Entertainment Weekly's Favorite Novel of 2011 Esquire's 2011 Book of the Year A New York Times

Notable Book for 2011 A Washington Post Notable Fiction Book for 2011 One of NPR's 10 Best Novels of 2011 Ten years after 9/11, a dazzling, kaleidoscopic novel reimagines its aftermath A jury gathers in Manhattan to select a memorial for the victims of a devastating terrorist attack. Their fraught deliberations complete, the jurors open the envelope containing the anonymous winner's name—and discover he is an American Muslim. Instantly they are cast into roiling debate about the claims of grief, the ambiguities of art, and the meaning of Islam. Their conflicted response is only a preamble to the country's. The memorial's designer is an enigmatic, ambitious architect named Mohammad Khan. His fiercest defender on the jury is its sole widow, the self-possessed and mediagenic Claire Burwell. But when the news of his selection leaks to the press, she finds herself under pressure from outraged family members and in collision with hungry journalists, wary activists, opportunistic politicians, fellow jurors, and Khan himself—as unknowable as he is gifted. In the fight for both advantage and their ideals, all will bring the emotional weight of their own histories to bear on the urgent question of how to remember, and understand, a national tragedy. In this deeply humane novel, the breadth of Amy Waldman's cast of characters is matched by her startling ability to conjure their perspectives. A striking portrait of a fractured city striving to make itself whole, *The Submission* is a piercing and resonant novel by an important new talent.

Tyler Cowen's controversial New York Times bestseller—the book heard round the world that ignited a firestorm of debate and redefined the nature of America's economic malaise. America has been through the biggest financial crisis since the great Depression, unemployment numbers are frightening, media wages have been flat since the 1970s, and it is common to expect that things will get worse before they get better. Certainly, the multidecade stagnation is not yet over. How will we get out of this mess? One political party tries to increase government spending even when we have

no good plan for paying for ballooning programs like Medicare and Social Security. The other party seems to think tax cuts will raise revenue and has a record of creating bigger fiscal disasters than the first. Where does this madness come from? As Cowen argues, our economy has enjoyed low-hanging fruit since the seventeenth century: free land, immigrant labor, and powerful new technologies. But during the last forty years, the low-hanging fruit started disappearing, and we started pretending it was still there. We have failed to recognize that we are at a technological plateau. The fruit trees are barer than we want to believe. That's it. That is what has gone wrong and that is why our politics is crazy. In *The Great Stagnation*, Cowen reveals the underlying causes of our past prosperity and how we will generate it again. This is a passionate call for a new respect of scientific innovations that benefit not only the powerful elites, but humanity as a whole.
