Cross cut adhesion test Astm D3359 Standard Test Methods 5.2 This test method is limited to evaluating lower levels of adhesion (see 1.3). The intra- and inter-laboratory precision of this test method is similar to other test methods for coated substrates (for example, Test Method D2370 and Test Method D4060), and is insensitive to all but large differences in adhesion. Limiting the range of rankings from 0 to 5 reflects the inability of this test ... ASTM D3359 - 17 Standard Test Methods for Rating Adhesion ... ASTM D3359 is a standard test methods for measuring adhesion by tape test. This test assesses the adhesion of film coatings to metallic substrates by applying and removing pressure-sensitive tape over cuts made in the film. This test method is also known as the Cross Hatch test. ASTM D3359 Test Methods For Measuring Adhesion by Tape - Microm Test Method D3359 was developed with 4.2 Test Method B—A lattice pattern with either six or eleven cuts in each direction is made through the film to the substrate, pressure-sensitive tape is applied over the lattice pattern and then removed, and adhesion is assessed qualitatively on a 0 to 5 scale. 4.2.1 Subject to agreement between the purchaser and the seller, Test Method B can be used for films thicker than 125 µm (5 mils) if wider spaced cuts are employed. Astm D3359-17 Standard Test Methods For Rating Adhesion By ... Standard Test Methods for Measuring Adhesion by Tape Test These test methods cover procedures for assessing the adhesion of coating films to metallic substrates by applying and removing pressure-sensitive tape over cuts made in the film. NOTE 1—This test... ASTM D3359 ASTM D3359 - Standard Test Methods for Rating Adhesion by ... ASTM D 3359 - 09 Standard Test Methods for Measuring Adhesion by Tape Test Issues with plastic substrates are x3359-08 in Appendix X1. If the peel angle and rate vary, the force required to remove the tape can change dramatically. D&D 3.5 VILE DARKNESS PDF ASTM D 3359 - 09 Standard Test Methods for Measuring ... Also, Test Method B is not considered ... ASTM D3359 - 02 Standard Test Methods for Measuring ... Test Methods D3359 was developed with metal as the substrate and, in the absence of supporting precision and bias data, is so limited. 1.2 Test Method A is primarily intended for use at job sites while Test Method B is more suitable for use in the laboratory. Also, Test Method B is not considered suitable for films thicker than 5 mils (125µm). Standard Test Methods for Measuring Adhesion by Tape Test 1 "Two test methods are described in ASTM D3359: Method A (X-cut), and Method B (Cross-cut). Test Method A is primarily intended for use on coatings/coating systems over 5 mils (125 µm), while Method B is generally used on coatings/coatings systems less than 5 mils thick. Either method can be performed in the shop, field or laboratory. Measuring Adhesion by Tape Test per ASTM D3359 Issues and ... These results, expressed as a discrete quantity, can be reached through two different testing methods covered in ASTM D3359-17 - Standard Test Methods for Rating Adhesion by Tape Test. This standard details procedures for assessing the adhesion of coating films applied to metallic substrates through the placement and removal of pressure-sensitive tape over cuts made in the film.
