*History of Islamic Architecture* BRILL

A critical rethinking of the way canons are defined, constructed, dismantled, and revised. A century ago, all art was evaluated through the lens of European classicism and its tradition. This volume explores and questions the foundations of the European canon, offers a critical rethinking of ancient and classical art, and interrogates the canons of cultures and regions that have often been left at the margins of art history. It underscores the historical and geographical diversity of canons and the local values underlying them. Twelve international scholars consider how canons are constructed and contested, focusing on the relationship between canonical objects and the value systems that shape their hierarchies. Deploying an array of methodologies—including archaeological investigations, visual analysis, and literary critique—the authors examine canon formation throughout the world, including Africa, India, East Asia, Mesoamerica, South America, ancient Egypt, classical Greece, and Europe. Global studies of art, which are dismantling the traditionally Eurocentric canon, promise to make art history more inclusive. But enduring canons cannot be dismissed. This volume raises new questions about the importance of canons—including those from outside Europe—for the wider discipline of art history.

*The Design Development of Indian Architecture* Legare Street Press

The field of architecture has gradually evolved from being a mere profession to becoming a representation of the society in which we live. Architects form the voice of this profession, and an in-depth discussion with them allows a greater understanding of their theories, visions for architecture, and contributions towards the field, and how they are managing the non-linear societal evolution in a comprehensive manner. This volume brings together 17 iconic Indian architects across generations, and, through dialogues, probes into their lives, beliefs and philosophies, and candid thoughts and opinions. It offers a platform for discussions on the core issues of architecture, and serves as a reference for the state of architecture both in India and globally. The book will appeal to architectural and building industry practitioners and students of

architecture, as well as the general reader, as it speaks about architecture as an integral part of building a nation. It traverses the architecture journey in India, and bestows a clarity on the directions still to be taken.

**The Architecture of India** HarperCollins Publishers

Entitled as it is, this is devoted to the study of the Architecture of Fatehpur Sikri, the township of Akbar, the Great, and its forms, techniques and concepts. The first chapter deals with Babur's Jal-Mahal which has been identified for the first time. The second chapter is on the formative process whereby a cosmopolitan style is formed by the assimilation of disparate building traditions, in respect of Mughal Architecture (which was, originally, a part of the paper for the XXVI International Congress of the History of Art, Washington D.C. 11-18 August 1986).The third chapter studies architecture of Fatehpur Sikri in respect of the sources and determinants of its forms; its town-planning; plan and design of its buildings; and façade and superstructure (in its original form, it was read in the International Symposium on Fatehpur Sikri held at the Harvard University Cambridge Massachusetts, U.S.A. on 17-19 October 1985).Such distinctive features of its architecture as 'khapsre' roof, 'chhappar' and 'ladão' ceilings, 'tibārā' 'duchhattī' and 'jālī' have been studied in separate chapters, in full details, in order to elucidate their significance in the formation of this style. The Hiran-Mīnār and the Panch-Mahal, two representative buildings of Fatehpur Sikri, have similarly been studied in separate chapters, the former in respect of its Meaning and Purpose, and the latter in respect of its Architectural Derivation and Raison d'etre. The problem of 'nomenclature' of medieval monuments which has largely confused their history, has been discussed in the chapter on 'Todarmal's Bārahdarī', which too bears this misnomer a little too heavily, and attempt has been made to identify it architecturally. An introductory chapter on Masons'-Marks has also been given.Amazingly, there is nothing experimental, and Fatehpur Sikri's is a fully developed, 16th century A.D., Native Style of India, with minimal true-arched, true-vaulted and true-domed forms! It is, essentially, STONE-WORK, and even large ceilings have been built, in a wide variety with stone beams-and-slabs, stone ribs-and-panels and stone brackets-chhajjā -an h ols. Its art is a faithful reflection of Akbar's personality, in the right earnest, and his reign (1556-1605 A.D.), which is the most important phase of the Medieval period, cannot be historically comprehensive without study of Fatehpur Sikri.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### It's Complicated

Motilal Banarsidass Publ.

Often described as the soul of Islam, Sufism is one of the most interesting yet least known facet of this global religion. Sufism is the softer more inclusive and mystical form of Islam. Although militant Islamists dominate the headlines, the Sufi ideal has captured the imagination of many. Nowhere in the world is the handprint of Sufism more observable than South Asia, which has the largest Muslim population of the world, but also the greatest concentration of Sufis. This book examines active Sufi communities in Pakistan, India, and Bangladesh that shed light on the devotion, and deviation, and destiny of Sufism in South Asia. Drawn from extensive work by indigenous and international scholars, this ethnographical study explores the impact of Iran on the development of Sufi thought and practice further east, and also discusses Sufism in diaspora in such contexts as the UK and North America and Iran's influence on South Asian Sufism.

**Islamic Architecture in India** Univ of California Press

Illustrations: Numerous B/w Illustrations Description: The Mughals ruled a united north India for over three centuries, but the roots of the glorious monuments they built are found in earlier provincial styles of architecture. In this richly illustrated work, Dr. Elizabeth Schotten Merklinger presents the first comprehensive study of the architecture of the Sultanate period. During the pre-Mughal centuries provincial Islamic styles of architecture developed, some of great importance and originality, each a spontaneous movement arising from its respective rulers and the desire to express particular aesthetic ideals. Many factors influenced these regional styles, the most

important being the indigenous arts prevailing in the region prior to Islam, the technical ability of the craftsmen, the climatic conditions and the strength of the bond each province had with the capital, Delhi. In *Sultanate Architecture of Pre-Mughal India* Elizabeth Schotten Merklinger traces the architectural development of each Sultanate. She shows that each provincial style is a synthesis between opposing spiritual and aesthetic concepts faced by the early Muslims in India. Nowhere else in the Islamic world was the clash of values more pronounced. But it is precisely these counteracting forces which released the enormous energy that resulted in the construction of the splendid monuments of the Mughal age. This book evolved out of a series of lectures on Indian Islamic architecture given at the Oriental Institute, Oxford, in 1991. There has been no update on Indo-Islamic architecture since the definitive work, Percy Brown, *Indian Architecture: Islamic Period*, Bombay, 1956, reprint, 1968.

*The Hindu Temple* John Wiley & Sons

The articles by John Burton-Page on Indian Islamic architecture assembled in this volume give an historical overview of the subject, ranging from the mosques and tombs erected by the Delhi sultans in the 13th, 14th and 15th centuries, to the great monuments of the Mughals in the 16th and 17th centuries.

### THE HEGEMONY OF HERITAGE

Yale University Press

**Delhi in Transition, 1821 and Beyond** Anthem Press

Commissioned by the English East India Company to write about contemporary nineteenth-century Delhi, Mirza Sangin Beg walked around the city to capture its highly fascinating urban and suburban extravaganza. Laced with epigraphy and fascinating anecdotes, the city as 'lived experience' has an overwhelming presence in his work, *Sair-ul Manazil*. Interestingly, Beg made no attempt to 'monumentalize' buildings; instead, he explored them as spaces reflective of the socio-cultural milieu of the times. *Delhi in Transition* is the first comprehensive English translation of

Beg's work, which was originally published in Persian. It is the only translation to compare the four known versions of *Sair-ul Manazil*, including the original manuscript located in Berlin, which is being consulted for the first time. Shama Mitra Chenoy's exhaustive introduction and extensive notes, along with the use of varied styles in the book to indicate the multiple sources of the text, contextualize Beg's work for the reader and engage him with the debate concerning the different variants of this unique and eclectic work.

Through lucid visual analysis, accompanied by drawings, this book will allow readers to appreciate the concepts underlying designs that at first sight often seem bewilderingly intricate. The book will be divided into six parts that cover the history and development of the design and architecture of Indian temples.

*Indian Painting* BRILL

Johnson provides an historically rich examination of the intersection of early twentieth-century imperial culture, imperial politics, and imperial economics as reflected in the colonial built environment at New Delhi, a remarkably ambitious imperial capital built by the British between 1911 and 1931.

**Indian Art at Delhi, 1903. Being the Official Catalogue of the Delhi Exhibition, 1902-1903** Springer

A survey of the built environment distills the work of legendary author and illustrator Francis D. K. Ching into a single volume *Introduction to Architecture* presents the essential texts and drawings of Francis D. K. Ching for those new to architecture and design. With his typical highly graphic approach, this is the first introductory text from Ching that surveys the design of spaces, buildings, and cities. In an easy to understand format, readers will explore the histories and theories of architecture, design elements and process, and the technical aspects of the contemporary profession of architecture. The book explains the experience and practice of architecture and allied disciplines for future professionals, while those who love the beauty of architecture drawing will delight in the gorgeous illustrations included. Overview of the issues and practices of architecture in an all-in-one introductory text Includes new chapters and introductory essays by James Eckler, and features more than 1,000 drawings throughout Professor Ching is the bestselling author of numerous books on architecture and design, all published by Wiley; his works have been translated into 16 languages and are regarded as classics for their renowned graphical presentation For those pursuing a career in architecture or anyone who loves architectural design and drawing, *Introduction to Architecture* presents a beautifully illustrated and comprehensive guide to the subject.
