Alexander University, Incorporated  
 From green frogs and blue angels to white bunnies, modern consumers are confronted by a growing array of colorful eco-labels on everything from coffee to computers. When eco-labels are credible, they can lead to dramatic change in environmental practices broadly and quickly by leveraging the purchasing power of corporate clients (e.g., Walmart and McDonalds) to influence global supply chains. But the credibility of such labels is highly variable; and despite the existence of established practices for eco-labeling, many labels remain little more than superficial exercises in "greenwash." How can consumers separate greenwash from genuine attempts to address environmental challenges? Beyond

Greenwash addresses this question by systematically investigating the credibility of transnational eco-labeling organizations across countries and commercial sectors. Using an innovative proxy measure for credibility that examines adherence to established best practices, Hamish van der Ven proposes a novel theory of rigor and credibility in transnational eco-labeling that upends conventional wisdom. He argues that the credibility of an eco-label does not depend on who creates or manages it-whether a government, industry association, professional standard setter, or environmental NGO. Rather, it depends on which types of businesses use the label. More specifically, eco-labeling organizations that target bigger, consumer-facing retailers tend to create credible eco-labels out of a desire to insulate their clients from critical scrutiny and gain acceptance in new markets. This theory challenges the conventional wisdom that only governments or

environmental NGOs can create meaningful environmental governance and suggests that who is being governed matters as much, if not more, than who is doing the governing.

Teachers and flutists at all levels have praised Nancy Toff's *The Flute Book*, a unique one-stop guide to the flute and its music. Organized into four main parts--The Instrument, Performance, The Music, and Repertoire Catalog--the book begins with a description of the instrument and its making, offers information on choosing and caring for a flute, sketches a history of the flute, and discusses differences between members of the flute family. In the Performance section, readers learn about breathing, tone, vibrato, articulation, technique, style, performing, and recording. In the extensive analysis of flute literature that follows, Toff places individual pieces in historical context. The book ends with a comprehensive catalog of solo and chamber repertoire, and includes appendices with fingering charts as well as lists of current flute manufacturers, repair shops, sources for flute music and books, and flute clubs and related organizations worldwide. In this Third Edition, Toff has updated the book to reflect technology's advancements--like new digital recording technology and recordings' more prevalent online availability--over the last decade. She has also accounted for new scholarship on baroque literature; recent developments such as the contrabass flute, quarter-tone flute, and various manufacturing refinements and experiments; consumers' purchase prices for flutes; and a thoroughly updated repertoire catalog and appendices.

Compositional Process in Elliott Carter's String Quartets is an interdisciplinary study examining the evolution and compositional process in Elliott Carter's five string quartets. Offering a systematic and logical way of unpacking concepts and processes in these quartets that would otherwise remain opaque, the book's narrative reveals new aspects of understanding these works and draws novel conclusions on their collective meaning and Carter's place as the leading American modernist. Each of Carter's five string quartets is driven by a new idea that Carter was exploring during a particular period, which allows for each quartet to be examined under a unique lens and a deeper understanding of his oeuvre at large. Drawing on key ideas from a variety of subjects including performance studies, philosophy, music cognition, musical meaning and semantics, literary criticism, and critical theory, this is an informative volume for scholars and researchers in the areas of music theory and musicology. Analyses are supplemented with sketch study, correspondence, text manuscripts, and other archival sources from the Paul Sacher Stiftung, the Library of Congress, and the New York Public Library.
