The University Grants Commission of India is a statutory body set up by the Government of India in accordance to the UGC Act 1956 under Ministry of Human Resource Development, and is charged with coordination, determination and maintenance of standard of higher education. The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and or Junior Research Fellowship (JRF) award in Indian universities and colleges. This national level entrance exam is conducted twice every year in the month of June and December. Political Science Post-

Graduates usually opt the UGC NET Political Science subject to pursue their career either as junior research fellows or professors or both. National Testing Agency (NTA) will conduct UGC NET exam for Assistant Professor and for junior research fellowship. The UGC NET test will consist of two papers, paper 1 and 2. Paper 1 remains common for all subjects and consists of questions from research, teaching & General Aptitude on the other hand paper 2 will consist of questions from only Political Science subjects.

Reading fluency has been identified as a

key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by

chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency

instruction an even more integral part of all literacy instruction.
