Book Launch: Making Sense of Chaos by J. Doyme
Farmer - 12 June 2024
Monetary Policy and Real Exchange Rate
Dynamics in Sticky-Price Models
Personalized intervention cardiology with
transcatheter aortic valve replacement made
possible with a non-invasive monitoring and
diagnostic framework
Dynamic General Equilibrium Modeling
Computational
Computational Physics & Fluid Dynamics
Unemployment Fluctuations and Stabilization
Policies: A New Keynesian Perspective

Rare earth supply disruptions have long-range impacts, computer model shows
A Vision to Compute like Nature:
Thermodynamically
RBI Study Says Increase In Default Risk Leads To Rise In Interest Rate Spread And Decline In Credit Growth
How computational analysis of a 3D mucociliary clearance model can help predict drug uptake and lead to more generic nasal drug products
Joe Biden's experiment could revolutionise economic thinking
Neutral quasispecies evolution and the maximal entropy random walk
Monetary and Fiscal Policy Analysis with DSGE Models (DSGE)
A computational model for predicting changes in infection dynamics due to leakage through N95 respirators
What's the difference between human eyes and computer vision?
Programming active cohesive granular matter with mechanically induced phase changes
Argonne study finds rare earth supply disruptions can have long-range impacts
