From the bestselling social commentator and cultural historian comes Barbara Ehrenreich's fascinating exploration of one of humanity's oldest traditions: the celebration of communal joy In the acclaimed *Blood Rites*, Barbara Ehrenreich delved into the origins of our species' attraction to war. Here, she explores the opposite impulse, one that has been so effectively suppressed that we lack even a term for it: the desire for collective joy, historically expressed in ecstatic revels of feasting, costuming, and dancing. Ehrenreich uncovers the origins of communal celebration in human biology and culture. Although sixteenth-century Europeans viewed mass festivities as foreign and "savage," Ehrenreich shows that they were

indigenous to the West, from the ancient Greeks' worship of Dionysus to the medieval practice of Christianity as a "danced religion." Ultimately, church officials drove the festivities into the streets, the prelude to widespread reformation: Protestants criminalized carnival, Wahhabist Muslims battled ecstatic Sufism, European colonizers wiped out native dance rites. The elites' fear that such gatherings would undermine social hierarchies was justified: the festive tradition inspired French revolutionary crowds and uprisings from the Caribbean to the American plains. Yet outbreaks of group revelry persist, as Ehrenreich shows, pointing to the 1960s rock-and-roll rebellion and the more recent "carnivalization" of sports. Original, exhilarating, and deeply optimistic, *Dancing in the Streets* concludes that we are innately social beings, impelled to share our joy and therefore able to envision, even create, a more peaceable future. "Fascinating . . . An admirably lucid, level-

headed history of outbreaks of joy from Dionysus to the Grateful Dead."—Terry Eagleton, *The Nation*
[Unfear: Transform Your Organization to Create Breakthrough Performance and Employee Well-Being](#) Joy, Inc. How We Built a Workplace People Love Buildings have often been studied whole in space, but never before have they been studied whole in time. How Buildings Learn is a masterful new synthesis that proposes that buildings adapt best when constantly refined and reshaped by their occupants, and that architects can mature from being artists of space to becoming artists of time. From the connected farmhouses of New England to I.M. Pei's Media Lab, from "satisficing" to "form follows funding," from the evolution of bungalows to the invention of Santa Fe Style, from Low Road military surplus buildings to a High Road English classic like Chatsworth—this is a far-ranging survey of unexplored essential territory. More than any

other human artifacts, buildings improve with time—if they're allowed to. *How Buildings Learn* shows how to work with time rather than against it.

Joy at Work McGraw Hill Professional

Nineteen-year-old Joy Louie has run away from her home in 1950s America to start a new life in China. Idealistic and unafraid, she believes that Chairman Mao is on the side of the people, despite what her family keeps telling her. How can she trust them, when she has just learned that her parents have lied to her for her whole life, that her mother Pearl is really her aunt and that her real father is a famous artist who has been living in China all these years? Joy arrives in Green Dragon Village, where families live in crowded, windowless huts and eke out a meagre existence from the red soil. And

where a handsome young comrade catches her eye... Meanwhile, Pearl returns to China to bring her daughter home - if she can. For Mao has launched his Great Leap Forward, and each passing season brings ever greater hardship to cities and rural communes alike. Joy must rely on her skill as a painter and Pearl must use her contacts from her decadent childhood in 1930s Shanghai to find a way to safety, and a chance of joy for them both.

Haunting, passionate and heartbreakingly real, this is the unforgettable new novel by the internationally acclaimed Lisa See.

Imagine that you are a corporate executive or small business owner in a midwestern city under water after weeks of extreme weather and drenching rainfall. Infrastructure has been damaged beyond repair, transportation arteries are closed, and your supply chain is broken. Families have been driven from homes, food and water are in short supply, and people are becoming unruly. Government agencies are not in a position to help. Declining revenue and partisan

antipathy fueled by ideological differences have eroded confidence in government. The city is in total disrepair and unable to deliver desperately needed services. It is edging toward implosion and community leaders have turned to you for help. Catastrophe that would have been unthinkable in earlier times is a reality in a world coming out of pandemic and facing existential threats such as climate change, inequality and global conflict.

Catastrophic Risk:

Business Strategy for Managing Turbulence in a World at Risk challenges business to step up and assume a pivotal role with communities under stress due to prolonged exposure to risk. When powerful societal forces meet behavior that deters response to risk, the consequences of risk are exacerbated. The compounding effect of behavior on risk has opened an important role for business in mobilizing people and communities in times of crisis. It is a role that cannot be fulfilled, however, without purpose, strategy and plans sufficiently robust to overcome the threat of risk. To prosper in this environment, business will

need to make a significant contribution to society as well as to deliver financial performance. For companies, this will mean involvement in community in ways that significantly depart from current practice. For leaders, it will mean new skills—contextual sensitivity, a greater understanding of behavioral dynamics, and enhanced capacity to relate to people on an emotive basis. This book is about the relationship between risk, societal forces and human behavior—a relationship informed by the sciences that is critically important for business. Its goal is two-fold: to bring catastrophic risk to the world of business and to further business engagement in service to the common good.

The Power of Passion and Perseverance Tyndale House Publishers, Inc. A 2018 Nautilus Book Award Winner for Business and Leadership! The founder of Menlo Innovations and author of the business culture cult classic *Joy*, Inc offers an inspirational guide to leaders seeking joy in the challenge of leading others. Rich Sheridan's *Joy*, Inc. told the story of how his tiny software

company in Ann Arbor, Michigan achieved success and renown by embracing offbeat culture and human-centered values. In *Chief Joy Officer*, he turns his attention from culture to leadership, and draws on his experience running Menlo and consulting elsewhere to offer a wise, provocative guide on how anyone can build leadership capacity for joy within their own organization. *Chief Joy Officer* offers sage, hard-won advice to any manager or leader who yearns to make more of an impact on the lives of others, including: * Self-understanding is the cornerstone for every virtue of leadership: authenticity, trust, humility, and optimism. * Good leaders make more leaders: Learn to judge your performance not on whether people are doing what they're told, but whether they're developing independent leadership capacity. * Influencing up is just as important as influencing down: how to encourage different thinking in those above you in your organizations. Filled with colorful anecdotes from Sheridan's personal journey and wisdom from many leadership mentors,

Chief Joy Officer offers an approachable, down-to-earth philosophy and practice that will help even the most disillusioned of middle managers bring a renewed sense of purpose to their work building others.

For decades, Alan Siegel and Irene Etzkorn have championed simplicity as a competitive advantage and a consumer right. Consulting with businesses and organizations around the world to streamline products, services, processes and communications, they have achieved dramatic results. In *SIMPLE*, the culmination of their work together, Siegel and Etzkorn show us how having empathy, striving for clarity, and distilling your message can reduce the distance between company and customer, hospital and patient, government and citizen—and increase your bottom line. Examining the best and worst practices of an array of organizations big and small—including the IRS, Google, Philips, Trader Joe's, Chubb Insurance, and ING Direct, and many more—Siegel and Etzkorn recast

simplicity as a mindset, a design aesthetic, and a writing technique. In these illuminating pages you will discover, among other things: Why the Flip camera became roadkill in the wake of the iPhone What SIMPLE idea allowed the Cleveland Clinic to improve care and increase revenue How OXO designed a measuring cup that sold a million units in its first 18 months on the market Where Target got the idea for their "ClearRX" prescription system How New York City simplified its unwieldy bureaucracy with three simple numbers By exposing the overly complex things we encounter every day, SIMPLE reveals the reasons we allow confusion to persist, inspires us to seek clarity, and explores how social media is empowering consumers to demand simplicity. The next big idea in business is SIMPLE.

 A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In *Seven Games*, Oliver Roeder charts their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against “modern rationalism”; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal

stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, *Seven Games* is a story of obsession, psychology, history, and how play makes us human.

 #3 New York Times Advice/How-To Bestseller
 #7 Wall Street Journal Nonfiction Bestseller "This book is game changing in a way I have never seen in a business book. I learned about myself and gained new insights into the work I've been doing for thirty years. It is a spectacular read." – John Riccitiello, CEO, Electronic Arts This is not a

management book. This is a book for managers. Ever have the feeling that no matter how rewarding your job is that there's an entirely different level of success and fulfillment available to you? Linger in the mist, just out of reach... There is, and Stan Slap is going to help you get it. You hold in your hands the book that entirely redraws the potential of being a manager. It will show you how to gain the one competency most critical to achieving business impact, but it won't stop there. This book will put a whole new level of meaning into your job description. You will never really work for your company until your company really works for you. Bury My Heart at Conference Room B is about igniting the massive power of any manager's emotional commitment to his or her company—worth more than financial, intellectual and physical commitment combined. Sometimes companies get this from their managers in the early garage days or in times of tremendous gain, but it's almost unheard of to get it on a sustained, self-reinforced basis. Of course your company is only going to get it if you're willing to

give it. Slap proves that emotional commitment comes from the ability to live your deepest personal values at work and then provides a remarkable process that allows you to use your own values to achieve tremendous success. This is not soft stuff; it is the stuff of hard-core results. *Bury My Heart at Conference Room B* is the highest-rated management development solution at a number of the world's highest-rated companies—companies that don't include "patience" on their list of corporate values. It has been exhaustively researched and benchmarked with tens of thousands of real managers in more than seventy countries. You'll hear directly from managers about how this legendary method has transformed their careers and their lives. As *Big as It Gets* Stan Slap is doing nothing less than making the business case for a manager's humanity-for every manager and the companies that depend on them. *Bury My Heart at Conference Room B* gives managers the urgency to change their world and the energy to do it. It will stir the soul, race the heart, and throb the foot

used for acceleration. *Buckle Up. We're Going Off-Road.* Slap is smart, provocative, wickedly funny and heartfelt. He fearlessly takes on some of the most cherished myths of management for the illogic they are and celebrates the experience of being a manager in all of its potential and potential weirdness. And he talks to managers like they really talk to themselves.

Joy at Work A&C Black Today success comes from building products people love, creating loyal customers and serving the broader stakeholder community. In this thoughtful exploration on the future of work, the authors explore the past, present and future of the "project." And why, in today's fast changing & hyper-competitive world, running a temporary endeavour is the wrong approach to building sustainable products and how #noprojects is fundamentally changing the way companies work. The metrics by which we have historically defined success are no longer applicable and we need to re-examine the way value is delivered in the new economy. This book starts from the premise that our goal is to create value, for

Two top experts on high-performing organizations show you how to reframe your—and your employees'—relationship with fear and anxiety to create a learning culture of engaged workers at the top of their game. Fear and uncertainty have been undermining performance and well-being in the workplace for as long as we have had workplaces. Here's a little-known fact of business: mismanaged fear is responsible for almost all of the dysfunction that most organizations experience. While fear can drive short-term results, it does so at the cost of high employee burnout and turnover. It also undermines long-term business performance. But we can't eradicate it entirely; it is inherent to the human

condition. Winning organizations aren't fear-free; they know how to reframe fear into opportunities for learning and growth. They create resilient cultures of unfear. In this timely and essential guide, McKinsey alumni Gaurav Bhatnagar and Mark Minukas show leaders: The impact of fear, its biological underpinnings, and the archetypes through which it is expressed as patterns of behavior in organizations. The strategies, techniques, and actions to bring about an unfear transformation. The process begins with yourself—how to become an unfear individual. Transformation doesn't start with systems and structures but with mindsets and behavior—how to build unfear teams. Employee well-being leads to high performance for your business—how to build unfear organizations. This proven approach to workplace anxiety reduces stress, boosts engagement, and overcomes obstacles that get in the way of success. It leads to personal rewards, greater profits, and sustainable growth. This is only possible with a culture of unfear.
