Bridging the Gaps Between Research, Practice, and Policy DIANE Publishing

Violence and Maltreatment in Intimate Relationships provides current and complete coverage of physical, sexual, and psychological abuse that occurs within intimate relationships. Authors Cindy L. Miller-Perrin and Robin D. Perrin, co-authors of SAGE's best-selling Family Violence Across the Life, Third Edition, have created a streamlined organizational framework in Violence and Maltreatment in Intimate Relationships which presents information to students in an accessible manner. In this new book, Miller-Perrin and Perrin have teamed up with renowned researcher Claire M. Renzetti, who draws on her extensive work on violence against women. The book offers both a sociological and psychological focus, examining traditional areas of interpersonal violence as well as forms of intimate abuse outside the family, and concludes with a call for appropriate social, legal, policy, and personal responses to address the problem of abuse in intimate relationships.

An Introduction SAGE Publications

This updated and expanded edition provides comprehensive coverage of the theory and practice of counselling survivors of child sexual abuse (CSA). In a reasoned and thoughtful approach, this book honestly addresses the complex issues in this important area of work, providing practical strategies valuable and new insights for counsellors.

CHILD ABUSE AND NEGLECT

Rowman & Littlefield

This book offers a multidisciplinary and research-based approach to the study of child maltreatment and juvenile delinquency. By examining children as victims, children as perpetrators, and the relationship between the two, Tang provides an innovative and accessible core text for courses across psychology, social work, and criminal justice.

Social Policy for Children and Families SAGE

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

Emotional Abuse of Children SAGE Publications

The twentieth century left humanity in despair. Two World Wars caused the death of more than seventy million people. The Holocaust of the Jews and genocide against other groups left us the images of factories of death and names of unimagined cruelty. Humanity learned about its unlimited ability to inflict suffering and death. Hell appeared as a human-made reality. Two educators, the Polish-Jewish educator and children's rights advocate Janusz Korczak (murdered in Treblinka in 1942), and Yitzhak Katzenelson, a Bible teacher, dramatist and a poet (murdered in Auschwitz in 1944), shared the same historical reality but responded in very different ways. A comparative study of their legacies leads explores questions of identity, leadership, and the educators' role in the face of totalitarianism, terror and genocide. The book may appeal to teachers in all disciplines who deal with their identity as educators, and to historians and civic rights activists in any society, culture or nationality.

International Safeguards for Children in Sport SAGE

The Glass Castle Walter de Gruyter GmbH & Co KG

Research and clinical expertise are brought together in this practical volume to examine whether the following violence can be predicted : battered women being killed by their partners; battered women killing their partners; children being physically and/or sexually abused; and sexual offenders and batterers re-offending. Following an introduction to theoretical and clinical issues involved in the prediction of violence, the contributors present research and theory in language that is accessible to clinicians. They discuss accurate measurement using tested instruments, the role of clinical observations, and health and judicial implications.

Child and Family Advocacy Springer Science & Business Media

The impact of child maltreatment on victims, families, and society—from immediate medical care and legal services to long-term mental health care and law enforcement—cannot be understated. And it remains a severe problem in spite of increasing public awareness and stricter laws. To keep up with growing body of professionals staying informed on this subject, the third edition of *A Practical Guide to the Evaluation of Child Physical Abuse and Neglect* assists the reader in recognizing abuse/neglect (exclusive of sexual abuse) in children and youth, and determining its extent. Illustrated with clinical photographs, the Guide details systematic evaluation procedures, explains the tasks of an evaluation team, and expands and updates the knowledge base in these and other major areas: Specific injuries, including burns, bruises, fractures, and head and abdominal injuries Malnourishment and other forms of neglect Medical child abuse (previously known as Munchausen Syndrome by Proxy) Maltreatment of children with special health care needs Domestic partner violence Prevention strategies, psychosocial assessment, collaborations with law enforcement and the courts, and more The new edition of *A Practical Guide to the Evaluation of Child Physical Abuse and Neglect* offers expert information useful to practitioners across professional domains: public health professionals in maternal and child health and school settings; physicians and nurses; clinical social workers, child psychologists, and school psychologists; and attorneys and law enforcement personnel.

New Directions in Child Abuse and Neglect Research Routledge

Written from a psychological perspective while integrating cross-disciplinary viewpoints, this fully updated Second Edition takes a parent-centered approach to exploring topics such as the reasons behind parental behavior, the effect parents and children have on one another, and social policy's ability to help families. Violence and Maltreatment in Intimate Relationships Routledge

The best-selling *Introduction to Social Work* by Lisa E. Cox, Carolyn J. Tice, and Dennis D. Long takes students to the root of the social work profession by covering its history, practice settings, and career paths within a unique advocacy framework. This advocacy practice and policy model comprised of four components—economic and social justice, a supportive

environment, human needs and rights, and political access—provides an effective lens for viewing today's social issues. Throughout the book, an emphasis on advocacy underscores the transformative opportunities and contributions of social work on not just the clinical/client level, but also at organizational, community, national, and international levels. The Second Edition closely aligns with the latest Educational Policy and Accreditation Standards (EPAS) from the Council on Social Work Education (CSWE) and references the 2018 Code of Ethics from the National Association of Social Workers (NASW). Through the authors' inclusion of reflective practice, students will be encouraged to engage in critical thought and contemplate a career in social work.

CHILD ABUSE

Psychology Press

Child Abuse and Neglect examines the latest research on this important topic, discussing what it entails, how to recognize it, and how to report it. The book begins with an overview of child maltreatment including its history, a summary of the research, and the risk factors, before exploring issues of mandated reporting. It then considers different forms of maltreatment – physical abuse, neglect, psychological maltreatment, sexual abuse, fetal abuse, and Munchausen by Proxy Syndrome. The authors discuss incidence estimates and consequences, as well as resiliency, for each type of maltreatment, and then review legal issues including forensic interviewing. The book concludes by providing an overview of what happens to a child after a report is filed along with suggestions for preventing child maltreatment. This edition has been thoroughly updated throughout to cover the latest theory and research. Referencing the DSM-V, the book also features updated coverage of state and federal laws to reflect new legislation, and additional case studies covering real-world events such as the sexual abuse scandals within USA Gymnastics, the Boy Scouts of America, and the Southern Baptist Convention. Written with students in mind, the book features a wealth of engaging learning tools throughout, including: Theory Highlight boxes, Focus on Research boxes, Case Examples, Legal Examples, Focus on Law boxes, Discussion Questions, and Key Terms. It will be essential reading for all students taking courses on child abuse, child maltreatment, family violence, or sexual and intimate violence taught in psychology, human development, education, criminal justice, social work, sociology, women's studies, and nursing. This book will also be an invaluable resource to workers who are mandated reporters of child maltreatment and/or anyone interested in the problem. This book is based on the legal system and the Child Protection System in the United States of America.

An Introduction Cengage Learning

A Dynamic Perspective Routledge

Current statistics on child abuse, neglect, poverty, and hunger shock the conscience—doubly so as societal structures set up to assist families are failing them. More than ever, the responsibility of the helping professions extends from aiding individuals and families to securing social justice for the larger community. With this duty in clear sight, the contributors to *Child and Family Advocacy* assert that advocacy is neither a dying art nor a lost cause but a vital platform for improving children's lives beyond the scope of clinical practice. This uniquely practical reference builds an ethical foundation that defines advocacy as a professional competency and identifies skills that clinicians and researchers can use in advocating at the local, state and federal levels. Models of the advocacy process coupled with first-person narratives demonstrate how professionals across disciplines can lobby for change. Among the topics discussed: Promoting children's mental health: collaboration and public understanding. Health reform as a bridge to health equity. Preventing child maltreatment: early intervention and public education Changing juvenile justice practice and policy. A multi-level framework for local policy development and implementation. When evidence and values collide: preventing sexually transmitted infections. Lessons from the legislative history of federal special education law. *Child and Family Advocacy* is an essential resource for researchers, professionals and graduate students in clinical child and school psychology, family studies, public health, developmental psychology, social work and social policy.
