Praise for Accounting Best Practices,
Fifth Edition "For a comprehensive, yet
easy-to-read guide to fixing those all-
too-common shortcomings in your
accounting department, look no further
than this excellent book. Steve Bragg

provides hundreds of fixes, many of
them requiring surprisingly little time or
cost while providing a handy guide to
common implementation pitfalls . . . I
would recommend this invaluable book
to anyone who is looking to enhance
their existing processes, whether due to
growth in their business, compliance
with Sarbanes-Oxley, or just as part of
their ongoing improvement process."
—Martyn Webster, CPA, Director of
FinanceXenoPort, Inc. "This book is
critical to running an efficient and
accurate accounting department. The
use of RFID technology to track

documents is one of many valuable tools in this latest edition. A required read for the demanding accounting manager's role." —Jason Charet, CPA "I've used Steve Bragg's Accounting Best Practices books for years as a source of ideas for improvement. Like the previous editions, the Fifth Edition has a number of new, actionable best practices as well as refinements of those ideas reported in previous editions. The books are broad enough in their perspective so that nearly any organization could find ideas that could pay back the cost of the book many times over." —John Temmerman, Controller Evangelical Lutheran Church in America "What a great resource! I have been in the accounting field for over twenty years, and I was still able to gain insight into improving processes

within my office. Thanks for putting it all in one book!" —Tina M. Thomas, CPA, CTP, Controller Goodman & Company, LLP

The lives of people with disabilities are

complex and various, and there are many situations where technology – particularly assistive technology – already makes a real difference. It is clear that smart phone and tablet computer based solutions continue to enhance the independence of many users, but it is also important that more traditional assistive technologies and services are not forgotten or neglected. This book presents the proceedings of the 14th conference of the Association for the Advancement of Assistive Technology in Europe (AAATE 2017) entitled: ‘Harnessing the power of technology to improve lives’, held in Sheffield, UK, in September 2017. This 4-day event about assistive technologies (AT) highlights the association’s interest in innovating not only technology, but

also services, and addresses the global challenge of meeting the needs of the increasing number of people who could benefit from assistive technology. The 200+ papers in the book are grouped under 30 subject headings, and include contributions on a wide range of topical subjects, including aging well and dementia; care robotics; eHealth and apps; innovations; universal design; sport; and disordered speech. The breadth of the AAATE conference reflects people’s life needs and so the book is sure to contain something of interest to all those whose work involves the design, development and use of assistive technology, whatever the situation. The photo on the front cover illustrates the breadth of assistive technologies that can improve lives.
