War has always been a dangerous business, bringing injury, wounds, and death, and—until recently—often disease. What has changed over time, most dramatically in the last 150 or so years, is the care these casualties receive and who provides it. This book looks at the history of how humanity has cared for its war casualties and veterans, from ancient times through the aftermath of World War II.

This landmark achievement in philosophical scholarship brings together leading experts from the diverse traditions of Western philosophy in a common quest to illuminate and explain the most important philosophical developments since the Second World War. Focusing particularly (but not exclusively) on those insights and movements that most profoundly shaped the English-speaking philosophical world, this volume bridges the traditional divide between 'analytic' and 'Continental' philosophy while also reaching beyond it. The result is an authoritative guide to the most important advances and transformations that shaped philosophy during this tumultuous and fascinating period of history, developments that continue to shape the field today. It will be of interest to students and scholars of contemporary philosophy of all levels and will prove indispensable for any serious philosophical collection.

This book comprehensively analyzes the impact of continuing European integration on industrial relations institutions and outcomes. It organizes an immensely rich body of theoretical and empirical material to sustain its core argument that the governance of industrial relations is increasingly multi-level. Cross-national influences are shown to mix with national ones and involve the European sector and company, as well as Community, levels. Competing tendencies towards 'Europeanization', 'Americanization' and 'Re-nationalization' are identified. The approach is multi-disciplinary and truly cross-national. It deals with both the theory and practice of industrial relations in contemporary Europe.

Socialism is strangely impervious to refutation by real-world experience. Over the past hundred years, there have been more than two dozen attempts to build a socialist society, from the Soviet Union to Maoist China to Venezuela. All of them have ended in varying degrees of failure. But, according to socialism's adherents, that is only because none of these experiments were "real socialism". This book documents the history of this, by now, standard response. It shows how the claim of fake socialism is only ever made after the event. As long as a socialist project is in its prime, almost nobody claims that it is not real socialism. On the contrary, virtually every socialist project in history has gone through a honeymoon period, during which it was enthusiastically praised by prominent Western intellectuals. It was only when their failures became too obvious to deny that they got retroactively reclassified as "not real socialism".

CURATING AND THE EDUCATIONAL TURN

Imagine a class where students are actively and personally engaged in thinking critically while also discovering how to apply those thinking skills in everyday life. Now imagine those same students confidently participating in class, working efficiently through the exercises outside class, and performing better in the course. With Connect Critical Thinking, students can achieve this success. Connect Critical Thinking is a first: a learning program with pedagogical tools that are anchored in research on critical thinking. Along with Moore & Parker's engaging writing style and the wealth of topical exercises and examples that are relevant to students' lives, Connect Critical Thinking helps ensure that students can come to class confident and prepared. What other course provides students with skills they can apply so broadly to success in school and success in life?

In recent years, there has been increased debate about the incorporation of pedagogy into art and curatorial practice-about what has been termed the 'educational turn'. In this companion volume to the critically acclaimed Curating Subjects, artists, curators, critics and academics respond to this widely recognised sense of art's paradigmatic re-orientation towards the educational. Consisting primarily of newly commissioned texts, from interviews and position statements to performative texts and dialogues, Curating and the Educational Turn also includes a small number of previously published writings that have proved pivotal in the debate so far This anthology presents an essential enquiry for anyone interested in the cultural politics of production at the intersections of art teaching and learning Curating and the Educational Turn is indispensable reading for anyone

Mark Guzdial and Barb Ericson have a most effective method for teaching computing and Java programming in a context that readers find interesting: manipulating digital media. Readers get started right away by learning how to write programs that create interesting effects with sounds, pictures, web pages, and video. The authors use these multimedia applications to teach critical programming skills and principles like how to design and use algorithms, and practical software engineering methods-all in the context of learning how to program in Java. Mark and Barb also demonstrate how to communicate compatibly through networks and do concurrent programming. The book also includes optional coverage of rudimentary data structures and databases using Java and comes with a CD-ROM containing all the code files referenced in the text and required for media manipulation. Allows readers to use their own media, such as personal sound or picture files. Demonstrates how to manipulate media in useful ways, from reducing red eye and splicing sounds to generating digital video special effects. The book also includes optional coverage of rudimentary data structures and databases using Java and comes with a CD-ROM containing all the code files referenced in the text and required for media manipulation. For beginners interested in learning more about basic multimedia computing and programming.
