of planned events. [Evolution of Destination Planning and Strategy](#) Channel View Publications Water control and management have been fundamental to the building of human civilisation. In Europe, the regulation of major rivers, the digging of canals and the wetland reclamation schemes from the sixteenth to nineteenth centuries, generated new typologies of waterscapes with significant implications for the people who resided within them. This book explores the role of waterways as a form of heritage, culture and sense of place and the potential of this to underpin the development of cultural tourism. With a multidisciplinary approach across the social sciences and humanities, chapters explore how the control and management of water

flows are among some of the most significant human activities to transform the natural environment. Based upon a wealth and breadth of European case studies, the book uncovers the complex relationships we have with waterways, the ways that they have been represented over recent centuries and the ways in which they continue to be redefined in different cultural contexts. Contributions recognise not only valuable assets of hydrology that are at the core of landscape management, but also more intangible aspects that matter to people, such as their familiarity, affecting what is understood as the fluvial sense of place. This highly original collection will be of interest to those working in cultural tourism, cultural geography, heritage studies, cultural history, landscape studies and leisure studies. *The Rough Guide to Croatia* Penguin This book takes a multidisciplinary look at various hot issues in present day tourism development, including studying how global the industry has become; new forms of travel like space tourism; new trends in

marketing and promotion. [Tourism and Foreign Direct Investment](#) Cambridge Scholars Publishing As other emerging economies reliant on tourism (about 25 percent total contribution of tourism-related industries in GDP and employment), Croatia has been hit hard by the pandemic and two devastating earthquakes, leading the economy to contract by 8.0 percent in 2020. Vaccinations have been rolled out to about 38 percent of the population (end-June 2021). Staff projects growth to bounce back to 5.4 percent in 2021, driven by a rebound in the services sector and investment, aided by fiscal and monetary policies, and bolstered by large EU grants over the medium-term. **Traditions and Innovations in Contemporary Tourism** CABI A profitable industry which continues to grow rapidly.
