The Encyclopaedia of Brands & Branding in South Africa New Star Books

Few politicians have enraged opponents, frustrated colleagues and polarized Canadians like Svend Robinson — but few embraced the causes he did. Over his twenty-five years as a New Democrat MP, Robinson was imprisoned for blocking loggers from clear-cutting in Clayoquot Sound, assaulted by police while protesting at the 2001 Summit of the Americas, expelled from foreign countries for defending human rights, and harassed after coming out as Canada's first openly gay MP. Robinson always took his ideals to the front lines, helping to define the Canadian left. Though his brash tactics dominated headlines, Robinson's full story has not yet been told. In this in-depth biography, Graeme Truelove explores an accomplished life and career, including Robinson's difficult childhood, his growing realization of his own sexuality, and the bipolar diagnosis which followed his baffling, career-ending theft of a diamond ring. A portrait emerges of a complex figure

— driven, gifted, visionary and flawed — who challenged his country and continues to make his indelible mark on the world.

Ishana - A girl in my dreams Lulu Press, Inc

In the last decade over 6,000 rhinos have been killed in South Africa. Relentless poaching for their horns has led to a catastrophic fall in black rhino numbers. Meanwhile a corrupt South African government turns a blind eye to the international trade in rhino horn. This is the background to Peter Hain's brilliantly pacey and timely thriller. Battling to defend the dwindling rhino population, a veteran freedom fighter is forced to break his lifetime loyalty to the ANC as he confronts corruption at the very highest level. The stakes are high. Can the country's ancient rhino herd be saved from extinction by state-sponsored poaching? Has Mandela's 'rainbow nation' been irretrievably betrayed by political corruption and cronyism?

Billy Mason thought his dream came true when he was offered a promotion, but it came with a catch; he had to move. When he and his wife find their dream house, they think their life is complete, but what they don't know is that the house holds a deep dark secret. A spirit hides in the

home, waiting to find its next victim to do his dark deedsto kill. When Billy reads from a mysterious notebook he finds in the attic, he invites the spirit into his body, changing him from Billy the family man to killer Billy Mason.

CONAT 2016 International Congress of Automotive and Transport Engineering Hodder & Stoughton Within all large consumer facing organizations, most decisions about how to deal with people are made automatically by computerized decision making systems. Information about people, their lifestyle and past behavior are used to predict how they are expected to behave in the future. It can be determined if someone applying for a bank loan will make their repayments, who will respond to a marketing communication and the likelihood that someone will claim on their insurance policy. This book provides a step-by-step guide to how predictive analytics is used by some of the world's most influential organizations. This includes international banks, leading insurance providers, credit reference agencies and national governments. It covers all stages of the predictive analytics process, including project management, data collection, sampling, data transformation and pre-processing, model construction, validation, implementation and post-implementation monitoring of the model's performance.

BUILDING SUCCESSFUL CAR BRANDS FOR THE FUTURE

This volume includes the best papers presented at the CHAOS 2008 International Conference on Chaotic Modeling, Simulation and Applications. It provides a valuable collection of new ideas, methods, and techniques in the field of nonlinear dynamics, chaos, fractals and their applications in general science and in engineering sciences. It touches on many fields such as chaos, dynamical systems, nonlinear systems, fractals and chaotic attractors. It also covers mechanics, hydrofluid dynamics, chaos in meteorology and cosmology, Hamiltonian and quantum chaos, chaos in biology and genetics, chaotic control, and chaos in economy and markets, and chaotic simulations; thus, containing cutting-edge interdisciplinary research with high-interest applications. These contributions present new solutions by analyzing the relevant data and through the use of recent advances in different fields, especially in chaotic simulation methods and techniques.

Issue 1,49737 May 15 2006 Springer Nature

The volume will include selected and reviewed papers from CONAT - International Congress of Automotive and Transport Engineering to be held in Brasov, Romania, in October 2016. Authors are experts from research, industry and universities coming from 14 countries worldwide. The papers are covering the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics, accident research and analysis and innovative solutions for automotive vehicles. The conference will be organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with FISITA.

Beauty's Promise Woodhead Publishing

Aerodynamics has never been more central to the development of cars, commercial vehicles, motorbikes, trains and human powered vehicles, driven by the need for efficiency: reducing carbon dioxide emissions, reducing fuel consumption, increasing range and alleviating problems associated with traffic congestion. Reducing vehicle weight makes it more challenging to ensure that they are stable and handle well over a wide range of environmental conditions. Lighter structures are also more vulnerable to aerodynamically induced vibration. Alongside this, customers demand an environment that is quiet, comfortable and maintains their vision of the world around them in all weathers. These aims must be met by designing vehicles that engage customers emotionally, promoting the brand values of manufacturers and operators. This can only be done by collaboration between designers and aerodynamicists. Examine the latest developments in vehicle aerodynamic development Explore opportunities to network and share experiences around different areas Focus on future challenges and the engineering knowledge and technology required to resolve them Discuss other areas of development including handling and stability, tyre aerodynamics and modelling, aeroacoustics and fluid structure interaction

Detective Storm van der Merwe is walking her dog on the beach when she makes a gruesome discovery: the body of a young journalist - missing a limb. For the residents of Grootbaai, corpses are bad for business: thousands of tourists from all over the world flock to this coastal town to shark-cage dive with its famous great whites. Storm is desperate to investigate the matter, but she's been banished from the field to a dreary back office. She's also carless after a tow-truck driver - an attractive one at that - crashed his truck into her Beetle. Meanwhile, in Cape Town, Storm's former colleague Andreas Moerdyk is having problems of his own while investigating the death of a famous Springbok rugby player whose car was also hit by a tow truck. Is Storm's car

accident in some way related to the sports star's fatal collision? And is there a link between the journalist's death and stories of abalone poaching in Grootbaai? As Storm searches for answers, she realises that everyone's a suspect and the stakes are deadly.

Many aspects of Nature, Biology or even from Society have become part of the techniques and algorithms used in computer science or they have been used to enhance or hybridize several techniques through the inclusion of advanced evolution, cooperation or biologically based additions. The previous NICSO workshops were held in Granada, Spain, 2006, Acireale, Italy, 2007, and in Tenerife, Spain, 2008. As in the previous editions, NICSO 2010, held in Granada, Spain, was conceived as a forum for the latest ideas and the state of the art research related to nature inspired cooperative strategies. The contributions collected in this book cover topics including nature-inspired techniques like Genetic Algorithms, Evolutionary Algorithms, Ant and Bee Colonies, Swarm Intelligence approaches, Neural Networks, several Cooperation Models, Structures and Strategies, Agents Models, Social Interactions, as well as new algorithms based on the behaviour of fireflies or bats.

Lulu Press, Inc

This book examines the challenges faced by seven multinational companies - Intel, Lenovo, Samsung Electronics, ZTE, BMW Hyundai Motor Company, Mahindra and Mahindra - in their endeavour to contribute to the economic, environmental and social development of Asia. The lessons learned from the examination of these business practices may directly contribute to an increase in the practice of sustainable management and may as such contribute to positive economic, environmental and social impact of companies in this region. The cases are highly relevant for management theoreticians seeking to deepen our understanding of corporate sustainability in an area where scholars, practitioners and policy-makers can expect new questions, problems and challenges in the years ahead. The book is also of high interest to policy review agencies, policy makers and welfare economists seeking to support the development of a comprehensive sustainability framework for managing social and environmental issues in the context of Asia.

Brenda Phiri is dying of AIDS. She will soon leave her sixteen-year-old daughter, Beauty, alone in the world with her younger brother. Before she succumbs, Brenda asks young Beauty for a promise. She requests that her daughter remain a virgin until marriage and hopes Beauty will keep a journal of her experiences. Beauty is no ordinary girl, however; she's a traffic-stopping beauty. With her mother gone, Beauty finds herself under the guardianship of the very handsome Thabo Gumedede. Thabo believes it is only a matter of time before he seduces young Beauty. She deftly avoids his advances, though, determined to keep her promise to her mother. She even finds the Diary Girls, a group intended to promote chastity among young people. Unfortunately, the patron of this group is Pastor Mandla Khumalo, who also wants to have his wicked way with Beauty. Plagued by her own raging hormones and surrounded by amorous schoolboys and lustful older

men, Beauty must fight to stay pure and keep her promise. She must remain chaste in a society awash with sex. Will she be able to resist the power of temptation, or will she give in and become a man's plaything?

Collection Editions books give you this one time edition commemorating the end (as we know it) of the most popular factual television show in the planet's history. Top Gear: 1977-2015 gives the most comprehensive illustration to Top Gear yet. • With dozens of episode reviews and illustrations including some never before seen... • Presenter biographies right from the original 1977 series through to today's modern masterpiece... • History of the series... • Guides to every Top Gear "Special" including the latest Patagonia adventure. • Find out about Top Gear U.S., Top Gear Russia, Top Gear Korea, Top Gear Australia, Top Gear China, Top Gear France... • Track reviews... • Every single Power Lap time... • Every single Star in a Reasonably Priced Car... • Cars of the Year • Car of the Decade • The Stig's of past and present... • And absolutely tons more... Collection Editions: Top Gear provides the biggest, most authoritative and comprehensive guide to the Top Gear series for only the most dedicated of fans

The BMW Group Home Plant in Munich Veloce Publishing Ltd

The automobile is one of the inventions that has made a decisive contribution to human mobility, and consequently it has become an inseparable part of modern human society. However, it is through this widespread use that its negative impacts on the environment have become so highly visible. Achievements in improving the ecological characteristics of the automobile are highly impressive: a modern car emits only a fraction of the amounts of noise and exhaust pollutants produced by its predecessors 30 years ago. The contributions to this book were written by experts, most of whom have been actively involved in the development of modern automobiles and their combustion engines for more than 30 years. They have participated in all phases of the ecological development of the automobile and summarize their experience and know-how in this book.
