This study arises from the need for comparative historical perspectives on the different styles of French and British colonialism, and the localised impacts of the regimes in West Africa. The work is broadly divided as: an overview, including a summary of new trends in African historiography; an examination of colonial methods; a study of socio-economic impact and the impact on indigenous political institutions and culture. A considerable part of the study addresses the question: How did the colonial styles of governance determine the post-colonial states? The author identifies a major point of divergence to be French centralising and assimilationist tendencies in education and the economy, as opposed to a British laissez-faire approach. This explains, in part, the uniformity in currency, language and culture which makes francophone Africa a distinctive cultural zone. Common concerns - which stem from the pre-colonial era - were mainly trade and trans-border co-operation. Pursuance of common goals, the author stipulates, paved the way for institutions of economic integration - e.g. ECOWAS.

Originally published in 1980 and here re-issued with an updated preface, this book deals with the role of the horse in the societies of West Africa during the pre-colonial period. It traces the history of its introduction and its diffusion within West Africa, and examines the problems of maintaining horses in such a harsh environment. The use of horses in warfare in analysed but the non-military aspects of the West African horse culture are also discussed, principally the use of horses as tokens of status and wealth. The book includes a review of the decline of the West African horse culture in the 20th century, reflecting the passing of a political system based on warfare and slavery.

THE HORSE IN WEST AFRICAN HISTORY

StatPearls Publishing, LLC

In *Out of Africa*, author Isak Dinesen takes a wistful and nostalgic look back on her years living in Africa on a Kenyan coffee plantation. Recalling the lives of friends and neighbours—both African and European—Dinesen provides a first-hand perspective of colonial Africa. Through her obvious love of both the landscape and her time in Africa, Dinesen's meditative writing style deeply reflects the themes of loss as her plantation fails and she returns to Europe. WESTERN SAHARA COUNTRY STUDY GUIDE VOLUME 1 STRATEGIC INFORMATION AND DEVELOPMENTS

Lulu.com

The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.
