The jute commodity
system as prevalent in the
Indian subcontinent is a
conglomeration of
paradoxes. Jute was once
called the golden fibre on

account of its contribution
to means of livelihood to
millions of farmers,
traders, manufacturers in
the unorganized sector,
mill workers in the
organized sector as well
scores of people
employed in the service
sector relating to trading,
manufacturing and
exports of jute and jute
goods. Jute industry along
with textile manufacturing
provided the foundation of
modern manufacturing
industry in India.
Simultaneously, this
industry was also the
fountain head of the
growth of private
entrepreneurship and
capital in India. Most of
the traditional Industrial
Houses in India grew out
of trading and
manufacturing of jute and
jute goods, coal and tea.
On the other hand most of
the farmers involved in
cultivation of natural
fibres like jute are small
and marginal farmers.
Without alternative
avenues of gainful
employment elsewhere,
these millions in South
Asia would be deprived of
a part of their livelihood.
The entire commodity

chain of natural fibres is
characterized by low
productivity, low value
addition, high volumes
and low returns. The
advent and discovery of
mineral oil helped exploit
cheap HDPE and PP
polyethylene sacks, which
started replacing the
natural fibre based
packaging materials. As a
result, the jute industry
got wiped out from
Europe, America and the
Far East. Today, it is
survived in the Indian
subcontinent and to a
lesser extent in Brazil. The
unique feature of the
volume is that it focuses
on the first hand
experience of the policy-
makers and other
stakeholders in the jute
commodity system, who
are confronted with a
dilemma of reviving a
declining economic
subsector. At this
juncture, when there is
need for a Commodity
Development Strategy
suitable to the ethos of a
commodity like the jute
fibre, the present,
volumes attempts to
devise such a strategy
thorough analysis of the
system based on

authentic and up-to-date information. The Book furnishes an erudite analysis and stock-taking of the jute commodity system. This analysis points out to the fact that there is a need for a holistic, systemic approach to the problems being faced by this sector focusing on the economic exploitation of the whole jute plant; holistic research for addressing productivity and processing efficiency in the entire commodity chain of jute; and creating a network of organisations for advocacy for jute and allied fibres, which would focus on repositioning the golden fibre as sustainable and eco-friendly commodity with the help of green and sustainable development advocacy groups. The Commodity Development Strategy highlights the need for greater effort for significant degree of product diversification which would entail significant consumption of the fibre or fabric in volume terms. The volume ends with an optimistic note with ideas of inclusive development under the Millennium Development Goals and Carbon Credits Sustainable Development under the United Nations

Framework Convention on Climate Change the welcome paradigm shifts in the approach to the jute sector. The effort by Sh Roul is a timely one on the eve of the observance of 2009 as International Year for Natural Fibres by the United Nations. The book is quite comprehensive with its focus on a wide range of issues pertaining to the jute agri-commodity system addressed against a historical background and from macro-economic analytical perspective. The volume offers stimulating reading for those interested in the dynamics of agricultural commodity systems like jute and allied fibres. The book is expected to help sensitise national governments, international organizations and nongovernmental organizations towards the eco-sustainability of jute as a natural fibre. The book can serve as an excellent reference book for post-graduate students in economics, jute and textiles management, development studies, regional development and agriculture and agro-marketing. Graphic Communications Group It is very hard for me to explain that dark period of my life. After I came out of the party, I ran. I ran a lot; I don't know how many kilometers I had covered, or who was crying, me or my heart. Then I found myself on a bridge on that terrible night, and as I looked around, it was dark, calm, and silent. Hence I started crying again. I couldn't control the tears which were rolling down my cheeks. Even my heart was drenched in the storm. Why am I crying? I asked myself. I was unable to understand what I should go back for. As I looked around, it was barren, all barren like my life, and finally, I moved towards my residence. As I closed my door a sudden thought struck my mind. If

he does come, how do I welcome him? Look at the madness I am still in! As I entered my flat I found that everything was wrecked. My bedroom was open, and I rushed towards it. The mattress was torn open, the bedsheet was in tatters. The mirror was shattered. Everything was ruined, and I thought to call the police. Then suddenly I saw a diary on the corner of the bed and a red "Pierre Cardin" pen. Then I realized that all this wreckage was done by him. Each thing that we had shared was either broken or torn by him. And he had left that diary for me to understand what had happened to him and his journey till then. But was he interested in my journey and how I lived it without him?

Life is a balancing act and opposites do attract: Life and Death; God and Devil; Weak and Strong; Man and Woman; Wrong and Right; Black and White; and Day and Night. The conflict continue... A just and placid world will be a boring one. So, we have the unjust and perturbed one... just to restore balance and make everything equal.

However, equality is a cruel word. Ask the pans of a balancing scale; put Adam in one and Eve in the other, and you have a story to tell.

Incredible. Recent years have witnessed the educational scene, especially the higher education sector in the State undergoing a sea change in respect of quality, diversity and accessibility in tune with the global trends. Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhama, the inventor of the digit Zero. In fact, education in Kerala has now become more value added and affordable, thanks to the pro-active initiatives of the State Government and active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come. With the most sought after professionals and excellent network of institutes Kerala is becoming the very

preferred educational destination in the world. And, we are equipped for you with some elucidations which step-up her significance in the educational map. In Campus Plus, we propose some valuable information along with a number of educational institutes in the State which will be useful for the students and parents in the higher education scenario.

The purpose of writing my autobiography is to share all the events, I have passed through my life, from childhood to the present stage when I am in the last phase of life. It has been my experience that each life stage provides different experiences depending upon the persons and reactions one gets to live with. In my opinion the childhood period, I assume it is then up to the age of 12 years, it is a memorable stage, which one bears life long, and one remains unattached to a period when the mind is receptive to everything, and a child of that age is still unbiased, neither he knows much about himself, nor he is calculative about the other and the surroundings us. Most of

the time he or she works as per instincts imbibed in him by nature. That period of my life still enchants me to an extent that usually loves to cherish dreams.
