management system for diesel vehicles. It regulates the functions of the injection system and guarantees that the engine provides the requested engine torque. The injection is constantly adjusted to both the engine and the driving situation. Diesel engines with a Bosch engine management system impress with their maximum dynamic performance and minimal fuel consumption and emissions. Diesel engine management - Bosch Mobility Solutions Bosch has set aside about 1.2 billion euros (\$1.5 billion) for legal risks related to investigations into diesel-engine manipulation and cartel probes, up from 1.1 billion euros a year ago, Chief ... Bosch Says It's Made a Breakthrough That Can Save Diesel ... Bosch makes this possible with, for instance, a rapid-response air management system and sophisticated thermal management of the exhaust-gas treatment system. Regarding the air management system: the more dynamic the driving style, the more dynamic exhaust gas recirculation must be as well. Turbochargers that respond more quickly than before meet these

requirements. The combination of high- and low-pressure exhaust gas recirculation makes the air management system even more flexible. The future of Diesel - Bosch Mobility Solutions It focusses on minimizing emissions and exhaust-gas treatment.
