Sociolinguistics is the study of the interaction between language and society. In this classic introductory work, Janet Holmes and Nick Wilson examine the role of language in a variety of social contexts, considering both how language works and how it can be used to signal and interpret various aspects of social identity. Divided into three parts, this book explains basic sociolinguistic concepts in the light of classic approaches, as well as introducing more recent research. This sixth edition has been revised and updated throughout, using key concepts and examples to guide the reader through this fascinating area, including: • New material on gender, social media and online use of language, codeswitching, and language policy • An updated companion website that is fully cross-referenced within this book and features video and audio materials and links to useful websites • Revised examples and exercises that include new material from Asia and South America • Fully updated further reading and references sections An Introduction to Sociolinguistics is an essential introductory text for all students of sociolinguistics and a splendid point of reference for students of English language studies, linguistics, and applied linguistics.

This latest edition of the most internationally respected reference in food chemistry for more than 30 years, Fennema's Food Chemistry, 5th Edition once again meets and surpasses the standards of quality and comprehensive information set by its predecessors. All chapters reflect recent scientific advances and, where appropriate, have expanded and evolved their focus to provide readers with the current state-of-the-science of chemistry for the food industry. This edition introduces new editors and contributors who are recognized experts in their fields. The fifth edition presents a completely rewritten chapter on Water and Ice, written in an easy-to-understand manner suitable for professionals as well as undergraduates. In addition, ten former chapters have been completely revised and updated, two of which receive extensive attention in the new edition including Carbohydrates (Chapter 3), which has been expanded to include a section on Maillard reaction; and Dispersed Systems: Basic considerations (Chapter 7), which includes thermodynamic incompatibility/phase separation concepts. Retaining the straightforward organization and accessibility of the original, this edition begins with an examination of major food components such as water, carbohydrates, lipids, proteins, and enzymes. The second section looks at minor food components including vitamins and minerals, colorants, flavors, and additives. The final section considers food systems by reviewing basic considerations as well as specific information on the characteristics of milk, the postmortem physiology of edible muscle, and postharvest physiology of plant tissues.

Fifth Edition South Western Educational Publishing

Written for undergraduate level courses on family processes, family studies, introduction to the family, family communication, and dynamics of the family, this thoroughly class-tested new edition examines what is known about what goes on "behind closed doors" in families. Introduction to Family Processes, 4/e introduces the reader to the family processes approach--strategies and daily sequences of behavior used by family members to achieve goals. The family processes approach focuses on how families work, think, and interact; the Inner Family; and the dynamics among its members. Features of this Fourth Edition include: *Textbook and Student Workbook in one volume! Introduction to Family Processes, Fourth Edition is filled with writing activities and designed with enough space to complete the activities directly on the page. *Chapter Activities help reinforce concepts learned before moving on to the next concept. These activities are short essay responses to reinforce writing practice and critical thinking skills. *Journal Activities strengthen the students' connection to the material covered as they reflect, record, and revisit their own thoughts and opinions on guided journal exercises. *Spotlight on Research. These boxed features highlight valuable research studies. Once research is presented, students are then asked to reflect and respond. *Principle Boxes highlight specific principles relevant to chapter material and can be used as a study reference or to launch class activities/discussions. *Real families presented in case studies make the data and research come to life. *Each chapter opens with Chapter Outlines and concludes with Chapter Summary, Study Questions, and a Key Terms List.
