The Walking Qur'an Cambridge University Press
 "This book tells the story of an African world that grew out of more than one thousand years of trans-Saharan trade linking the Mediterranean lands of North Africa with the internal Sudanic grasslands stretching from the Nile River to the Atlantic Ocean. It traces the early role of the Sahara, the globe's largest desert, as a divider that separated these two regions into very different worlds. During the heyday of camel caravan traffic--from the eighth-century CE Arab invasions of North Africa to the early-twentieth-century building of European colonial railroads that linked the Sudan with the Atlantic--the Sahara became one of the world's great commercial highways. The most enduring impact of this trade and the common cultural reference point of trans-Saharan Africa was Islam. This faith played various roles throughout the region, as a legal system for regulating trade, an inspiration for reformist religious-political movements, and a vehicle of literacy and cosmopolitan knowledge that inspired creativity--often of a very unorthodox kind--within the various ethno-linguistic communities of the region. From the mid-1400s, European voyages to the coast of West and Central Africa provided an alternative international trade route that marginalized trans-Saharan commerce in global terms but stimulated its accelerated local growth. Inland territorial conquest by France and Britain in the 1800s and early 1900s brought more serious disruptions. Trans-Saharan culture, however, not only adapted to these colonial and postcolonial changes but often thrived upon them to remain a living force well into the twenty-first century"--Provided by publisher.

Of the many pathways out of empire, why did African leaders follow the one that led to the nation-state, whose dangers were recognized by Africans in the 1940s and 50s? Frederick Cooper revisits a long history in which Africans were empire-builders, the objects of colonization, and participants in events that gave rise to global capitalism.

The History of Africa Walter de Gruyter GmbH & Co KG

Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.-- Publisher's description

A Military History of Africa [3 volumes] Harvard University Press

This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa. Stone Age foragers, farmers with iron technology, and pastoralists all interacted to create a complex society before Europeans arrived. In the seventeenth century, Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa. British conquest in the early nineteenth century brought an end to slavery, as well as new forms of colonial domination, tension between the British and the original Dutch settlers, armed struggle between expanding European communities and Africans (including the highly militarized Zulu kingdom), and intensive missionary activity that transformed many African societies. The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor, new clashes between British and Africaners, the final conquest of African societies, and new European migrants. During the twentieth-century, despite further economic development, African communities were increasingly impoverished. New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African and Africaner nationalists. The intensification of resistance in the 1970s and '80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid's economic and political legacy by building a new nonracial society. The book emphasizes social and cultural history, focusing on people's interactions and identities according to race, class, gender, religion and ethnicity. It also addresses changes in literature (both oral and written), music, and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes. While this emphasis reflects dominant trends in historical scholarship for the past two decades, it also includes recent material on environmental history and relationships between African Americans and South Africans. Where relevant, it highlights comparisons between South African and U.S. history. [A New History of Humanity](#) Routledge
 "The book first places Africa in the context of world history at the opening of the seventh century, before examining the general impact of Islamic penetration, the continuing expansion of the Bantu-speaking peoples, and the growth of civilizations in the Sudanic zones of West Africa"--Back cover.

History of Africa Grand Central Publishing

The World and a Very Small Place in Africa is a fascinating look at how contacts with the wider world have affected how people have lived in Niimi, a small and little-known region at the mouth of West Africa's Gambia River, for over a thousand years. Drawing on archives, oral traditions and published works, Donald R. Wright connects world history with real people on a local level through an exploration of how global events have affected life in Niimi. Thoroughly revised and updated throughout, this new edition rests on recent thinking in globalization theory, reflects the latest historiography and has been extended to the present day through discussion of the final years of Gambian President Yahya Jammeh's regime, the role of global forces in the events of the 2016 presidential elections and the changes that resulted from these elections. The book is supported throughout by photographs, maps and Perspectives boxes that present detailed information on such topics as Alex Haley's Roots (part set in Niimi), why Gambians take the risky "back way" to reach Europe, or "Wiri-Wiri," the Senegalese soap that has Gambians' attention. Written in a clear and personal style and taking a critical yet sensitive approach, it remains an essential resource for students and scholars of African history, particularly those interested in the impact of globalization on the lives of real people.

African History: from Ancient Egypt to Modern South Africa - Stories, People and Events That Shaped the History of Africa ABC-CLIO

This edited volume addresses the root causes of Africa's persistent poverty through an investigation of its *longue durée* history. It interrogates the African past through disease and demography, institutions and governance, African economies and the impact of the export slave trade, colonialism, Africa in the world economy, and culture's influence on accumulation and investment. Several of the chapters take a comparative perspective, placing Africa's developments aside other global patterns. The readership for this book spans from the informed lay reader with an interest in Africa, academics and undergraduate and graduate students, policy makers, and those in the development world.

Africa and the Americas: Culture, Politics, and History [3 volumes] Farrar, Straus and Giroux

This handbook places emphasis on modern/contemporary times, and offers relevant sophisticated and comprehensive overviews. It aims to emphasize the religious, economic, political, cultural and social connections between Africa and the rest of the world and features comparisons as well as an interdisciplinary approach in order to examine the place of Africa in global history. "This book makes an important contribution to the discussion on the place of Africa in the world and of the world in Africa. An outstanding work of scholarship, it powerfully demonstrates that Africa is not marginal to global concerns. Its labor and resources have made our world, and the continent deserves our respect." - Mukhtar Umar Bunza, Professor of Social History, Usmanu Danfodiyo University, Sokoto, and Commissioner for Higher Education, Kebbi

State, Nigeria "This is a deep plunge into the critical place of Africa in global history. The handbook blends a rich set of important tapestries and analysis of the conceptual framework of African diaspora histories, imperialism and globalization. By foregrounding the authentic voices of African interpreters of transnational interactions and exchanges, the Handbook demonstrates a genuine commitment to the promotion of decolonized and indigenous knowledge on African continent and its peoples." - Samuel Olorunjoba, Visiting Research Professor, Institute of African Studies, Carleton University Pearson College Division

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Collected in one volume for the first time, *The World and Africa* and *Color and Democracy* are two of W. E. B. Du Bois's most powerful essays on race. He explores how to tell the story of those left out of recorded history, the evils of colonialism worldwide, and Africa's and African's contributions to, and neglect from, world history. More than six decades after W. E. B. Du Bois wrote *The World and Africa* and *Color and Democracy*, they remain worthy guides for the twenty-first century. With a series introduction by editor Henry Louis Gates, Jr., and two introductions by top African scholars, this edition is essential for anyone interested in world history.

Africa in World History From Prehistory to the Present

"Northrup's highly accessible book breaks through the most common barriers that readers encounter in studying African history. Each chapter takes on a common myth about Africa and explains both the sources of the myth and the research that debunks it. These provocative chapters will promote lively discussions among readers while deepening their understanding of African and world history. The book is strengthened by its incorporation of actors and issues representing the African diaspora and African Americans in particular." —Rebecca Shumway, College of Charleston

A prizewinning historian's epic account of the scramble to control

equatorial Africa In just three decades at the end of the nineteenth century, the heart of Africa was utterly transformed. Virtually closed to outsiders for centuries, by the early 1900s the rainforest of the Congo River basin was one of the most brutally exploited places on earth. In *Land of Tears*, historian Robert Harms reconstructs the chaotic process by which this happened. Beginning in the 1870s, traders, explorers, and empire builders from Arabia, Europe, and America moved rapidly into the region, where they pioneered a deadly trade in ivory and rubber for Western markets and in enslaved labor for the Indian Ocean rim. Imperial conquest followed close behind. Ranging from remote African villages to European diplomatic meetings to Connecticut piano-key factories, *Land of Tears* reveals how equatorial Africa became fully, fatefully, and tragically enmeshed within our global world.

The History of a Continent Liveright Publishing

This book explores Africa's involvement in the Atlantic world from the fifteenth century to the eighteenth century. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. African institutions, political events, and economic structures shaped Africa's voluntary involvement in the Atlantic arena before 1680. Africa's economic and military strength gave African elites the capacity to determine how trade with Europe developed. Thornton examines the dynamics of colonization which made slaves so necessary to European colonizers, and he explains why African slaves were placed in roles of central significance. Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors, transferring and transforming African culture in the New World.

A History of Africa John Wiley & Sons

The new, fully-updated edition of the acclaimed textbook covering 200 years of African history *A History of Modern Africa* explores two centuries of the continent's political, economic, and social history. This thorough yet accessible text help readers to understand key concepts, recognize significant themes, and identify the processes that shaped the modern history of Africa. Emphasis is placed on the consequences of colonial rule, and the links between the precolonial and postcolonial eras. Author Richard Reid, a prominent scholar and historian on the subject, argues that Africa's struggle for economic and political stability in the nineteenth century escalated and intensified through the twentieth century, the effects of which are still felt in the present day. The new third edition offers substantial updates and revisions that consider recent events and historiography. Greater emphasis is placed on African agency, particularly during the colonial period, and the importance of the long-term militarization of African political culture. Discussions of the postcolonial period have been updated to reflect recent developments, including those in North Africa. Adopting a long-term approach to current African issues, this text: Explores the legacies of the nineteenth century and the colonial period in the context of the contemporary era Highlights the role of nineteenth century and long-term internal dynamics in Africa's modern challenges Combines recent scholarship with concise and effective narrative Features maps, illustrations, expanded references, and comprehensive endnotes *A History of Modern Africa: 1800 to the Present*, 3rd Edition is an excellent introduction to the subject for undergraduate students in relevant courses, and for general readers with interest in modern African history and current affairs.
