ACM ICPC World Finals

2017 Acm Icpc Problems
SolutionsThe International

Collegiate Programming Contest is an algorithmic programming contest for college students. Teams of three, representing their university, work to solve the most real-world problems, fostering collaboration, creativity, innovation, and the ability to perform under pressure. Through training and competition, teams challenge each other to raise the bar on the possible. The ICPC International Collegiate Programming Contest Finding the optimal cost of doing so is the actual problem we are solving here. I'm doing that later using the min cost matching, others are doing it using the mincost maxflow. In the part of my solution you are quoting I'm just computing the cost of one special case: the one where each party is served by a different team. ACM-ICPC World Finals Problems Solutions - Codeforces ACM ICPC World Finals 2017 Solution sketches Disclaimer This is an unofficial analysis of some possible ways to solve the problems of the ACM ICPC World Finals 2017.
