*Key Concepts in Organization Theory* OUP Oxford

This Research in Organizational Sciences volume to explore and question the received wisdom of organizational sciences. The chapters in this volume (and the companion volume) seek to establish boundary conditions for important organizational constructs and processes. They illustrate the importance of context for interpreting the received wisdom of organizational science by showing when constructs must be adapted to changing circumstances. The volume begins with four chapters looking at the construct of leadership. Each of these addresses an important aspect of our understanding of leadership and its practice. The four chapters on leadership are followed by five chapters dealing with other organizational processes including motivation, organizational change, the role of diversity in organizations and organizational citizenship. The last three chapters deal with the issue of knowledge in large systems. Two chapters address how information may be transmitted across organizations and generations of workers. The final chapter deals with the use of information by organizational decision-makers. The 12 papers in this volume all, in some way question received wisdom and present alternatives which expand our understanding of organizational behavior. These chapters each strive to present new ways of understanding organizational constructs, and in so doing reveal how received wisdom does not always lead to best practice in research or application. It is our hope that these chapters illustrate how challenging received wisdom in organizational studies can provide new ways of thinking about organizational processes. These new ways of thinking in turn can provide better understanding of the processes necessary to increase organizational effectiveness.

**The Role of Resources and Capabilities** Issues in Industrial Relations and Management: 2013 Edition

Transgenerational entrepreneurship, as a discipline, examines the processes, resources and capabilities that allow family enterprises to create social and economic value over time in order to

succeed beyond the first generation of business owners. While tangible resources such as financial and physical capital are certainly important factors in the long-term success of a family-run business, this book focuses specifically on the role of intangible resources and capabilities, which are less easily quantifiable but equally vital.

### LEARNING FROM BELIEF AND SCIENCE

Book Rivers

Strategic human capital resources are a relatively new construct with a scholarly literature that is still evolving. Work in this area requires the integration of multiple theoretical perspectives and empirical approaches, but that integration rarely occurs. Within these pages, the editors have combined the voices of leading scholars from a wide range of disciplinary backgrounds to provide a comprehensive introduction to the current state of the field.

**Towards a Balanced Agenda** World Scientific

While executives are keen to harness organizational knowledge and improve business performance, the topic of how academics can produce rigorous and relevant theory in working

relationships with practitioners is a much contested topic. Many aspects of this knowledge co-creation can create tensions, and the ways in which research is conducted and published can affect practitioner acceptance, as well as its consequent uptake and use in different contexts. Expertly compiled by Jean Bartunek and Jane McKenzie, with contributions from global thinkers in the field, this book offers a concise and up-to-date review of the essential analysis and action underlying scholarly engagement with the world of business. It discusses the sorts of capabilities academics need to collaborate effectively with practitioners and illustrates good practice through international case studies drawn from acknowledged centres of excellence. These show how to negotiate different constituencies with different priorities, values, and practices to work together to produce research of rigor and relevance. It will be a key reference and resource for all researchers who are engaged with practitioners, and an invaluable tool for training academics to develop research with impact.

### BRIDGING THE SCHOLAR-PRACTITIONER GAP IN HUMAN RESOURCES DEVELOPMENT

SAGE

Services are key activities in a globalized economy and they also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the Third International Conference on Serviceology (ICServ2015), held July 7-9, 2015, in San Jose, CA, USA. The conference was supported by the Society for Serviceology. The society was established in 2012 in Japan to explore the scientific systematization of services and to promote technological developments for solutions to industrial issues. This book provides a useful general guide to the state of the art in the theory and practice of services. It can also serve as a valuable reference book for researchers in a wide range of fields from engineering to marketing and economics. [Perspectives on Supplier Innovation](#) Cengage Learning

The Oxford Handbook of Evidence-based Management shows how leaders and managers can make effective use of best available evidence in the decisions they make — and what educators and researchers need to do to help them come to the right solution.

*Management Studies in Crisis* Human Kinetics Publishers

More students study management and organization studies than ever, the number of business schools worldwide continues to rise, and more management research is being published in a greater number of journals than could have been imagined twenty years ago. Dennis Tourish looks beneath the surface of this progress to expose a field in crisis and in need of radical reform. He identifies the ways in which management research has lost its way, including a remoteness from the practical problems that managers and employees face, a failure to replicate key research findings, poor writing, endless obscure theorizing, and an increasing number of research papers being retracted for fraud and other forms of malpractice. Tourish suggests fundamental changes to remedy these issues, enabling management research to become more robust, more interesting and more valuable to society. A must read for academics, practising managers, university administrators and policy makers within higher education.

*Handbook of Research on Managing Managers* IAP

Redundancy, restructuring, downsizing. There are few, if any, other management books on this important topic, and yet the pace of redundancies has only accelerated in recent years. Coupled with this, many companies that implement redundancies as a cost-cutting exercise often fail to achieve their goal. Whilst viewed as an uncomfortable topic by many, guidance on how to implement a redundancy programme that is fair, proportionate and ultimately leads to improved organisational performance, has never been more needed. This book fills this important gap. It takes the reader through a redundancy implementation strategy – Re-Focus, Re-Organise and Re-Build – that incorporates the key aspects of planning and analysis, fairness and justice, and prepares management for redundancy implementation through training. What will your communications include? What will be your strategy for implementation? What training does your management need? Various helpful template examples are included for employee consultation, communication and training. The book will be invaluable for business managers, HR professionals, employee representatives and HR students.

*Strategic Renewal* is an original research anthology offering insight into a subject area which, although critical for the sustained success of organizations, has received relatively little attention as distinct from the more general phenomenon of strategic change. Firstly, by providing a summary of the literature, this research anthology helps graduate students and new researchers grasp the current state of affairs in the field. Secondly, this research anthology will help update the knowledge base of the existing researchers in the field. By bringing together various studies, the research anthology determines the core concepts of the field and elucidates the key gaps and future research areas. Through contributions building on the knowledge bases of other disciplines, this research anthology develops an interdisciplinary research agenda, giving the reader an in-depth understanding of the mediating, moderating, and antecedent variables concerning strategic renewal. *Strategic Renewal* aims to provide a state-of-understanding to the subject, as well as a clear picture of the cross-disciplinary landscape that informs the subject. Thus, this research anthology is essential reading for managers, consultants, and other practitioners, as well as students and scholars of business.
