A DYNAMIC AND FLEXIBLE

REPERTOIRE FOR BLACK

Two great books from the Everyman Chess Library, *Play the Grünfeld* by Yelena Dembo and *Play the Sicilian Kan* by Johann Hellsten, brought together in one volume

The Grünfeld is an exciting and dynamic answer to 1 d4, and has become very popular at all levels of chess. A major reason for this is that it has been a long-time favourite of the World's strongest-ever chess player, Garry Kasparov. The Grünfeld very much relies on the principles of the hypermodern school of chess: Black allows White to erect an impressive-looking centre on the assumption that in the long run it could prove to be more of a liability than an asset. Play often becomes very complex and tactical, one of the reasons the Grünfeld appeals to ambitious players. In *Play the Grünfeld*, however, opening expert Yelena Dembo circumvents this

problem by producing a comprehensive and yet workable repertoire for Black, offering a solution against each of White's tries, whether it's a critical main line or a tricky sideline. After reading this book, you will have the required knowledge and confidence to begin playing the Grünfeld in your own games. The Kan is an ideal choice as an opening weapon against 1 e4, as it one of the easiest variations of the Sicilian to learn and play. The Kan is relatively theory free in the traditional sense, and success is more likely to occur through the understanding of development systems and a deep study of the tactical and positional ideas for both sides. In this book Johan Hellsten draws upon his vast experience in the Sicilian Kan, revealing his secrets and showing how Black can adopt this opening and play it with confidence. He provides the reader with a dependable repertoire, demonstrating what to do in the main lines as well as how to deal with White's tricky

alternatives.

Sicilian Kan The Sicilian Kan is one of the most flexible and easy-to-play variations of the entire Sicilian complex. In contrast to opening monsters such as the infamous Dragon and Najdorf Variations, Black players are not forced to memorize massive chunks of opening theory. Success in the Sicilian Kan is more dependent on understanding certain principles and a system of development. Another point in its favor is that even more experienced White players are often flummoxed by Black's elastic approach. Recently the Kan has received a seal of approval from the highest places, with both Kasparov and Kramnik employing it in the last couple of years. In this book, Grandmaster John Emms considers both the popular main lines and the tricky sidelines of the Sicilian Kan. Using illustrative games, Emms guides the reader through the positional and tactical intricacies of this modern opening.

It is theoretically sound, and strikes a perfect balance between solidity and dynamic counterattacking potential, making it a popular choice among club players and top grandmasters alike. Pavlidis shares top-class analysis as well as expert knowledge gained from his many years of experience with the Taimanov.

Chess Explained is a new series of books about chess openings. They are not theoretical works in the traditional sense, but more a series of lessons from a chess expert with extensive over-the-board experience with an opening. You will gain an understanding of the opening and the middlegames to which it leads, enabling you to find the right moves and plans in your own games. It is as if you were sitting at the board with a chess coach answering your questions about the plans for both sides, the ideas behind particular moves, and what specific knowledge you need to have. The Classical Sicilian is one of the most popular and respected systems of the Sicilian, and has been used frequently by players such as Anand, Kramnik and Shirov. Black develops his pieces more quickly than in many Sicilian systems, and intricate piece-play often results. The Classical Sicilian arises after the moves 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 Nc6. White's most popular and critical response is the Richter-Rauzer Attack, and recent years have seen a diversification in the plans for both sides in this perennially popular line. Against White's alternatives to the Rauzer, Yermolinsky covers lines that retain the independent significance of the Classical move-order, such as 6 Bc4 Qb6 - a line in which he is a leading specialist.

Slay the Sicilian! Understanding Before Moving

When you are building your repertoire you have many choices available against 1.e4. Everyone knows the Sicilian is the most dangerous reply but there are so many choices! Most of them are highly theoretical such as the Najdorf or the Dragon. Some are very difficult to understand from a positional and dynamical point of view. The Kalashnikov and the Sveshnikov are two good examples, without even mentioning the amount of theory. I have always been interested by less theoretical Sicilians. I have been playing the Classical Sicilian for a long time and right before the covid period, I decided to find a new one. The Sicilian Kan came to me as a very serious option, and I decided to work on it. In the meantime, my friend and editor Daniël Vanheirzeele offered me the chance to author a book about it. This came to me as a complete surprise, as I had no experience with it. In comparison with my work on the Reti and the Dutch (my two previous books), I am a newbie on the subject. But I decided to accept the challenge. I found it extremely interesting, as this gave me a fresh look at the positions. I think I managed to ask myself the questions everyone would have asked. I also work as a second for others and am accustomed to working on openings I do not necessarily play as well as finding the key ideas very quickly. So, after a deep initial work to understand the variations, I was ready to start writing. In opposition to my prior efforts, I decided to start with the mainlines. I did it both during my work and then in the structure of the book. It seemed better to address the most difficult lines first to prove that Black gets playable positions, and then take care of

the less challenging lines. This approach allows you to have an idea of the typical positions and then compare it with the less usual lines so you may understand why the sidelines are not as good. I take this as an opportunity to share my knowledge of openings and how I analyze them. I started this book with the idea that I wanted it to be useful for all levels of playing strength, from amateurs to even top grandmasters. I really consider the best books to be those where everyone can understand the basics of the variations while also being of use to anyone that aims at going deeper into the theory. I based many of the lines and conclusions in this book not only on computer evaluation, but also from a practical point of view. While I did a deep dive using strong engines when analyzing the lines I cannot say that they are perfect. The most important thing is that all of the evaluations are based upon my own understanding and knowledge of chess. Adrien Demuth November 2021

In this, the last of three volumes on 1.e4, GM John Shaw completes his state-of-the-art chess opening repertoire for White by tackling the main lines of the Sicilian Defense. The book is based upon a foundation of tried and tested main lines, boosted by a number of innovative suggestions. Including the Dragon, Taimanov, Sveshnikov and the nefarious Najdorf, this book provides everything you need to face all the major Sicilian systems with confidence.

Emms, by allying his skills with those of powerful computers, has also made every effort to ensure that the solutions are sound, and that there are no unmentioned alternative solutions. The book begins with 100 relatively easy positions suitable for novices, and ends with 100 extremely tough puzzles, which provide a mind-bending challenge even for top-class players. There are 1001 puzzles in all.

The Caro-Kann is one of Black's most reliable answers to 1.e4. It is a regular favourite of elite players, who know that computer-aided preparation now threatens the sharpest lines of the Sicilian or Ruy Lopez (at the very least with a forced draw). The Caro-Kann is less susceptible to such forcing lines -- Black sets out to equalise in the opening, and win the game later. Lars Schandorff reveals a bullet-proof opening repertoire and lucidly explains how Black should play the middle and endgame. Features: A complete repertoire against 1.e4 with 1...c6; Written by an eminent opening expert; A rock-solid grandmaster repertoire.
