- Shows how the astrological cycle around the signs of the zodiac represents the alchemical transformation of consciousness and chakra awakening
- Expands the meaning of each astrological sign based on its association with the chakras and the alchemical transmutation cycle from lead to gold
- Offers sample chart analyses to show how you can discover your spiritual challenges and opportunities Demonstrating the connections between astrology, alchemy, and yoga, Frederick Baker reveals how he discovered their correspondences by rotating the natural order of the zodiac, placing Aquarius and Capricorn at the bottom and Cancer and Leo at the top, to reflect the alchemical order of metals from lead to gold. is Alchemical Tantric Arrangement then revealed a corresponding alchemical order of the seven traditional planets--from Saturn (lead) to Sun (gold)--and also aligned with the seven chakras and the three major energy channels (nadis) of the Tantric yoga system, including the channel through which Kundalini energy rises from root chakra to crown chakra. Baker uses these rediscovered correspondences to expand the meaning of each astrological sign based on their association with the chakras, the alchemical transmutation cycle from lead to gold, and the wisdom of ancient myth. He also offers expanded meanings for each chakra in association with the twelve signs of the zodiac and their ruling planets as well as new insights into the influence of Chiron and Eris. The author provides a complete analysis of his own birth chart as well as Alchemical Tantric Astrology insights into significant events over the past few decades, including the intense changes of 2020. Baker's revolutionary new take on our individual spiritual journeys shows how the astrological cycle around the signs of the zodiac represents the alchemical and Tantric transformation of consciousness and the natural path of spiritual unfolding.

"We are all alchemists with amnesia" is a line from this book that encapsulates the theme of the fictional, partly channelled story. Liza (28) goes through an inner crisis. She's consumed by heartbreak, finds her work unfulfilling and feels like she is sleepwalking through life. That's why when she receives a mysterious invitation to a Spiritual Alchemy seminar, she accepts the challenge, and sets out on a soul-searching journey. She begins to meet with her secretive, ethereal teacher and twelve other men, each representing one of the twelve signs of the zodiac. While conversing with them, she learns about alchemy, astrology and mainly about what it means to grow into her true self. This novel was partly based on a channelled conversation with angel Gabriel.

When we use astrology, of course we want to look ahead and anticipate the future. The easiest and most common method is transits-a comparison of where the planets are in the zodiac now, or at any time in the future, and how they relate to our birth chart. But should we wait for our transits to "happen," (and worry if they seem challenging)? No! With this author's positive approach, experience and practical advice, we can learn how to direct our transits! In her thorough explanation of transit cycles, Joan Negus emphasizes that transits highlight opportunities. She offers suggestions and insights gained though years of observation and client counseling about how we can consciously plan how to make the most of our "good" transits, while transmuting those challenging "base" transits into golden opportunities!

An illuminating look at the surprising history and science of astrology, civilization's first system of algorithms, from Babylon to the present day. Humans are pattern-matching creatures, and astrology is the universe's grandest pattern-matching game. In this refreshing work of history and analysis, data scientist Alexander Boxer examines classical texts on astrology to expose its underlying scientific and mathematical framework. Astrology, he argues, was the ancient world's most ambitious applied mathematics problem, a monumental data-analysis enterprise sustained by some of history's most brilliant minds, from Ptolemy to al-Kindi to Kepler. Thousands of years ago, astrologers became the first to stumble upon the powerful storytelling possibilities inherent in numerical data. To correlate the configurations of the cosmos with our day-to-day lives, astrologers relied upon a "scheme of heaven," or horoscope, showing the precise configuration of the planets at a particular instant in time as viewed from a particular place on Earth. Although recognized as pseudoscience today, horoscopes were once considered a cutting-edge scientific tool. Boxer teaches us how to read these esoteric charts—and appreciate the complex astronomical calculations needed to generate them—by diagramming how the heavens appeared at important moments in astrology's history, from the assassination of Julius Caesar as viewed from Rome to the Apollo 11 lunar landing as seen from the surface of the Moon. He then puts these horoscopes to the test using modern data sets and statistical science, arguing that today's data scientists do work similar to astrologers of yore. By looking back at the algorithms of ancient astrology, he suggests, we can better recognize the

patterns that are timeless characteristics of our own pattern-matching tendencies. At once critical, rigorous, and far ranging, *A Scheme of Heaven* recontextualizes astrology as a vast, technological project—spanning continents and centuries—that foreshadowed our data-driven world today.

A captivating portrait of the crucible of magic, science, and religion at the court of the doomed dreamer Rudolf II in Renaissance Prague. At the end of the sixteenth century, the greatest philosophers, alchemists, astronomers, and mathematicians of the day flocked to Prague to work under the patronage of the Holy Roman Emperor Rudolf II. The *Theatre of the World* is the enchanting story of Rudolf II, an emperor more interested in the great talents and minds of his times than in the exercise of his power. Rarely leaving Prague Castle, he gathered around him a galaxy of famous figures: the Italian painter Giuseppe Arcimboldo, the Danish astronomer Tycho Brahe, the German mathematician Johannes Kepler, and the English magus John Dee. Entranced, like Hamlet, by the new Renaissance learning, Rudolf found it nearly impossible to make decisions. He faced the threats of religious discord and the Ottoman Empire, along with deepening melancholy and an ambitious younger brother. As a result, he lost his empire and nearly his sanity, but he enabled Prague to enjoy a golden age of peace and creativity before Europe was engulfed in the Thirty Years War. "The *Theatre of the World*" is a beguiling and dramatic human story filled with angels and devils, high art and low cunning, talismans and stars. It offers a captivating perspective on a pivotal moment in the history of Western Civilization. "From the Hardcover edition."

W. W. Norton & Company

This is the third book in the 21 Brotherhood of Light Course series by C. C. Zain on the Hermetic Sciences, Astrology, Alchemy, Tarot, Kabbalah and the Occult. In this book, the author thoroughly explains the purpose of, and methods used in, spiritual alchemy and how it relates to evolution of consciousness and the experiences and events of everyday life. The ancient alchemist sought transmutation and immortality. For the soul to be immortal it must build for itself an imperishable spiritual body in which it can function after the dissolution of both the physical and astral forms. Topics include spiritual transmutation, how the metals of alchemy relate to events in the life and their astrological associations, the Reverberatory Furnace, the First Matter, the Philosopher's Stone, the Elixir Vitae, the Great Work and developing higher consciousness. The alchemical metals of lead, tin, iron, copper, mercury, silver, and gold are described symbols of the many and varied life experiences the soul must undergo in order to build a spiritual body.

Rudolf II-Habsburg heir, Holy Roman Emperor, king of Hungary, Germany, and the Romans-is one of history's great characters, and yet he remains largely an unknown figure. His reign (1576-1612) roughly mirrored that of Queen Elizabeth I of England, and while her famous court is widely recognized as a sixteenth century Who's Who, Rudolf 's collection of mathematicians, alchemists, artists, philosophers and astronomers-among them the greatest and most subversive minds of the time-was no less prestigious and perhaps even more influential. Driven to understand the deepest secrets of nature and the riddle of existence, Rudolf invited to his court an endless stream of genius-Danish astronomer Tycho Brahe, German mathematician Johannes Kepler, English magus John Dee, Francis Bacon, and mannerist painter Giuseppe Archimboldo among many others. Prague became the artistic and scientific center of the known world-an island of intellectual tolerance between Catholicism, Protestantism, and Islam. Combining the wonders and architectural beauty of sixteenth century Prague with the larger than-life characters of Rudolf 's court, Peter Marshall provides an exciting new perspective on the pivotal moment of transition between medieval and modern, when the foundation was laid for the Scientific Revolution and the Enlightenment.

Here in one slender volume is a basic introduction to Chinese alchemy - a tradition that dates back 5,000 years. Chinese alchemy, largely associated with Taoism, has a recorded history of more than 2,000 years, but traditionally it goes back even further to nearly 3000 BC and the time of the Yellow Emperor. While Western alchemy was concerned with the search for spiritual and material gold, classic Taoist alchemy was a mystical quest for immortality with its aim being union with the Absolute. Jean Cooper describes the history and development of Taoist alchemy, compares it to similar traditions in India and Turkistan, and gives it context by contrasting it with the rationale of the Western hermetic tradition. As she writes in her concluding chapter: The whole work of alchemy is summed up in the phrase 'To make of the body a spirit and of the spirit a body'. . . . The goal of the Taoist alchemist-mystic was transformation, or perhaps more correctly, transfiguration, of the whole body until it ceases to 'be' and is absorbed into and becomes the Tao. This is an essential guide for anyone interested in Chinese legend and lore, Chinese magic and medicine, and Taoism.
