"All I did was go to the library to borrow some books." On his way home from school, the young narrator of *The Strange Library* finds himself wondering how taxes were collected in the Ottoman Empire. He pops into the local library to see if it has a book on the subject. This is his first mistake. Led to a special 'reading room' in a maze under the library by a strange old man, he finds himself imprisoned with only a sheep man, who makes excellent donuts, and a girl, who can talk with her hands, for company. His mother will be worrying why he hasn't returned in time for dinner and the old man seems to have an appetite for eating small boy's brains. How will he escape?

Intermediate Examination Paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: None, University of Bern, 23 entries in the bibliography, language: English, abstract: In the course of this paper I shall analyse abbreviations found in four chat sessions. My main hypothesis is that Internet users have adopted several ways of abbreviating in order to make their contributions more efficient. Furthermore, a great number of these abbreviations indicate, or are trying to render, the emotional state of the speaker and in doing so make the interpretation of an utterance easier. In addition, it appears that another reason for abbreviating is to compensate for a lack of information, such as tone and mood of a speaker. This deficit arises, possibly, from the lack of personal contact between the speakers and is characteristic of the use of abbreviations as used in English on the Internet. Taking a more general approach, Crystal included the computer mediated variant of English in his term "Netspeak"; firstly, in his Language and the Internet (Crystal

2001: 17) and, three years later, in *The Language Revolution*. (Crystal 2004: 65) I shall take a slightly closer look at the concept in section two. Section three deals with two issues connected to the material I collected. Firstly, I comment in section 3.1 on how I reproduced the logged chat sessions and most importantly why I deleted certain contributions I identified as not being part of the ongoing conversation. Section 3.1 also contains a short description of the chats I used as the data for my analysis. The following subsection 3.2 deals with the problem of the anonymity of the Internet users and the resulting problems for research. Section four consists of the analysis of the collected data. I decided to deal only with abbreviations as they occur in written Internet communication, whereas I use written here in its literal meaning, i.e. in the sense of typed in via keyboard. I divided these abbreviations into three types, namely acronyms, rebus techniques, or phonetic spellings, and emoticons. These are discussed in the respective sub sections. In addition to this, I divided the subsection on emoticons into two parts, discussing the absence of both smileys and shorthands. The last section presents my conclusions for this analysis of three features of Netspeak. Furthermore, I shall point out further possible directions for research.

Do you know your own feelings?

Sometimes, we're happy, so we laugh and shout with glee. Other times, we're angry, and want to rage and roar. It is not easy to deal with our many contradictory emotions. To recognize our own feelings and deal with them responsibly is an important learning process for children, and a trial of limits. This vibrantly and expressively illustrated book invites children to talk about feelings. It takes readers through a range of potential emotions without ever calling them "good" or "bad," allowing children to recognize and examine their own emotional world.

Principles of the History of Language

Createspace Independent Publishing Platform

Drawing from disciplines as diverse as linguistics, cognitive science, psychology, and neuroscience, *The Emoji Code*

explores how emojis are expanding communication and not ending it. For all the handwringing about the imminent death of written language, emoji—those happy faces and hearts—is not taking us backward to the dark ages of illiteracy. Every day 41.5 billion texts are sent by one quarter of the world, using 6 million emoji. Evans argues that these symbols enrich our ability to communicate and allow us to express our emotions and induce empathy—ultimately making us all better communicators. Vyvyan Evans's *Emoji Code* charts the evolutionary origins of language, the social and cultural factors that govern its use, change, and development; as well as what it reveals about the human mind. In most communication, nonverbal cues are our emotional expression, signal our personality, and are our attitude toward our addressee. They provide the essential means of nuance and are essential to getting our ideas across. But in digital communication, these cues are missing, which can lead to miscommunication. The explosion of emoji, in less than four years,

has arisen precisely because it fulfills exactly these functions which are essential for communication but are otherwise absent in texts and emails. Evans persuasively argues that emoji add tone and an emotional voice and nuance, making us more effective communicators in the digital age.
