ENGLISH AND EUROPEAN PERSPECTIVES ON CONTRACT AND COMMERCIAL LAW

Cambridge University Press

The purpose of this book is to honour the influential and wide-ranging work of Professor Hugh Beale. It contains essays by twenty-five very distinguished authors, each of whom has worked with

Professor Beale as a co-author, as a teaching colleague, during his time as Law Commissioner of England and Wales, or as part of the study groups working in Europe on contract and commercial law. The essays reflect different aspects of Professor Beale's interests. Some concentrate on English contract law, either from a historical or a current perspective, while others are focused on aspects of European contract law. There are four essays looking at current issues relating to security and financing, and, as befits a former Law Commissioner, three essays on law reform. The essays in the final section discuss trends in transnational and European commercial law. This book brings together the reflections of eminent writers from all over Europe on important issues facing contract and commercial law and will be of interest to all scholars and practitioners working in these areas.

Commercial contract law is in every sense optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

Guest on the Law of Assignment A&C Black

An oft-repeated assertion within contract law scholarship and cases is that a good contract law (or a good commercial contract law) will meet the needs and expectations of commercial contractors.

Despite the prevalence of this statement, relatively little attention has been paid to why this should

be the aim of contract law, how these 'commercial expectations' are identified and given substance, and what precise legal techniques might be adopted by courts to support the practices and expectations of business people. This book explores these neglected issues within contract law. It examines the idea of commercial expectation, identifying what expectations commercial contractors may have about the law and their business relationships (using empirical studies of contracting behaviour), and assesses the extent to which current contract law reflects these expectations. It considers whether supporting commercial expectations is a justifiable aim of the law according to three well-established theoretical approaches to contractual obligations: rights-based explanations, efficiency-based (or economic) explanations and the relational contract critique of the classical law. It explores the specific challenges presented to contract law by modern commercial relationships and the ways in which the general rules of contract law could be designed and applied in order to meet these challenges. Ultimately the book seeks to move contract law beyond a simple dichotomy between contextualist and formalist legal reasoning, to a more nuanced and responsive legal approach to the regulation of commercial agreements.

Tom Bingham was among the most influential judges of the twentieth century, having occupied in succession the most senior judicial offices, Master of the Rolls, Lord Chief Justice and Senior Law Lord, before retiring in 2008, at which point he devoted himself to the teaching of Human Rights Law, until his death in September 2010. His judicial and academic work has deeply influenced the development of the law in a period of substantial legal change. In particular his role in establishing the new UK Supreme Court, and his views on the rule of law and judicial independence left a profound mark on UK constitutional law. He was also instrumental in championing the academic and judicial use of comparative law, through his judicial work and involvement with the British Institute of International and Comparative Law. This volume collects around fifty essays from colleagues and

those influenced by Lord Bingham, from across academia and legal practice. The essays survey Lord Bingham's pivotal role in the transformations that took place in the legal system during his career.

Through further technological development and increased globalization, conducting business abroad has become easier, especially for Small and Medium Enterprises (SME). However, the legal issues associated with international commerce have not lessened in complexity, including the role of non-state rules. The book provides a comprehensive analysis of non-state rules in international commercial contracts. Non-state rules have legal authority in the national and international sphere, but the key question is how this legal authority can be understood and established. To answer this question this book examines first what non-state rules are and how their legal authority can be measured, it then analyses how non-state rules are applied in different scenarios, including as the applicable law, as a source of law, or to interpret either the law or the contract. Throughout this analysis three other important questions are also answered: when can non-state rules be applied? when are they applied? and how are they applied? The book concludes with a framework and classification that leads to a deeper understanding of the legal authority of non-state rules. Providing a transnational perspective on this important topic, this book will appeal to anyone researching international commercial law. It will also be a valuable resource for arbitrators and anyone working in international commercial litigation.
