the actual test. Effectively grasp key concepts with questions that integrate various areas of clinical pathology, as well as questions that bridge concepts in clinical pathology with those in anatomic pathology. Understand why an answer is correct or incorrect with help from brief explanations accompanying each. Review key concepts in laboratory medicine, correlate them

to the associated clinical or laboratory information, and apply them to the diagnosis and management of human disease. Designed as a companion to *Anatomic Pathology Board Review, 2nd Edition* (ISBN: 9781455711406). *Emergency Medicine* Oxford University Press Prepared by residents and fellows with senior faculty advisors, this quick-reference

manual outlines current concepts and practice guidelines in the rapidly evolving fields of allergy, asthma, and immunology. Symptom-oriented and disease-oriented sections cover both acute and chronic problems, including drug allergy, anaphylaxis, eosinophilia, immunodeficiency, and latex allergy. Appendices include commonly used allergy and asthma drugs,

laboratory values for tests in immunology, and a sample schedule for perennial aqueous immunotherapy.

### **EXAMINATION & BOARD REVIEW**

Lippincott Williams & Wilkins Building upon the highly successful 1st edition, this book is a comprehensive review designed to prepare pediatric residents, fellows, and pediatricians for the General

Pediatrics Certifying Examination, and for the American Board of Pediatrics Maintenance of Certification. Pediatric Board Study Guide: A Last Minute Review, 2nd edition, covers all aspects of pediatric medicine; each chapter has been updated according to the most recent content specifications provided by the ABP. The 2nd edition provides more illustrations, diagrams,

radiology images, and clinical case scenarios to further assist readers in reviewing pediatric subspecialties. New chapter topics include nutrition, sports medicine, patient safety, quality improvement, ethics, and pharmacology. Finally, the book closes with a "Last Minute Review" of high-yield cases arranged in the same sequence as the chapters, providing readers with a

concise study guide of critical cases and conditions. Pediatric residents and fellows preparing for the board examination, pediatricians, and pediatric subspecialists preparing for certification maintenance will find Pediatric Board Study Guide: A Last Minute Review, 2nd edition easy to use and comprehensive, making it the ideal resource and study tool.

**Function, Members**  
Elsevier Health Sciences Mayo Clinic Critical and Neurocritical Care Board Review is an all-inclusive review of the pathophysiology and care of the neurocritically ill and critically ill patient. The book reviews the core major critical care and neurocritical care disorders, underlying pathophysiology, treatment decisions with questions and answers for

self-directed study and board review purposes. The text is succinct, to the point, relevant, informative, and up-to-date with information from recent clinical trials and facts based on evidence-based medicine. The references are up-to-date and include the most recent critical care guidelines for further study. The book is written and closely supervised by experienced

Mayo Clinic faculty and reviewed in detail by the editors. The book is suitable for self-study towards neurocritical care boards and a number of critical care board examinations and certification exams. Tables, explanatory drawings, and bullet points are used throughout the text for high-yield learning.

This is a  
review text on  
medical  
microbiology

and immunology containing approximately 625 board-type review questions on left-hand pages with answers and explanations on facing right-hand pages. It is designed for medical students taking microbiology as well as for those studying for Step 1 of the National Board Exams and is also useful for Step 3 National Boards on infectious diseases or allergy and immunology.

The book's main sections cover general and medical microbiology, bacteriology, virology, immunology, and parasitology. The answers summarize relevant information and point out the fault in incorrect answers. Line drawings and figures are used for questions concerning structure of both molecules and organisms and for interpreting graphical results. Authors

Reese, Brownell, and Nair, all with the Medical College of Georgia, bring a combined total of some 85 years of medical school teaching experience to their development of the questions and annotated answers for this book.

The Johns Hopkins Internal

Medicine Board Review Certification and Recertification The field of psychiatry is evolving rapidly specifically in the areas of classification of many psychiatric disorders, psychopharmacology and psychotherapeutics. The new Diagnostic and Statistical Manual of Mental Disorders: DSM-5 which was introduced in 2013 forms the basis of the new classification system in psychiatry. The American Board of Psychiatry and Neurology is also in the process of phasing in DSM-5 criteria to the board examination, such that by 2017 the examination material will exclusively reflect the new manual. As psychiatric trainees and psychiatrists prepare for their certification and recertification examinations using the new classification system, a new board review textbook is imperative to address these changes in order to prepare them for the certification examinations as well as for their clinical practice. To help with this process we have compiled a list of 1000 questions and answers in psychiatry and neurology using the most current information available in the field and using the DSM 5 classification system. This book has been specifically written for the busy

professional who does not have the time to access numerous resources necessary to prepare for professional examinations.

Echocardiography board  
exams, and  
for residents

preparing for in-training examinations in ultrasound. The text consists of over 500 multiple-choice questions, organized into 18 chapters covering ultrasound topics such as physics, eFAST, echocardiography, thoracic, aorta, hepatobiliary, renal, pregnancy, soft tissue, ocular, procedural, airway, ENT, DVT, testicular, abdominal, and musculoskeletal

al applications. This is a multi-specialty work, with contributors representing the fields of emergency medicine, internal medicine, cardiology, critical care, and radiology. Chapters include questions, answers with detailed explanations and references to primary or landmark articles to help better navigate a standardized exam. Questions are written in a

case-based format that emulates the ABEM and NBE board exams, and are supplemented by over 800 figures, tables, boxes, and online videos. Elsevier Health Sciences Anesthesiology Applied Exam Board Review is a comprehensive guide for preparing for the American Board of Anesthesiology Applied Exam, which includes the traditional Standardized Oral Examination

(SOE) and a new Objective Structured Clinical Examination (OSCE) component. This guide is also a useful review for residents preparing for in-training examinations in Anesthesiology. The text contains over 40 long and short exam stems, with questions regarding the preoperative, intraoperative, and postoperative care. Included with the book is access to the questions online for an

e-learning experience. Topics chosen are based on ABA-released exams and student feedback regarding what are the highest yielding topics for the oral board exam. Each chapter includes not just questions and answers based on ABA-provided grading criteria, but also an emphasis on how to formulate answers and break down complex topics and processes into simpler

formats.
