Because teachers have so many things to do, creating new, inspiring lessons can often take a back seat. This book is designed to assist you in providing lesson ideas on everything from women's role in WW1 to the Russian Civil War. With more than 70 curriculum-linked lessons suitable for teaching 14-16-year-olds, this fabulously user-friendly resource features activities and teaching strategies based on the latest research and best practice. The practical, task-based activities are aimed at supporting and reinforcing your teaching, and promoting pupils' enjoyment of the subject; encouraging their curiosity and imagination and helping them to develop enquiring minds and engage with the past. There are activities for individual, pair and group

work, and the worksheets are all photocopiable and downloadable. This is an essential resource for all secondary school history teachers: newly qualified, experienced and in training.

### Handbook of Research on Individualism and Identity in the Globalized Digital Age

Cambridge University Press

As populations become more mobile, so interest grows in bi- and multilingualism, particularly in the context of education. This volume focuses on the singular situation in Israel, whose complex multiculturalism has Hebrew and Arabic as official languages, English as an academic and political language, and tongues such as Russian and Amharic spoken by immigrants. Presenting research on bi- and trilingualism in Israel from a multitude of perspectives, the book focuses on four aspects of multilingualism and literacy in Israel: Arabic-Hebrew bilingual education and Arabic literacy development; second-language Hebrew literacy among immigrant children; literacy in English as a second/third language; and adult bilingualism. Chapters dissect findings on immigrant youth education, language impairment in bilinguals, and neurocognitive features of bilingual language processing. Reflecting current trends,

this volume integrates linguistics, sociology, education, cognitive science, and neuroscience.

Multiple interrogatives, questions with multiple wh-phrases (e.g. Who bought what?), have long presented analytical challenges for linguistic theory. This monograph presents a new theoretical and experimental study of this construction. The theoretical findings concern the interaction between superiority effects, subject-auxiliary inversion, and the distribution of pair-list and single-pair readings cross-linguistically. The author examines multiple interrogatives under sluicing (i.e. clausal

ellipsis), presenting new arguments for the deletion analysis of sluicing. The author also reports the results of several experimental studies on how children acquire the language-specific properties of multiple interrogatives in English, Russian, and Malayalam. The results suggest a correlation between the acquisition of multiple interrogatives and the acquisition of contrastive focus, which has been independently motivated in the syntactic literature. The monograph will be of interest to linguists concerned with syntax, semantics, and language acquisition, as well as readers who are interested in a comprehensive theory of language in general.

Cognitive and Socio-linguistic Perspectives IGI Global  
This volume examines the interpretation of gradient judgments of sentence acceptability in relation to theories of grammatical knowledge. It uses experimental and corpus-based research, along with a range of case studies, to argue for a new approach to this crucial problem.

This book presents papers from the International Conference on Integrating Engineering Education and Humanities for Global Intercultural Perspectives (IEEHGIP 2020), held on 25–27 March 2020. The conference brought together researchers and practitioners from various disciplines within engineering and humanities to offer a range of perspectives. Focusing on, but not limited to, Content and Language Integrated Learning (CLIL) in Russian education the book will appeal to a wide academic audience seeking ways to initiate positive changes in education.

Culture, Identity, and Language Change Regents Exams and Answers: Global History and Geography 2020  
Volume I, entitled Russian Mathematics Education: History and World Significance, consists of several chapters written by distinguished authorities from Russia, the United States and other nations. It Examines the history of

mathematics education in Russia and its relevance to mathematics education throughout the world. The second volume, entitled Russian Mathematics education is highly respected for its achievements and was once very influential internationally, it has never been explored in depth. This publication does just that. --Book Jacket.

*From Russia with Love! Russian for Kids* (Paperback) Rowman & Littlefield

This book examines Russia's attempts to tackle the challenges of the new and increasing security threats of rising crime, corruption and terrorism that it has experienced since the break-up of the Soviet Union in 1991. It demonstrates the close links between the rising drug trade, border problems, migration issues, organised crime, corruption and terrorism. Uncovering information not seen before by Western audiences, this book: shows how Russia's porous borders have facilitated the operation of transnational crime groups explores the specific features that make particular regions such as Siberia important

for the drug trade and other forms of smuggling, analysing the character of the different criminal groups and networks, and investigating the informal links and collusion between these organizations and police officials considers the operation of corrupt practices in the military sector, one of the most closed parts of the economy analyzes the ways in which Russia is fighting crime, corruption and terrorism, and the implications for civil liberties argues that the extensive flows of illegal immigrants into Russia are creating ever more fertile grounds for corruption, crime and terrorism, while the immigrants themselves are often the victims of this crime.

This book constitutes the post-conference proceedings of the 8th International Conference on Analysis of Images, Social Networks and Texts, AIST 2019, held in Kazan, Russia, in July 2019. The 27 full and 8 short papers were carefully reviewed and selected from 134 submissions (of which 21 papers were automatically rejected without being

reviewed). The papers are organized in topical sections on general topics of data analysis; natural language processing; social network analysis; analysis of images and video; optimization problems on graphs and network structures; and analysis of dynamic behavior through event data.

Oxford University Press

The chapters in this volume give an account of the process of modernisation and educational reform in Russia, variously considering the cultural and political dilemmas provoked by democratisation, the structural and policy challenges associated with the reform of higher and vocational education, and the deep divisions exposed as socio-cultural activity is brought into alignment with the new discourse of freedom and choice. The volume stimulates an important debate about the methods that inform cross-national and cross-regional work on educational change. This is particularly salient in a study of educational reform in Russia, and begs the question, 'whose

way of thinking, of constructing meaning, and of experiencing the world' is used to judge the weight and the direction of change? Each chapter shows that a thorough understanding of the nature of change and the direction of reform is only achieved through the ability to decentre - or take on board - the 'other' worldview. It argues, therefore, that it is worldview, rather than culture or nation-state, that is the most valid unit of analysis. This book pays tribute to K.D. Ushinsky (1824-70), 'the Russian pioneer of comparative education', each chapter in it broadly in agreement with his conclusions that: Public education does not solve the problems of life by itself; it does not lead history; rather, it follows the historical development. It is not the pedagogies or the teachers who create the future, but the people themselves and their great men. Education only follows this road and, in combination with other public (social) factors, helps the individual and the rising generation on its way.

With contributions from the leading professionals in the field, this collection covers the most important aspects of teaching the Russian language.

### **HERITAGE AND SCHOOL LANGUAGE LITERACY DEVELOPMENT IN MIGRANT CHILDREN**

Barrons Educational Series  
Explicating clearly and concisely the full implication of a praxis-oriented language pedagogy, this book argues for an approach to language teaching grounded in a significant scientific theory of human learning—a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching. This approach is based on Vygotsky's sociocultural theory, according to which the two activities are inherently connected so

that each is necessarily rooted in the other; practice is the research laboratory where the theory is tested. From the perspective of language education, this is what is meant by the 'pedagogical imperative.' Sociocultural Theory and the Pedagogical Imperative in L2 Education • Elaborates a new approach to dealing with the relationship between theory and

practice—an approach grounded in praxis—the dialectical unity of theory and practice • Presents an analysis of empirical research illustrating praxis-based principles in real language classrooms • Brings together cognitive linguistics and sociocultural theory – the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical

principles of learning and development also called for in a praxis approach • Offers recommendations for redesigning teacher education programs Its timely focus on the theory-practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA.
