Allyn & Bacon

Foundations of Bilingual Memory provides a valuable update to the field of bilingual memory and offers a new psychological perspective on how the bilingual mind encodes, stores, and retrieves information. This volume emphasizes theoretical issues, such as classic memory approaches, Compound-Coordinate Bilingualism, Bilingual Dual Coding Theory, and Working Memory, about which

relatively little has been written in the bilingual domain. Also covered are:

- The neuropsychology of bilingual memory
- Applied issues (such as false memories and bilingualism, emotion and memory)
- Empirical findings in support of the uniqueness of the different memory systems of the bilingual individual
- Connectionist models of bilingualism

The volume represents the first book of its kind, in stressing a memory perspective with regards to bilingual speakers. It can serve as an advanced text for both undergraduate and graduate level

students and it will be of great interest to the growing number of bilingual teachers and university classes interested in understanding the bilingual mind, as well as in preparing teachers to work with the bilingual individual.

This concise introductory textbook emphasizes the major concepts of both anthropology and the anthropology of religion. It is aimed at students encountering anthropology for the first time. Reviewers describe the text as vivid, rich, user-friendly, accessible, and well-organized. The Anthropology of Religion, Magic, and Witchcraft examines religious expression from a cross-cultural perspective while incorporating key theoretical concepts. In addition to providing a basic overview of

anthropology, including definition of key terms and exposure to ethnographies, the text exposes students to the varying complexity of world religions.

The ten year anniversary of the book offers an excellent opportunity to publish a second edition. Several aspects of the book have evolved considerably since its first printing. For instance, substantial revision to the internship, licensure, and certification processes has occurred, and are reflected in this resource. Much of the literature on clinical psychology, cultural sensitivity, and the current job market is updated. Changes in technology have large effects on teaching and practicing clinical psychology. These modifications are needed to offer appropriate and updated information for students. In short, virtually every chapter has substantial modification to ensure that the material is accurate and up to date.

In the heart of Miami, Little Havana is a neighborhood buzzing with culture. Still imagined as primarily a Cuban extension of the city, it has been a sanctuary to refugees since the 1959 revolution and has experienced fascinating changes to become what it is today. Find out how a location associated with old Cubans

playing dominos has become a vibrant, multi-ethnic community and a birthplace of Miami's most exciting arts and music movements. Learn why Little Havana has continued to serve as a political stage for thousands of Cubans demonstrating on its streets, like the famous Calle Ocho. Authors Guillermo Grenier and Corinna Moebius trace the history and growth of this Latino epicenter in the first in-depth portrait of a world-renowned neighborhood.

Research Methods for Social Justice and Equity in Education offers researchers a full understanding of very important concepts, showing how they can be used a means to develop practical strategies for undertaking research that makes a difference to the lives of marginalised and disadvantaged learners. It explores different conceptualisations of social justice and equity, and leads the reader through a discussion of what their implications are for undertaking educational research that is both moral and ethical and how it can be enacted in the context of their chosen research method and a variety of others, both well-known and more innovative. The authors draw on real, practical examples from a range of educational contexts, including early childhood, special and inclusive education and adult education, and cultures located in both western and developing nations in order to exemplify how researchers can use methods which contribute to the creation of more equitable education systems. In this way, the authors provide a global perspective of the contrasting and creative ways in which

researchers reflect on and integrate principles of social justice in their methods and their methodological decision making. It encourages the reader to think critically about their own research by asking key questions, such as: what contribution can research for equity and social justice make to new and emerging methods and methodologies? And how can researchers implement socially just research methods from a position of power? This book concludes by proposing a range of methods and methodologies which researchers can use to challenge inequality and work towards social justice, offering a springboard from which they can further their own studies.

*An International Dialogue* IGI Global  
For teachers in higher education who haven't been able to catch up with developments in teaching and learning, James Davis and Bridget Arend offer an introduction that focuses on seven coherent and proven evidence-based strategies. The underlying rationale is to provide a framework to match teaching goals to distinct ways of learning, based on well-established theories of learning. The authors present approaches that

readers can readily and safely experiment with to achieve desired learning outcomes, and build confidence in changing their methods of teaching. Research on learning clearly demonstrates that learning is not one thing, but many. The learning associated with developing a skill is different from the learning associated with understanding and remembering information, which in turn is different from thinking critically and creatively, solving problems, making decisions, or change paradigms in the light of evidence. Differing outcomes involve different ways of learning and teaching strategies. The authors provide the reader with a conceptual approach for selecting appropriate teaching strategies for different types of content, and for achieving specific learning objectives. They demonstrate through examples how a focused and purposeful selection of activities improves student performance, and in the process makes for a more effective and satisfying teaching experience. The core of the book presents a chapter on each of the seven ways of learning. Each chapter offers a full description of the process, illustrates its

application with examples from different academic fields and types of institutions, clearly describes the teacher's facilitation role, and covers assessment and online use. The seven ways of learning are: Behavioral Learning; Cognitive Learning; Learning through Inquiry; Learning with Mental Models; Learning through Groups and Teams; Learning through Virtual Realities; and Experiential Learning. Along the way, the authors provide the reader with a basis for evaluating other approaches to teaching and other learning methodologies so that she or he can confidently go beyond the "seven ways" to adapt or adopt further strategies. This is the ideal companion for teachers who are beginning to explore new ways of teaching, and want to do some serious independent thinking about learning. The book can also be used to prepare graduate students for teaching, and will be welcomed by centers for teaching and learning to help continuing faculty re-examine a particular aspect of their teaching.

Highly valued by both therapists and

educators, Occupational Therapy: Performance, Participation, and Well-Being has been integral to the evolution of occupational therapy services and functions. Incorporated within this impressive third edition are new features and topics that shape the modern era in occupational therapy practice. Senior editors Charles H. Christiansen and Carolyn M. Baum, along with contributing editor Julie Bass-Haugen have worked collectively to go beyond the presentation of occupational therapy theories. The third edition uses a more learner-friendly approach by explaining how the theories apply in various practice settings. This format enables students, instructors, and practitioners to connect the crucial link between theory and practice. Charles H. Christiansen, Carolyn M. Baum, and Julie Bass-Haugen have organized the first section in a manner that first develops and then establishes a clear understanding of human occupation. Section Two makes explicit the Person-Environment-Occupation-Performance Model that can be used at an individual, organization, or population level. Section Three covers current and emerging trends and

introduces major intervention strategies that are used in the field, as well as comprehensive literature support for use in occupational therapy practice. *Occupational Therapy: Performance, Participation, and Well-Being, Third Edition* is designed to be used in all curricula in occupational therapy by providing a framework for educational preparation that addresses the ACOTE Accreditation Standards. A variety of helpful features are provided that will evoke classroom discussion and direct the students toward evidence to guide their clinical reasoning. **New Topics:** Social justice and advocacy roles for occupational therapy. The value of occupational therapy in fulfilling society's current and future needs. Occupational performance in person, community, and organizational contexts. The important and emerging area of community health. A useful framework for intervention planning. Features: An impressive appendix comparing the language of the International Classification of Functioning and Disability, the PEOP Model, and the American Occupational Therapy Practice Framework. A valuable description of the terms most frequently

used in occupational therapy prepared by occupational therapy's noted scholar and historian Dr. Kathlyn Reed. Contributions from 28 of the most renowned experts in occupational therapy. A reflection section at the end of each chapter to reinforce important topics. Active learning activities for individuals and groups to assist with the application of theories to practice. Internet-based activities are included as part of the active learning exercises. Evidence worksheets to demonstrate the application of evidence to practice. The undergraduate years are a turning point in producing scientifically literate citizens and future scientists and engineers. Evidence from research about how students learn science and

engineering shows that teaching strategies that motivate and engage students will improve their learning. So how do students best learn science and engineering? Are there ways of thinking that hinder or help their learning process? Which teaching strategies are most effective in developing their knowledge and skills? And how can practitioners apply these strategies to their own courses or suggest new approaches within their departments or institutions? "Reaching Students" strives to answer these questions. "Reaching Students" presents the best thinking to date on teaching and learning undergraduate science and engineering. Focusing on the disciplines of astronomy, biology, chemistry, engineering, geosciences, and physics, this book is an introduction to strategies to try in your classroom or institution. Concrete examples and case studies illustrate how experienced instructors and leaders have applied evidence-based approaches to address student needs, encouraged the use of effective techniques within a department or an institution, and addressed the challenges that arose along the way. The

research-based strategies in "Reaching Students" can be adopted or adapted by instructors and leaders in all types of public or private higher education institutions. They are designed to work in introductory and upper-level courses, small and large classes, lectures and labs, and courses for majors and non-majors. And these approaches are feasible for practitioners of all experience levels who are open to incorporating ideas from research and reflecting on their teaching practices. This book is an essential resource for enriching instruction and better educating students.

The 2010 edition of this monograph addresses many topics (e.g., administration of orientation programs, family involvement, student characteristics and needs, assessment, and orientation for specific student populations and institutional types) that were included in previous editions but approaches them with new information, updated data, and current theory. However, this edition also takes up new topics in response to the "opportunities and concerns" facing orientation, transition, and retention professionals such as collaborations among campus units in the development and delivery of orientation, the increase in nontraditional student populations, the need for effective crisis planning and management in orientation programs, new technologies, and even the challenge of making the case for orientation in an era of diminishing resources. The authors have carefully penned chapters incorporating contemporary information, ideas, and

concepts while being reflective of traditional practices. Following a preface by Margaret J. Barr and a foreword by Jennifer R. Keup and Craig E. Mack, chapters in this edition include: (1) Brief Overview of the Orientation, Transition, and Retention Field (Craig E. Mack); (2) Theoretical Perspectives on Orientation (Denise L. Rode and Tony W. Cawthon); (3) Making the Case for Orientation: Is It Worth It? (Bonita C. Jacobs); (4) Administration of a Comprehensive Orientation Program (April Mann, Charlie Andrews, and Norma Rodenburg); (5) Community College Orientation and Transition Programs (Cathy J. Cuevas and Christine Timmerman); (6) Channeling Parental Involvement to Support Student Success (Jeanine A. Ward-Roof, Laura A. Page, and Ryan Lombardi); (7) Extensions of Traditional Orientation Programs (Tracy L. Skipper, Jennifer A. Latino, Blaire Moody Rideout, and Dorothy Weigel); (8) Technology in Orientation (J.J. Brown and Cynthia L. Hernandez); (9) Incorporating Crisis Planning and Management Into Orientation Programs (Dian Squire, Victor Wilson, Joe Ritchie, and Abbey Wolfman); (10) Orientation and First-Year Programs:

A Profile of Participating Students (Maureen E. Wilson and Michael Dannells); (11) Creating a Developmental Framework for New Student Orientation to Address the Needs of Diverse Populations (Archie P. Cubarrubia and Jennifer C. Schoen); (12) Designing Orientation and Transition Programs for Transfer Students (Shandol C. Hoover); (13) Nontraditional Is the New Traditional: Understanding Today's College Student (Michael J. Knox and Brittany D. Henderson); (14) Building the Case for Collaboration in Orientation Programs: Campus Culture, Politics, and Power (Beth M. Lingren Clark and Matthew J. Weigand); (15) Assessment and Evaluation in Orientation (Robert Schwartz and Dennis Wiese); and (16) Reflections on the History of Orientation, Transition, and Retention Programs (Jeanine A. Ward-Roof and Kathy L. Guthrie). (Individual chapters contain references.) [For the 2nd Edition (2003), see ED478603].

provides a comprehensive guide to leading health promotion concepts, from assessment to interventions to application. Its lifespan approach addresses patients' unique needs with case studies and care plans, with an assessment framework based on Gordon's Functional Health Patterns. New to this edition is expanded coverage of genomics and QSEN competencies. Written by nursing experts Carole Edelman and Elizabeth Kudzma, this bestselling text covers all the latest research and trends in health promotion and disease prevention. Separate chapters on population groups — the individual, family, and community — highlight the unique aspects of assessment and health promotion for each group. Coverage of growth and development helps you apply health promotion concepts to each age and each stage of development through the lifespan. Case studies present realistic situations with questions asking you to apply key concepts, and care plans include nursing diagnoses, defining characteristics, related factors, expected outcomes, and interventions. Quality and Safety Scenario boxes focus on QSEN-related competencies with examples of

health promotion. Innovative Practice boxes outline unique and creative health promotion programs and projects currently being implemented. Healthy People 2020 boxes present goals and objectives relating to national health issues and priorities. Research for Evidence-Based Practice boxes summarize current health-promotion studies showing the links between research, theory, and practice. Diversity Awareness boxes address cultural perspectives relating to planning care. Hot Topics boxes introduce significant issues, trends, and controversies in health promotion. Think About It clinical scenarios open each chapter, and include questions to encourage critical thinking. NEW! An increased focus on genomics reflects scientific evidence supporting the use of genetic tests and family health history to guide public health interventions. NEW!
