"Rosen has broken entirely new ground in what will surely remain the definitive study of urban prostitution in America for many years to come." -- Times Literary Supplement

Living and Working in Britain Council of Europe

This book illustrates how intimate workers in different socio-cultural contexts negotiate the commercial uses of their sexuality, identity, affect, and bodies, thereby often defying inequality, impoverishment, and resource depletion in their regions. The studies shed light on the multi-faceted experiences of subjects involved in intimate economies, oscillating between personal empowerment and agency, as well as the required subjection to the demands of the current market regime, entailing participation in precarious employment, often involving bodily risk, economic exploitation and stigmatization. The contributions demonstrate the interrelatedness of market intimacy, family economies, and transnational care arrangements, and thereby challenge Western notions of the subject and the free market.

This unique book draws on nearly two hundred face-to-face interviews that the author conducted on the streets with heroin-addicted street prostitutes in Southern California and their counterparts in four large Mexican cities. It illustrates the significant and surprising differences in the risk of exposure to HIV and other STDs that exist between street prostitutes in the two countries; differences arising from the legality, sociology, and economics of sex work in each country. Helpful tables and an appendix containing the author's survey questions make the data in this well-referenced book easily understandable.

A growing body of evidence demonstrates that improvements in the status of women and girls – however worthy and important in their own right – also drive the prosperity, stability, and security of families, communities, and nations. Yet despite many indicators of progress, women and girls everywhere – including countries of the developed world – continue to confront barriers to their full and equal participation in social, economic, and political life. Capturing voices and experiences from around the world, this work documents the modern history of the global women's

movement - its many accomplishments and setbacks. Drawing together prominent pioneers and contemporary policymakers, activists, and scholars, the volume interrogates where and why progress has met resistance and been slowed, and examine the still unfinished agenda for change in national and international policy arenas. This history and roadmap are especially critical for younger generations who need a better understanding of this rich feminist legacy and the intense opposition that women's movements have generated. This book creates a clear and forceful narrative about women's agency and the central relevance of women's rights movements to global and national policy-making.. It is essential reading for activists and policymakers, students and scholars alike.

Prominent experts from science and the humanities explore issues in robot ethics that range from sex to war. Robots today serve in many roles, from entertainer to educator to executioner. As robotics technology advances, ethical concerns become more pressing: Should robots be programmed to follow a code of ethics, if this is even possible? Are there risks in forming emotional bonds with robots? How might society—and ethics—change with robotics? This volume is the first book to bring together prominent scholars and experts from both science and the humanities to explore these and other questions in this emerging field. Starting with an overview of the issues and relevant ethical theories, the topics flow naturally from the possibility of programming robot ethics to the ethical use of military robots in war to legal and policy questions, including liability and privacy concerns. The contributors then turn to human-robot emotional relationships, examining the ethical implications of robots as sexual partners, caregivers, and servants. Finally, they explore the possibility that robots, whether biological-computational hybrids or pure machines, should be given rights or moral consideration. Ethics is often slow to catch up with technological developments. This authoritative and accessible volume fills a gap in both scholarly literature and policy discussion, offering an impressive collection of expert analyses of the most crucial topics in this increasingly important field.

A Sexual Odyssey DigiCat

There is no doubt that the triads have become recognized as a sophisticated and international criminal force and, following the handover of Hong Kong to China, there have been increasing fears that their influence will spread to the West through emigration. This book investigates the reality behind the myth with a study of the Hong Kong triads, generally regarded as the headquarters of triad societies throughout the world. Yiu Kong Chu examines their origins, their organized extortion from legitimate businesses large and small, and their more recent moves into illegal activities such as drug trafficking, human smuggling and gambling. Contrary to the popular belief that Hong Kong triads are replacing the Italian Mafia as the most powerful criminal organization in the world, this book argues that Hong Kong triads may be declining, as other ethnic Chinese crime gangs emerge as powerful crime groups in Western societies. Based on interviews with ex triad members and victims of the triads, police from Hong Kong, mainland China and Europe, as well as documentary evidence *The Triads as Business* gives a vivid and compelling picture of the triads as part of a wider society.

Our mystery selections kick off with "A Matter of Trust," N.M. Cedeño's tale of a genetic genealogy detective trying to prove an

illegitimate child's claim to a family trust. Thanks to Acquiring Editor Michael Bracken for this one. And Acquiring Editor Barb Goffman has a Halloween-appropriate tale in "Grimalkin," by Mark Thielman, in which a cat may be more than it seems. We also have fantasist Phyllis Ann Karr's first sale—which turns out to be a mystery!—and a novel by British master J.S. Fletcher. And, of course, no issue is complete without a solve-it-yourself puzzler from Hal Charles. Continuing our seasonal celebration of all things Halloween, we have a pair of dark delights—tales by Adrian Cole and me. Have some ghoulish shivers on us! For lovers of science fiction, we have a terrific recent tale by Norman Spinrad, plus classics by Charles V. De Vet and Lester del Rey. Great stuff. Here's the complete lineup: *Mysteries / Suspense / Adventure*: "A Matter of Trust," by N.M. Cedeño [Michael Bracken Presents short story] "The Case of the Munificent Musketeer," by Hal Charles [Solve-It-Yourself Mystery] "Grimalkin," by Mark Thielman [Barb Goffman Presents short story] "An Economical Means of Murder," by Phyllis Ann Karr [short story] *The Herapath Property*, by J.S.
