Imagine coming home, and finding your 17-month old son's body in your bed. Imagine discovering that your wife, or what was once your wife, had taken the life of your son. How would you react? What would you do? "Missing The Links" is a book written by Greg Burchett which vividly describes the tragic event that altered his life forever. Greg takes the reader on an intimate journey, describing

what ultimately led up to this tragedy, how he dealt with the loss of his son, and how he began his recovery. Gluing together the shattered pieces of a life destroyed is often the most difficult thing anyone can experience in their lives. This book offers rare insight into how Greg attempted to be successful in dealing with this tragedy. He starkly discusses his failures, as well. It is vividly written, from his heart, and articulately edited through his mind. This book is different. It is written from a man's perspective. It is written from a husband's perspective. When discussing the murder of a child, very little is available from this perspective. Much has been written clinically, or even from the woman's point-of-view. But the insights of a loving father, a husband who felt a loss of "control" over his life, and on his ultimate strength rediscovered. Finding optimism in the center of turmoil... Admitting you need help... Realizing that there were many "warning signs" or "missing links" which, if recognized, could have avoided such a tragedy. These are the central themes of this book. Themes, that anyone, anywhere, can relate to.

There are many devotional books available containing brief, daily inspirations that benefit all who read them. This book is different in two respects. The first is obvious: it contains two readings per day—732 in all. The second, more important difference is that the author wanted to do more than offer inspiration; this would make this book no different than so many others. The messages in the book are study sketches in that the content is not only inspirational, but also educational, challenging, and encouraging. Most of these writings were based on author Michael J. Akers's teaching of adult Bible studies for more than thirty years and learning what really brought adults to want to deepen their knowledge and application of the Word of God.

An entertaining and illuminating collection of 100 surprising connections between math and the arts. At first glance, the worlds of math and the arts might not seem like comfortable neighbors. But as mathematician John D. Barrow points out, they have a strong and natural affinity—after all, math is the study of all patterns, and the world of the arts is rich with pattern. Barrow whisks us through 100 thought-provoking and often whimsical intersections between math and many arts, from the golden ratios of Mondrian's rectangles and the curious fractal-like nature of Pollock's drip paintings to ballerinas' gravity-defying leaps and the next generation of monkeys on typewriters tackling Shakespeare. For those of us with our feet planted more firmly on the ground, Barrow also wields everyday equations to reveal how many guards are needed in an art gallery or where you should stand to look at sculptures. From music and drama to literature and the visual arts, Barrow's witty and accessible observations are sure to spark the imaginations of math nerds

and art aficionados alike.
