Maternal Child Nursing Care - E-Book

Saunders
This book is a concise learning guide dedicated to the full scope of pediatric history-taking and clinical examination, for use in OSCEs as well as clinical life. It guides the reader simply and methodically through what to ask when taking a history, and how to perform a comprehensive physical examination. The book contains more than 30 "History Stations" covering the most common pediatric cases, as well as 10 "Examination Stations" covering examinations of the different body system. It provides students and resident doctors worldwide with the necessary core information for pediatric history-taking and clinical examination, all in a brief and interesting format. The book adopts a reader-friendly format through a lecture-note style and the use of Key Points, Clinical Tips, Notes, Tables, and Boxes listing the most important features. It is also richly illustrated, demonstrating the correct way to perform clinical

examinations. Written "by a resident, for residents and medical students," this book has been revised, foreworded, and peer-reviewed by fourteen prominent authorities in the field of Pediatrics from various parts of the world (including the United States, United Kingdom, Australia, Italy, Canada, and India), and from different universities (Illinois, Pennsylvania, Washington, Oxford, Edinburgh, Keele, Melbourne, Toronto, Parma, and Florence Universities). These experts recommend this book for medical students, pediatric residents, and pediatric practitioners, as well as pediatricians.

Reproductive, Maternal, Newborn, and Child Health Saunders
The new edition of this practical text provides a solid and completely current foundation in obstetric and pediatric nursing. Retaining a systems format, it offers a strong emphasis on the key themes of family-centered care, health promotion and illness prevention, women's health issues, and the growth and development of both the child and the parent. Over 660 crisp figures and tables clarify key concepts. And, abundant multiple-choice questions and vocabulary terms enhance communication and critical thinking skills.

Study Guide for Maternal-Child Nursing - E-Book Lippincott Williams & Wilkins
Maternal and child morbidity and mortality affect women and children all over the world. In low resource settings, it is often the result of an illness which under other circumstances would be preventable and treatable. The disease burden predominately occurs in developing countries, but the dangers facing women and children are global issues.

To improve conditions for women and children everywhere, we must address maternal and child health in their own right, and ask how they affect each other. The Oxford Textbook of Global Health of Women, Newborns, Children, and Adolescents is a comprehensive study of the cycle of life. The development of children is traced from pre-natal through to newborns, childhood, and adolescence. Posing child health against maltreatment, injury, and malnutrition, this book asks uncomfortable but necessary questions, and discusses how to influence policy and inspire change. Following women from adolescence to motherhood, it discusses sexual and reproductive health, HIV, injury, pregnancy, mental health, and much more. With examples from high- and low-resource settings presented by experts in the field, the Oxford Textbook of Global Health of Women, Newborns, Children, and Adolescents is a unique resource for medical practitioners everywhere. Divided into eight sections, it takes a life course approach to female health. With a clear structure, helpful

illustrations, and study questions at the end of each chapter, it is an easy to use manual for healthcare workers treating patients in the clinic and out in the field. Through its descriptions of the main challenges and explanations of the key theories in the field, this is the ideal textbook for medical students in paediatrics, obstetrics, nursing, midwifery, and other related areas. Looking to the future, it is also an invaluable starting point for policymakers and anyone with a general interest in the subject area.
