Every knitter, whether a beginner or an expert, wants easy projects for travel, gifts or those times when following a complex pattern is impractical. Sequence Knitting introduces a radical and simple approach for creating amazing fabrics by working a sequence of stitches over and over again. Beginning with 1-row patterns, the book delves into the possibilities of this technique, expanding into methods for

creating complex designs that can be worked back and forth, in the round, or in shapes like triangles. The book includes stitch dictionaries with over 190 fabrics, many of which are new and reversible, as well as over 40 patterns for simple and elegant accessories. The simplicity of the knitting enables a thoughtful exploration of color and fiber, so designer Cecelia Campochiaro wraps up the book by considering color, fiber and variegated yarns. This groundbreaking book is sure to become a classic must-have for every knitter's reference library.

Through a thematic overview of court culture that connects the cultural with the political, confessional, spatial, material and performative, this volume

introduces the dynamics of power and culture in the early modern European court. Exploring the period from 1500 to 1750, *Early Modern Court Culture* is cross-cultural and interdisciplinary, providing insights into aspects of both community and continuity at courts as well as individual identity, change and difference. Culture is presented as not merely a vehicle for court propaganda in promoting the monarch and the dynasty, but as a site for a complex range of meanings that conferred status and virtue on the patron, maker, court and the wider community of elites. The essays show that the court provided an arena for virtue and virtuosity, intellectual and social play, demonstration of moral authority and performance of social, gendered,

confessional and dynastic identity. Early Modern Court Culture moves from political structures and political players to architectural forms and spatial geographies; ceremonial and ritual observances; visual and material culture; entertainment and knowledge. With 35 contributions on subjects including gardens, dress, scent, dance and tapestries, this volume is a necessary resource for all students and scholars interested in the court in early modern Europe.

First published in 1998, this volume explores the expanding wave of a new kind of museums of contemporary art in the nineteenth and early twentieth centuries. Lorente examines their 'coming of age' and the weight of their

museological legacy, arguing that the establishment of great national museums of art at London and Paris radiated out, carrying their influence with it. This book emerged as part of a series on towns and cities and has a focus on London and Paris as centres of artistic innovation.

Microbiome research has focused on microorganisms that live within the human body and their effects on health. During the last few years, the quantification of microbiome composition in different environments has been facilitated by the advent of

high throughput sequencing technologies. The statistical challenges include computational difficulties due to the high volume of data; normalization and quantification of metabolic abundances, relative taxa and bacterial genes; high-dimensionality; multivariate analysis; the inherently compositional nature of the data; and the proper utilization of complementary phylogenetic information. This has resulted in an explosion of statistical approaches aimed at tackling the unique opportunities and challenges presented by microbiome data. This book provides a comprehensive overview of the state of the art in statistical and informatics technologies for microbiome research. In addition to reviewing demonstrably successful cutting-edge methods,

particular emphasis is placed on examples in R that rely on available statistical packages for microbiome data. With its wide-ranging approach, the book benefits not only trained statisticians in academia and industry involved in microbiome research, but also other scientists working in microbiomics and in related fields.

Premodern and early modern yoga comprise techniques with a wide range of aims, from turning inward in quest of the true self, to turning outward for divine union, to channeling bodily energy in pursuit of sexual pleasure. Early modern yoga also encompassed countercultural beliefs and practices. In contrast, today, modern yoga aims at

the enhancement of the mind-body complex but does so according to contemporary dominant metaphysical, health, and fitness paradigms.

Consequently, yoga is now a part of popular culture. In *Selling Yoga*, Andrea R. Jain explores the popularization of yoga in the context of late-twentieth-century consumer culture. She departs from conventional approaches by undermining essentialist definitions of yoga as well as assumptions that yoga underwent a linear trajectory of increasing popularization. While some studies trivialize popularized yoga systems by reducing them to the mere commodification or corruption of what is perceived as an otherwise fixed, authentic system, Jain suggests that this dichotomy oversimplifies the history of

yoga as well as its meanings for contemporary practitioners. By discussing a wide array of modern yoga types, from Iyengar Yoga to Bikram Yoga, Jain argues that popularized yoga cannot be dismissed--that it has a variety of religious meanings and functions. Yoga brands destabilize the basic utility of yoga commodities and assign to them new meanings that represent the fulfillment of self-developmental needs often deemed sacred in contemporary consumer culture.

Modern Marriage and the Lyric Sequence investigates the ways in which some of our best poets writing in English have used poetic sequences to capture the

lived experience of marriage. Beginning in 1862 with George Meredith's *Modern Love*, Jane Hedley's study utilizes the rubrics of temporality, dialogue, and triangulation to bring a deeply rooted and vitally interesting poetic genre into focus. Its twentieth- and twenty-first-century practitioners have included Edna St. Vincent Millay, Robert Lowell, Rita Dove, Eavan Boland, Louise Glück, Anne Carson, Ted Hughes, Claudia Emerson, Rachel Zucker, and Sharon Olds. In their poetic sequences the flourishing or failure of a particular marriage is always at stake, but as that relationship plays out over time, each sequence also speaks to larger questions: why we marry, what a marriage is, what our collective stake is in other people's marriages. In the book's final chapter

gay marriage presents a fresh testing ground for these questions, in light of the US Supreme Court's affirmation of same-sex marriage.

Let's Dance! The Museum of Modern Art This accessible and fresh account of German writing since 1750 is a case study of literature as a cultural and spiritual resource in modern societies. Beginning with the emergence of German language literature on the international stage in the mid-eighteenth century, the book plays down conventional labels and periodisation of German literary history in favour of the explanatory force of international cultural impact. It explains, for instance, how specifically German and Austrian conditions shaped major contributions to European literary culture such as

Romanticism and the 'language scepticism' of the early twentieth century. From the First World War until reunification in 1990, Germany's defining experiences have been ones of catastrophe. The book provides a compelling overview of the different ways in which German literature responded to historical disaster. They are, first, Modernism (the 'Literature of Negation'), second, the literature of totalitarian regimes (Third Reich and German Democratic Republic), and third the various creative strategies and evasions of the capitalist democratic multi-medial cultures of the Weimar and Federal Republics. The volume achieves a balance between textual analysis and cultural theory that gives it value as an introductory reference source and as an

original study and as such will be essential reading for students and scholars alike.

Dancing in the English style explores the development, experience, and cultural representation of popular dance in Britain from the end of the First World War to the early 1950s. It describes the rise of modern ballroom dancing as Britain's predominant popular style, as well as the opening of hundreds of affordable dancing schools and purpose-built dance halls. It focuses in particular on the relationship between the dance

profession and dance hall industry and the consumers who formed the dancing public. Together these groups negotiated the creation of a 'national' dancing style, which constructed, circulated, and commodified ideas about national identity. At the same time, the book emphasizes the global, exploring the impact of international cultural products on national identity construction, the complexities of

Americanisation, and Britain's place in a transnational system of production and consumption that forged the dances of the Jazz Age.
