When I host book signings and give lectures on lottery prediction, people always ask, If lotteries are random draws, how can they be predicted? I always answer the same way. Lotteries are predictable because we have the ability to redirect subtle energy. With about 20 to 30 people present, I always ask how many are familiar with subtle energies. No one has ever raised their hand. And, why should they! It's only been within the last 30 to 40 years that Science discovered subtle energies and their role in manifesting human desire. It's only been within the last 10 years that this research and experimentation has been available to the general public in books like Lynne McTaggart's *The Intention Experiment* or Dr. Tiller's *Conscious Acts of Creation*. As a matter of fact, it has only been this year (2013) that Dr. Peter Higgs won the Nobel Prize for his work on the God Particle. The first subtle energy particle ever found at the new CERN accelerator. With these discoveries and experiments on the redirection of subtle energy, Scientists believe that a new technology has been born. Significantly more powerful than electromagnetic energy, significantly more powerful than nuclear energy, subtle energy technology will bring about new ways for human populations to interact, and new ways to communicate. It will significantly change our health care industry and influence the movement towards world peace. Most interesting, are the time and space attributes of subtle energy that allow the human mind to predict the future and consequently win lotteries. In the science of Quantum Mechanics, experimenting at the level of subtle energy, scientists found that their observations were affecting the outcome of the experiments. Somehow, the experimenter's consciousness was having an effect on our everyday reality of atoms and elements. This led to other experiments many concerning time displacement. As it turns out, subtle energy does not conform to the way you and I experience sequential time. Subtle energy is unbound by time and space - giving it predictive potential. A few daring researchers now understand subtle energy to be a vast field of potential energy supporting our everyday reality and somehow this energy is intimately interconnected with our minds. Consequently, at this stage of subtle energy technology research, researchers are studying ways that the mind can amplify subtle energies to manifest human desires for better health, wealth and abundance, world peace, lasting vitality, and prophetic vision. *Dream a Lottery Win Tonight*, specializes in the application of subtle energy and its prophetic vision attributes. We accomplish this by activating an energized intention near the mind's source of subtle energy. In this way, we amplify the intention to win a lottery. Of course, we could amplify any intention including those for better health or world peace. We

decided on lottery prediction not because it was easy but because it was difficult and because the results are quantitative not subjective. In developing the skill of prophetic vision to win a lottery, we use an energized intention activated as close to the mind's Source of subtle energy as possible. To get close to the Source, we use mantras. These mantras resonate frequencies that are specific to the results we seek. In this case, we use the Lakshmi Mantra, used since antiquity to enhance ones abilities at games of chance. Once close to the source, we activate an energized intention. The intention is energized with emotion and bright sense visualizations. We perform this meditation just before retiring enhancing our dreams allowing us to predict a winning number. In this way, we use subtle energies to win the lottery. Larry Vingelman Author

After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. "We cannot change the cards we are dealt, just how we play the hand." —Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—"Really Achieving Your Childhood Dreams"—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have . . . and you may find one

day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called "winning systems" for keno and lotteries are examined mathematically and their flaws identified.

The long awaited, "fast-paced psycho-comedic thrill-ride" from the "master storyteller" [Jonathan Ames] behind *The Juror* and *The Caveman's Valentine*. The Boatwrights just won 318 million dollars in the Georgia State lottery. It's going to be the worst day of their lives. When Shaw McBride and Romeo Zderko pull up at a convenience store off I-95 in Georgia, their only thought is to fix a leaky tire and be on their way again to Florida-away from their dull Ohio tech-support jobs. But this happens to be the store from which a 318,000,000 million dollar jackpot ticket has just been sold -- and when a pretty clerk accidentally reveals to Shaw the identity of the winning family, he hatches a ferociously audacious scheme: He and Romeo will squeeze the family for half their prize. That night, he visits the Boatwright home and takes the family

hostage, while Romeo patrols the streets nearby, prepared to murder the Boatwrights' loved ones at any sign of resistance. At first, the family offers none. But Shaw's plot depends on maintaining constant fear-merciless, unfaltering terror-and soon, under the pressure, everyone's sanity begins to unravel . . . At once frightening, comic, and suspenseful, *Ravens* is a wholly original and utterly compelling novel from one of our most talented writers.

Picking Winning Lottery Numbers can be hard. Many people have complicated mathematical systems that use historical data (maybe a birthday, or what they are lucky numbers). Some people use the same numbers every time they play. Others just let the system spit out random numbers. Very often the results are disappointing or totally random. This book goes back to the grand tradition of fusing our own dreams and modern numerology—coding this dream imagery into usable, meaningful numbers. For instance, are you dreaming of Pizza every other night? Well this could mean something (apart from waking up hungry every morning!). Why not use this in your choice of number? The tables in this *Modern Lottery Dream Book* will give you something usable from that dream to actually use in the Lottery of your choice. The number to choose for Pizza would be 65 if you are playing Power Ball. In this book, you will Learn how to remember your dreams Learn how to Transcode Proper Nouns Create complete sets of Lottery Numbers from your Dreams Over 1000 common items included - all with their own numbers ** While no Winning is Guaranteed, this book can make the numbers directly connect with your dreams. Tables and descriptions valid for Mega Millions (US), Powerball (US), UK National Lottery (UK), Euro Jackpot (EU) and Euro Millions (EU).
