Written in simple terms with an emphasis on

discipline nomenclature, professionalism, and articulation of content, Carpentry is among the first texts to integrate a full set of building plans with 2015 International Code Council building standards, and the latest carpentry text built around the ideals of modern and sustainable construction methods. Fully conceived, designed, and written to help develop the first generation of carpenters and builders of tomorrow's highly efficient green homes, the book is based on building science and the latest materials and techniques. The mathematics, theory, practice, techniques, and applications of carpentry are interwoven within a larger discussion of sustainability, resource and labor efficiencies, indoor air quality, and

environmental impact. The book develops building skills that go beyond technique by explaining purpose, code compliance, structure requirements, and introducing plan reading spatial skills.

"No other book has made me want to re-read Ovid and retile my bathroom floor, nor given me the conviction that I can do both. I loved it." —Rosie Schaap, author of *Drinking with Men* A warm and

inspiring book for anyone who has ever dreamed of changing tracks, *Hammer Head* is the story of a young woman who quit her desk job to become a carpenter. Writing with infectious curiosity, Nina MacLaughlin—a Classics major who couldn't tell a Phillips from a flathead screwdriver—describes the joys and frustrations of making things by hand. Filled with the wisdom of writers from Ovid to Mary Oliver and MacLaughlin's own memorable accounts of working with wood, unfamiliar tools, and her unforgettable mentor, *Hammer Head* is a passionate book full of sweat, bashed thumbs, and a deep sense of finding real meaning in work and life.

The Complete Book of Woodworking  
Stobart Davies

The Pulitzer Prize-winning author brings “clarity, intelligence and grace” to the tale of building a home in this New York Times Bestseller (The New York Times Book Review). It’s 1983 and Jonathan and Judith Souweine are ready to build their forever home on a four-acre lot just outside of Amherst, Massachusetts. A lawyer and a psychologist, neither has much experience with the process. In this New York Times bestseller, Tracy Kidder leads readers through the grand adventure of building the American dream. In his portrayal, constructing a staircase or applying a coat of paint becomes a riveting tale of conflicting wills, the strength and strain of

relationships, and pride in craftsmanship. With drama, sensitivity, and insight, the Pulitzer Prize-winning author of *The Soul of the New Machine* takes us from blueprints to moving day. In the process, he sheds new light on objects usually taken for granted and creates a vivid cast of characters you will not soon forget. “Tracy Kidder has done it again. . . . What might seem like ordinary work takes on an extraordinary, unpredictable life of its own. The subject is fascinating, the book a remarkable piece of craftsmanship in itself.”  
—Chicago Tribune Book World “Kidder makes us feel with a splendid intensity the complex web of relationships and emotions that inevitably comes into play in the act of bringing a work of architecture to fruition.” —The New York

Times Book Review

*Measure Twice, Cut Once* John Wiley & Sons

The inspiration for the major motion picture, *THE IRISHMAN*. Includes an Epilogue and a Conclusion that detail substantial post-publication corroboration of Frank Sheeran's confessions to the killings of Jimmy Hoffa and Joey Gallo. "Sheeran's confession that he killed Hoffa in the manner described in the book is supported by the forensic evidence, is entirely credible, and solves the Hoffa mystery." — Michael Baden M.D., former Chief Medical Examiner of the City of New York "Charles Brandt has solved the Hoffa mystery." — Professor Arthur Sloane, author of *Hoffa* "It's all true." — New York Police Department organized crime

homicide detective Joe Coffey "I heard you paint houses" are the first words Jimmy Hoffa ever spoke to Frank "the Irishman" Sheeran. To paint a house is to kill a man. The paint is the blood that splatters on the walls and floors. In the course of nearly five years of recorded interviews, Frank Sheeran confessed to Charles Brandt that he handled more than twenty-five hits for the mob, and for his friend Hoffa. He also provided intriguing information about the Mafia's role in the murder of JFK. Sheeran learned to kill in the US Army, where he saw an astonishing 411 days of active combat duty in Italy during World War II. After returning home he became a hustler and hit man, working for legendary crime boss Russell Bufalino. Eventually Sheeran would rise to a

position of such prominence that in a RICO suit the US government would name him as one of only two non-Italians in conspiracy with the Commission of La Cosa Nostra, alongside the likes of Anthony "Tony Pro" Provenzano and Anthony "Fat Tony" Salerno. When Bufalino ordered Sheeran to kill Hoffa, the Irishman did the deed, knowing that if he had refused he would have been killed himself. Charles Brandt's page-turner has become a true crime classic.
